COMMENT DESCRIPTION:

I am writing in regards to cases 11-346-EL-SSO & 11-348-EL-SSO. I feel that in order for Ohio to have healthy electrical competition, we must provide a reasonable transition for Ohio Power to move into that direction. That being said, I am asking that you approve Ohio Power's (AEP) request for relief by approving their capacity charge amount. This is the best, and easiest, way for this company to transition to market. If this is not approved, there could be thousands of AEP jobs lost which, in turn, results in possibly millions of lost tax revenue. Do the right thing for Ohio, by approving AEP's request. Thank you for your time.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.

COMMENT DESCRIPTION:

My comment is in reference to cases 11-346-EL-SSO & 11-348-EL-SSO. It is quite simple in my mind, AEP has been a fantastic state and city steward, stepping up to the plate to help in many ways financially and beyond. In the current political climate JOBS are the key to the success for thriving communities and politicians need to do all they can to increase or create jobs...in the current situation with AEP, the goal should be to do all that can be done to keep the current jobs in Ohio. If the goal is to ADD jobs to Ohio, you can't take one step forward and two steps backward. We must first keep current jobs, then find ways to increase jobs. Please reach out to AEP and find a middle ground so that AEP can compete in a fair and appropriate manner and KEEP AEP JOBS in Ohio.

COMMENT DESCRIPTION:

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve our customers and avoided implementing higher market rates. That commitment cannot be changed overnight and will last three years into the future. Now competitors, most of whom don't have investments in Ohio and many, who own no assets at all,

want to use AEP Ohio's plants to serve our customers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I ask that the Commission please reconsider its February 23rd decision to revoke the approval of AEP's ESP plan, which the Commission had originally approved on December 14th. Please consider AEP's request that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

The Commission's decision has an enormous impact not only on our industry but on so many families in Ohio that receive power from AEP and that work in the power industry. Simply said, if the Commission's does not consider changing its decision, jobs will be lost and families will be devastated.

Thank you for your consideration.

COMMENT DESCRIPTION:

Case nos. 11-346-EL-SSO & 11-348-EL-SSO - I would like to make a plea to the PUCO to correct the terrible decision for AEP's ESP plan that they revoked. There are now literally thousands of jobs at stake and poised to be leaving Ohio because of this decision reversal. I understand why an electric company should be regulated, but it also needs to be treated as if it was a private sector business. I'm one of many employees that work hard to make a good company and the decisions made in this case are damaging a good company. Do whats fair. Treat this as if it were your business.

COMMENT DESCRIPTION:

As a customer and employee of AEP Ohio, I urge the Commission to settle this case with AEP by looking at the facts. Your recent rulings are very detrimental to AEP and in turn, the state of Ohio and the communities they serve. Your actions foster distrust and a lack of credibility for the Commission. Why would anyone make investments in Ohio when one never knows when the rug will get pulled out from underneath them? AEP is committed to what is fair to the company and customers. Please do the same!

COMMENT DESCRIPTION:

I request my comment to be docketed in case number 11-346-EL-SSO and 11-348-EL-SSO. American Electric Power has been a low cost, reliable electric supplier for my family for many years. They have been negotiating in good faith with all intervening parties. To move toward market based prices that is good for OHIO, you must act swiftly to provide a short term solution. Their request to set the capacity rate to \$255/MWday until a final ESP is negotiated would be a

fair interim solution to move forward without irreparable harm to their AEP Ohio generating business. This will allow for more time, for an ESP to be negotiated with all intervening parties. Many jobs are at stake as you weigh your options. I am an AEP Ohio employee, as well as a long time customer, and my family's future in Ohio depends on you to take action. Thanks for your time and consideration!

Sincerely, Dale R. Henry

COMMENT DESCRIPTION:

I am an employee of AEP, and understand through the Columbus Dispatch and AEP that the Ohio PUCO is going to financially penalize AEP for PUCO's recent decision making process.

