Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

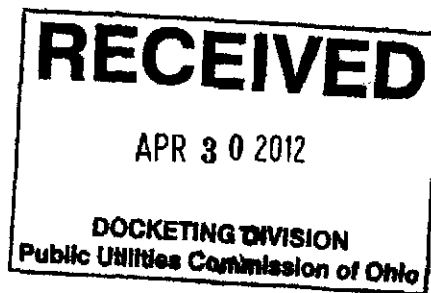

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Ms. Kathy Sizemore

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Mrs. Sally Khalil

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Mr. Robert March

FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Ms. Kathleen Koviak

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Mr. Paul Koepke

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Dr. Park Goist

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As we have seen in Japan, even if costs are higher initially, it's better to have clean energy and to make the utmost of energy efficiency. Risk assessment can be wrong and the costs are astronomical when disasters happen like that in Japan.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Mr. Daniel Hamm

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,

We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Mr. Gordon Krueger

Subject: Pump the Brakes on First Energy - Ensure a Fair, Public, Open Review

Dear PUCO Commissioners,

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

It seems pretty apparant to Ohioans that Big Oil, Gas, and Coal are friends of Governor Kasich and many of the members on the PUCO board. Why else would they be able to raise rates to pay for upgrades and their profits without fear. It is time to stand up for all Ohioans who are struggling.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
Mr. John Horkulic

As a utility customer, I am asking you to hold FirstEnergy accountable to the people it serves by providing full opportunity for public review and consideration of the company's electric security plan. FirstEnergy recently presented the Commission with an unacceptable request to bypass public processes for consideration of its plan. The Commission should respond with a resounding 'no'.

As the old saying goes, "haste makes waste." Without a fair, deliberative hearing, consumers and experts will not have enough time to scrutinize the plan thoroughly. We may be leaving a lot of opportunities for clean, cheap energy efficiency on the table simply because we're not taking enough time to look for them.

Protecting consumers means taking your time to make sure the job is done right, not just quickly.

Unfortunately, we live in a society where ruthless corporate interests often will do and say whatever they have to in order to increase their short-term quarterly profits. These actions often cause long-term damage to health and safety. We need public interests such as PUCO to stand up for the long-term health, safety and even economic interests of the communities.

FirstEnergy's electric security plan will affect hundreds of thousands of customers in Ohio and will determine rates that FirstEnergy's customers will be required to pay for several years. It is essential that advocates for the public have the opportunity for full review of the plan's impacts.

I am relying on the Public Utilities Commission to protect me and my family. I ask you to say NO to FirstEnergy's effort to bypass full public consideration of its plan.

Sincerely,
David Berenson
