

**Case No. 12-0850-EL-REN
Maryshome118
Staff Interrogatories – Initial Set**

Question 1: Section B of the application is for facility owner information, the legal name of the facility owner representative appears to be for the aggregator not the facility owner. The facility owner representative should be the facility owner unless the facility owner is a corporation or LLC. Does Yellowlite own the facility? If not, please submit corrected information for section B.

Answer 1: Yes YellowLite does own the facility.

Question 2: In section I.1 the Unit nameplate capacity MW was listed as 0.00023. And the number of units is listed as 8.

8 x 0.00023 MW = 0.00184 MW for the whole facility. Generating units that use the same meter should be considered one unit. What is the correct unit nameplate capacity (MW) if the system is considered one unit?

Answer 2: 0.00184 MW, There are 8 panels at 230 KW each.

Question 3: In section O of the application you stated:

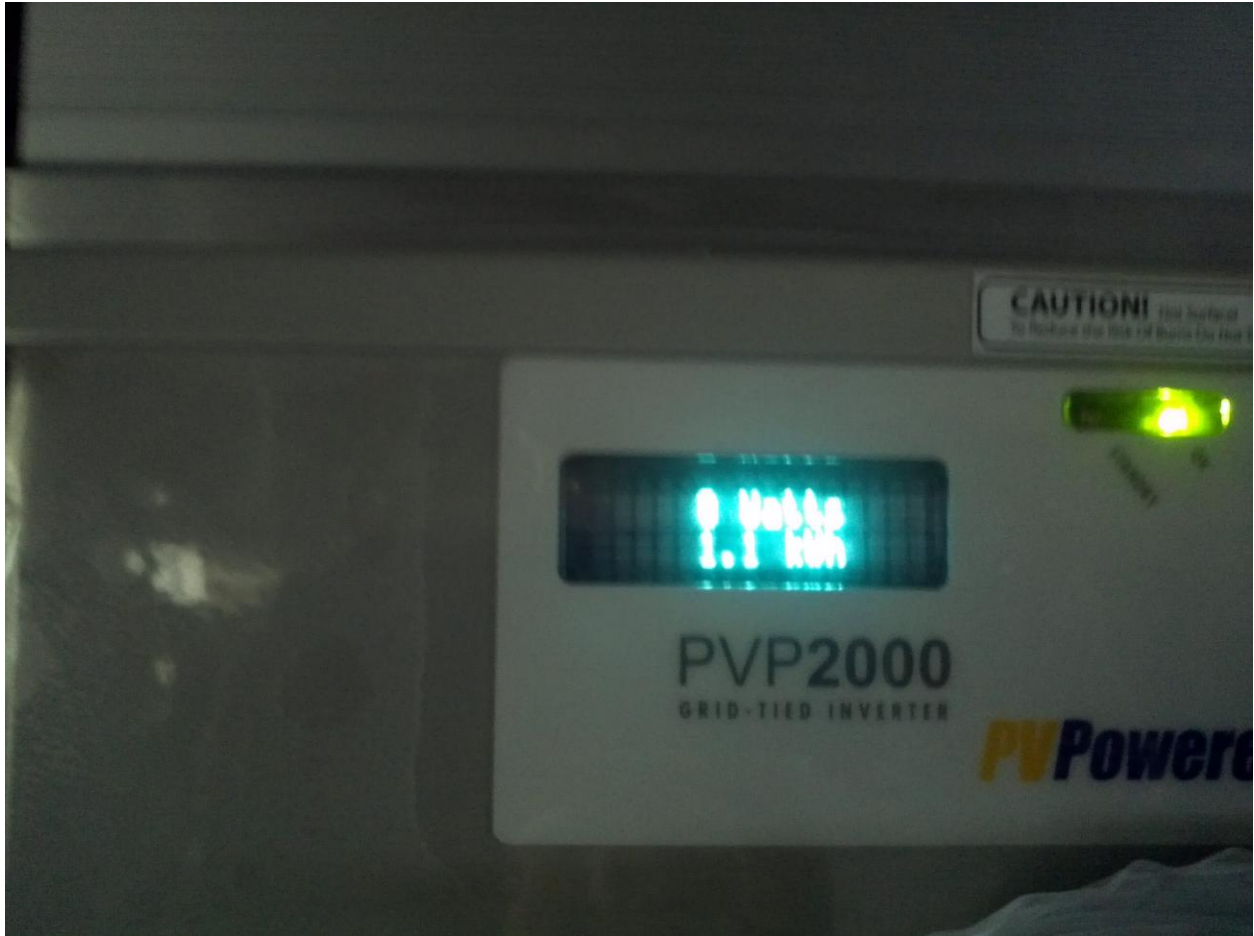

If the facility had a meter that accurately demonstrates generation levels, please state the specific

start date, and below insert documentation from the remote monitoring and reporting system:

March 07, 2012

However, you did not include documentation that shows your system was generating in March 2012. Please submit documentation from your remote monitoring and reporting system that shows your system was generating in March 2012.

Answer 3: There is currently no internet at the location. The picture shows the generation and the day it was taken.