The Ohio PUCO board needs to do their job and properly and thoroughly evaluate decisions BEFORE they are implemented. How can any business trust the PUCO when the PUCO reverses

a decision shortly after it is put in place?

Is a goal of the Ohio PUCO to cause a utility to be bought out or cause immediate and undue financial distress? Or is the Ohio PUCO's goal to provide reliable electric power at a reasonable cost to the citizens of Ohio?

COMMENT DESCRIPTION:

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities have. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve it's customers and avoided implementing higher market rates. That commitment cannot be changed overnight and is scheduled to last three years. Now competitors, most of whom don't have investments in Ohio and many who own no assets at all, want to use

AEP Ohio's plants to serve it's customers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, will have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investments in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I do believe that competitive electricity markets can work for Ohio. I ask for a fair transition to market for AEP that includes regulatory certainty so that all Ohioans can be successful. AEP Ohio has committed to file a modified Electric Security Plan (ESP) with the PUCO by the end of March that will outline a path toward this goal.

I ask that you to commit to an honest effort to that end.

Rick Heaberlin

COMMENT DESCRIPTION:

Please have my comments docketed in case nos.11-346-EL-SSO & 11-348-EL-SSO.

The PUCO's mission is "to assure all residential and business consumers access to adequate, safe and reliable utility services at fair prices, while facilitating an environment that provides competitive choice." How is fair that large industrial electric users should supplement smaller

businesses, churches, schools and residential customers? The fair approach would be that everyone, no matter the size, should pay for the amount of electricity that they use and they should pay for their fair share of the cost to produce and deliver that electricity. If the consumer does not like their electricity bill then they should find ways to reduce their use of electricity. How does the PUCO facilitate an environment that provides competitive choice when they force AEP to have an extremely low per megawatt-day charge, thus allowing other utilities to cherry-pick AEP's customers and put AEP in a position where there is nothing that AEP can do about it. That is not competitive that is a recipe for monopoly which is the exact opposite of a competitive market. The PUCO needs to evaluate their mission statement and their purpose if they are going to continue to make hasty, radical decisions that affect all consumers and the utilities that they represent.

The PUCO states that their mission is accomplished in a list of ways of which the following are two of those ways: "ensuring financial integrity and service reliability in the Ohio utility industry" and "monitoring and enforcing compliance with rules and statutory protections against deceptive, unfair, unsafe and anti-competitive utility practices". What the PUCO did and what the PUCO states their mission is and how it is achieved are two totally different things.

With this being said, I feel that the PUCO was out of line with their decision made on February 23rd to throw out AEP's rate plan that had already been approved by the PUCO. This was not a rate plan that was all one sided for AEP, it was a rate plan that had been heavily negotiated by AEP, the PUCO and multiple companies and groups for months. This very rate plan, the negotiated rate plan, was approved by the PUCO in December. The chairman of the PUCO, Todd Snitchler, stated "We need to revisit our decision to make sure we get it right". My questions for Todd and the PUCO are: What were all of you doing during 2011 when AEP was going through their proposed rate plan? What were you doing during all of the negotiations that took place? And Why would you approve a rate plan if you were not sure it was right and fair to begin with? While the PUCO may think that their decision was in the best interest of the consumer, they are wrong, as a competitive electricity marketplace in Ohio requires many strong electricity providers, all that the PUCO has done is put AEP at a disadvantage in the market place by eliminating competitive utility practices. While I do not like to see my electricity bill increase, I do understand that the costs for AEP to produce electricity has increased and thus the reason for AEP to request relief. One cannot expect AEP to absorb all of the increase, as basic economics will tell you that a business that is unable to make a profit will not be a business very long. AEP needs to be able to pass their cost (and a fair rate of return on their investments) onto the consumers who use the electricity that AEP provides. If AEP were to leave Ohio and sell their Ohio assets to a competitor the rates in Ohio would increase by a lot more than what the AEP rates would have ever been.

The PUCO needs to reinstate AEP's rate plan as approved previously and allow AEP to continue to provide its customers with affordable and reliable electricity.

