Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Ms. Tanya Fetcho

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Mrs. Nadine Hudak

Mrs. Ann Craig

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly. I am not currently a First Energy customer, but I know that the rates that they charge and the requirements they accommodate will have an impact on rates and requirements of other utility companies. Let's use this opportunity to move our country toward more efficient and beneficial ways to produce electric energy.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Mrs. Ann Craig

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Mr. Robert Monahan

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

First Energy is a poor track record of implementing both state and federal law. There disregard for both law and public input in general needs to be stopped. The public absolutely needs to be able to review their electric security plan to guarantee there plan is going to provide clean reliable energy, and it complys with state and federal law. They have dragged there feet on implementing SB 221 and have a history of avoiding efficiency and lower cost renewables.

We want the opportunity to review their ISP

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Dr. Nicholas Sperelakis

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Ms. Cheryl Johnson

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,

FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Miss Sarah James

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Ms. Sue Lonsway

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Jules Kaimi
