COMMENT DESCRIPTION:

With the latest changes granted to AEP has caused our electric expenses to triple. We survive on a very low profit margin and we are very concerned about our future. The impact on all small businesses will be devastating. Will you please reconsider this decision? I plan to check with other small businesses outside the state of Ohio to verify their electric costs and find what organizations exists to protect them. Thank You.

QUESTION DESCRIPTION:

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve our customers and avoided implementing higher market rates. That commitment cannot be changed overnight and will last three years into the future. Now competitors, most of whom don't have investments in Ohio and many who own no assets at all, want to use AEP Ohio's plants to serve our customers using an arbitrary price as a basis for

paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio.

On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt the financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. We have requested that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

Would the Commission please take immediate and favorable action on AEP Ohio's petition?