Case No. 11-346-EL-SSO & 11-348-EL-SSO Please docket this comment with the above case numbers. Hello. My name is Ashlie Hubbard. I am a AEP customer and contracted employee. I would like to start off by thanking you for your continuous support. The PUCO has been very diligent in providing a voice for Ohioans. I hope that will continue far into my children's future. I want to encourage the PUCO to take action on AEP Ohio's petition. I am going to be honest with you. I just started working within AEP a month ago, and have witnessed first hand why AEP is

such a strong company. It is simple... Keep the lights on! We are doing whatever we can to keep our customer's lights on. When I say we, I mean it, there isn't one individual in the office or out in the field that isn't giving 100% to make sure when Ohio customers go home at night they have power. It is an honor to work amongst these individuals. I fear that if there isn't action on this I/others may not have the opportunity to help keep the lights on anymore. A smooth transition to a final approved Electric Security Plan is crucial not only to AEP but to Ohio familys. Thank you for your time.

COMMENT DESCRIPTION:

You're Killing us!!!!!! Stop the madness.

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost

power plants to serve our customers and avoided implementing higher market rates. That commitment cannot be changed overnight and will last three years into the future.

Now competitors, most of whom don't have investments in Ohio and many who own no assets at all, want to use AEP Ohio's plants to serve customers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I believe competitive electricity markets can work for Ohio. AEP has asked for a fair transition to market that includes regulatory certainty so all Ohioans can be successful. On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. AEP has requested that the Commission set the capacity charge alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

Please take immediate and favorable action on AEP Ohio's petition.

COMMENT DESCRIPTION:

To whom it may concern:

I understand that you recently revoked the AEP ESP for the 2012 - 2015 timeframe. It is very understandable that small businesses and schools were not treated fairly in the agreement. However, since the ENTIRE ESP has been revoked, you have in essence exposed AEP's jugular

in Ohio to First Energy and other utilities in the state.

I urge you to immediately respond to AEP Ohio's recent petition. Without the approval of this petition, it is very probable that AEP will lose hundreds of thousands of customers while negotiations are heard around the new ESP that AEP will file later this month. If you don't approve this petition, there could be dire consequences for the future of electric competition within the state of Ohio.

Again, I urge you to put a temporary plug in this gaping hole while an overall solution can be figured out in the new ESP. Even though customers may see a negative consequence in the short term by putting in this temporary solution, it will definitely lead to much more future benefit as AEP moves to a competitive model in Ohio. Thank you for your time, and I wish you all luck in your endeavors.

Sincerely,

Stephen Payne

COMMENT DESCRIPTION:

PLEASE ACCEPT THESE COMMENTS AND DOCKET IN CASES NUMBERS: 11-346-EL-SSO AND 11-348-EL-SSO

Since the passage of SB3, the policy of the state of Ohio has been to encourage competitive service for electric generation for consumers.

At the initiations of 'deregulation', AEP Ohio rates were substantially below 'market' prices -- wholesale market prices that could be secured for serving retail customers through a CRES provider. During this time, AEP Ohio could have sought to 'flash-cut' to selling their generation at market rates, maximizing their profits at the expense of their customers that would be left to find the best possible prices from the market. However, negotiating in good faith with the PUCO and customer groups, AEP Ohio sought to find a compromise solution that would allow it to make a fair rate of return on its generation, while still offering attractive rates for customers. AEP Ohio 'did the right thing' by working cooperatively to find win-win outcomes for all involved.

Recent developments have cause market prices to fall below those able to be offered by AEP Ohio. Substantial efforts were made by the Company to work with the PUCO staff and a wide range of stakeholders to find a reasonable compromise through an orderly transition timeframe. The impacts of such changes were to be difficult for AEP Ohio, yet manageable. The PUCO agreed with such compromise. Then abruptly changed its decision, bowing to public and political pressure. And to further exacerbate the issue, some unyielding parties now want to 'flash cut' to market rates, with AEP Ohio capacity being used to serve customers.

The situation is untenable for AEP Ohio. With the current impacts of the decision, AEP Ohio would make dramatic reductions in employment and investment in the State. And the level of risk introduced to utility operations in the State by this decision is already spooking the financial markets, that will ultimately lead to further increases in financing costs, which will ultimately be borne by customers. The many statements of shock by market analysts characterizing the recent PUCO decision have been spot-on.

I am requesting that the PUCO consider the conditions under which it is making its decisions in the above cases, and simply 'do the right thing' by finding a compromise situation that can be a win-win outcome for the parties involved. While short-term thinking may be politically expedient, the Commission has the responsibility to ensure that its decisions are deliberate, fair to all parties, and in the best long-term interests of the public.

COMMENT DESCRIPTION:

My comments are regarding case nos. 11-346-EL-SSO & 11-348-EL-SSO.

The recent "emergency" ruling that revoked the ESP plan that AEP had in place was very disheartening. The plan put in place was agreed upon by the majority of parties involved. This

decision to harm AEP's business is a slap in the face to the hard working people of the company. AEP employs thousands of people in this state and is not making unreasonable requests.

A transition to a competitive market system will bring change. This change should not just be beneficial for one particular class of customers. AEP's customers enjoy a good rate system. However, the rates should not be set in a manner that harms the commercial viability of the producer.

If this state is going to proceed down the road of a competitive market system, then the consumers of this state need to be made aware of the changing environment with respect to declining subsidies and the costs associated with choosing an alternative provider. It's unjust to field some complaints from a customer class and reverse rulings without true process.

COMMENT DESCRIPTION:

I am contacting PUCO today for the first time in response to the heightened news coverage regarding the situation of electricity concerns in Ohio. By all means, I find it to be horrible that peoples rates can be raised so high. On the same token, even as average citizens, our large family of 8 can fully grasp the concept that no improvement or act comes without a cost. Some costs are more significant than others. I cannot imagine the millions that have been and are being spent to upgrade the power plant systems that keep our electricity on. In support with the daily demand and issues that must need to be addressed, I can only imagine how much additional pressure

environmental groups must add to this dilemma. The fact of the matter is, you can't get everything for nothing. As a public, the customers must realize that things will need to be raised in order to meet THEIR requests and demands. Otherwise, we can face huge job losses in this country and power outages and issues of uncomparable proportions. There has got to be a happy medium here to cover the expenses that AEP has in order to provide us with something we take for granted on a daily basis. But yet, also not make the customers feel as though they are so put off by the rate hike, that they cannot fathom everyday finances any longer. Please work with the community as a whole to come to a fair and good decision for everyone.

COMMENT DESCRIPTION:

I'm providing a comment on the rate case for AEP. While I can understand the displeasure at the huge increases and personally think that max caps should have been instaled as part of the rate increases limiting increases to not more than 25% each year, the damage is done. Outcries in costs have prevailed and the rates have been recended. The issue of capacity charges has not, and is being decieded soon. Not allowing AEP to charge back thier cost to other competors is neither right or just. I support AEP's initiative to have the capacity charges changed to protect AEP assest while a solution to deregualtion is thoughtly explored.

COMMENT DESCRIPTION:

I am an AEP employee. in 2008 I was laid off from my first job, not even 9 months from the date I graduated from university. I found a position with AEP shortly afterwards. I chose to work for AEP because of their values. I was especially intrigued with how much they give back to the community. I understand that Ohio residents and their financial well being are priority, but in the attempt to bring jobs to Ohio through the competitive energy market it has put AEP employees jobs at risk. I hope that you can come to a quick and reasonable understanding in the matters at hand.

COMMENT DESCRIPTION:

AEP should be allowed to have an equal ability to do bussiness in Ohio as a competitor and not have it's hands tied to create an unequal disadvantage.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for

investors, and long term price instability for electric service.

I do believe that competitive electricity markets can work for Ohio. AEP is asking for and should receive a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. AEP Ohio will file a modified Electric Security Plan (ESP) with the PUCO by the end of March that will outline a path toward this goal.

COMMENT DESCRIPTION:

The PUCO needs to provide a certain and predicatable transition to market for AEP Ohio. Regulatory balance in finding this path is critical to insure Ohio can sustain economic growth and attract investment. AEP and AEP Ohio contribute more than \$3 billion dollars each year in taxes, wages and purchased services, not to mention the capital investment in generation assets that we are now suppose to allow our competitors to use at greatly reduced prices. I understand competitive markets, but I also understand stranded equity. AEP Ohio needs time to make the transition if you do not want to bankrupt the company and minimize reliability investments to simply keeping the lights on.

COMMENT DESCRIPTION:

I am writing to ask you to reconsider the change you made to AEP's regulatory recovery in the past weeks. If AEP is not able to recover the costs that they were expecting, this may mean huge impacts to my family and our well being.

I would like to have the option of choosing my electric power provider and AEP should have the

right to depreciate assets and transition to an unregulated environment as other companies have.

Please make a quick decision and settle the issue with AEP.

Thank you,

Charles Blankenbiller

COMMENT DESCRIPTION:

As an AEP employee AND customer, I ask that you please take immediate and favorable action on AEP Ohio's petition. AEP requires the rate it desires to maintain the power plants in a safe and reliable fashion. AEP would also like to continue its charitable giving which is invaluable to the community of central Ohio.

Thank you for reading this comment.

COMPLAINT DESCRIPTION:

concerning case # 11-346-EL-SSO.

When Making your determination on the ESP rates AEP has requested, Please keep in mind that we in Appalachia are an impoverished area. My own personal income in the past 7 years has dropped 50% and I cannot afford any increase in utility costs.

Rather please consider mandating all utility providers in Ohio to lower rates to affordable levels in each community they serve, based on average salaries for the area. Otherwise, what choice is there but for us to shut down our home services and resort to candlelight and wood heat?

COMMENT DESCRIPTION:

Case nos. 11-346-EL-SSO & 11-348-EL-SSO. Dear Sir, To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service. Please respond favorably to the AEP proposals before you so they can be competitive in the Ohio marketplace. Thank You.

COMMENT DESCRIPTION:

I would like my comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

I ask that the commission take immediate and favorable action on AEP Ohio's petition. Without action by the PUCO to give AEP the breathing space and rates it needs to continue to do business, electricity competition in the state could be harmed for years to come.

COMMENT DESCRIPTION:

Comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO. The recent ruling to have AEP reduce the rates, is hurting the company as well hurting the economy in Ohio. Having AEP sell their generation on the open market at a reduced rate is only going to make AEP less competitive, and may cause them to leave the state, which will cost many people jobs. If people lose their jobs, the economy in Ohio suffers. People will not be able to afford to the cost of living! Please reconsider AEP cost of distribution.

COMMENT DESCRIPTION:

As an AEP employee, I'm one of the people reeling from the 2/23 ruling. Today's supposed to be the big day we learn our fate, but that's a scary place to be. When the fate of an honorable company is so dependent upon a ruling from an agency we can no longer rely upon to be predictable, something just seems wrong.

You've proven your power, and we know the leash is tightly around our neck. Please prove your common sense equally convincingly, and let us move toward truly level competition.

COMMENT DESCRIPTION:

I want my comment to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO. I am not in favor of deregulation. It didn't work well in California and I don't think it will work well here in Ohio. That being said, The PUCO should support AEP's newly proposed Electric Security Plan. It is fair and reasonable.

COMMENT DESCRIPTION:

The recent news regarding AEP and their formally agreed upon rate increase (funny - it's now also "formerly") has me a bit puzzled. How can an agreement be reached and so quickly rescinded? Did the PUCO have their collective fingers crossed? How can your organization stand in the way of fair business practices and leave AEP grasping at straws as to how to maintain a competitive marketplace? Did it take 1000 complaints from people that knew their electricity rates were going to go up? Do you think receiving 1001 complaints about the PUCO backing out of an agreement will reverse your stance? Flip-flop, flip-flop....
