Dear Chairman Snitchler:

As a customer of AEP, I urge you to reject its proposal to limit my ability to save money on my electric bill by switching to another electric supplier.

By imposing excessive capacity fees on other suppliers, AEP's proposed Electric Security Plan would harm competition so it can protect its profits on the backs of customers like me. While nearly 2 million Ohioans are shopping every month with competitive retail suppliers, AEP is the only utility in Ohio that wants to place artificially inflated capacity charges on suppliers, reducing savings for customers.

We all know competition works. That's why we always shop for lower prices. We should let competition work for electricity too.

Please reject or modify AEP's revised Electric Security Plan and preserve my right to shop to save money on my electric bill.

Dear Chairman Snitchler:

As a customer of AEP, I urge you to reject its proposal to limit my ability to save money on my electric bill by switching to another electric supplier.

By imposing excessive capacity fees on other suppliers, AEP's proposed Electric Security Plan would harm competition so it can protect its profits on the backs of customers like me. While nearly 2 million Ohioans are shopping every month with competitive retail suppliers, AEP is the only utility in Ohio that wants to place artificially inflated capacity charges on suppliers, reducing savings for customers.

We all know competition works. That's why we always shop for lower prices. We should let competition work for electricity too.

Please reject or modify AEP's revised Electric Security Plan and preserve my right to shop to save money on my electric bill.

Dear Chairman Snitchler:

As a customer of AEP, I urge you to reject its proposal to limit my ability to save money on my electric bill by switching to another electric supplier.

By imposing excessive capacity fees on other suppliers, AEP's proposed Electric Security Plan would harm competition so it can protect its profits on the backs of customers like me. While nearly 2 million Ohioans are shopping every month with competitive retail suppliers, AEP is the only utility in Ohio that wants to place artificially inflated capacity charges on suppliers, reducing savings for customers.

We all know competition works. That's why we always shop for lower prices. We should let competition work for electricity too.

Please reject or modify AEP's revised Electric Security Plan and preserve my right to shop to save money on my electric bill.

While nearly 2 million Ohioans are shopping every month with competitive retail suppliers, AEP is the only utility in Ohio that wants to place artificially inflated capacity charges on suppliers, reducing savings for customers.

We all know competition works. That's why we always shop for lower prices. We should let competition work for electricity too.

Please reject or modify AEP's revised Electric Security Plan and preserve my right to shop to save money on my electric bill.

Tammy,

The customer would not have gotten a paper application this program year because she went into the agency on 2/14/2012 and applied for Emergency HEAP and reverified for PIPP. When customers go to the agency the application is completed at that time. The customer was missing documentation which why her application was not processed on the exact day that she went in. It looks like the customer has submitted all the required documents, but did she pay the \$50.00 co-pay to get the PIPP re-set? I will check with the CAA to see if the customer was given the terms of agreement.

Hello Tonja,

This customer insist the CAA didn't give her the application while she was on the premise to fill out? In Feb 2012 they gave her the application to fill out and return it?

As of March 26th, 2012 customer insist she went back to CAA and they gave her an application to take home and fill out?

Is there anything in Ocean that can assist me in helping straighten this customer account out?

What do I need to ask of TE?

Any suggestions you can provide is greatly appreciated.

Case file no. TJOH05021292

Customer states she went to the community action agency in Feb 17, 2012 the said they would send the application in the mail, she put her income into the computer and a utility bill. As of March 6, 2012 she went back into the company and she gave her the new utility bill and she said she would send her an application and she didn't get it and called the ODOD and would call the company and stop the disconnect and would find out what happened with the application.

The she rec'd a letter some where the end of March or first of April saying the pip amount would be \$10 Ohio Edison and \$10 Cgo. She said the Community Action Agency didn't give her an application when she was at the appointment so at this time she will be sending the PIP application signed and sent back to the HEAP office. She said she have paid her \$10 a month every month.

She said the company is threaten to disconnect her service she needs to pay \$674.33 by 5-4-12 or the service will be shut off? I ask is the amount her old missed pip payments? she is not for sure? I ask if she tried to get assistance and Community Action Agency provided the \$138 amount as of 3-6-12 and she thought that was the \$175 amount?

Please assist her with getting this rectified and avoid a shut off, she said she will be working to pay as much as she can on the \$600 amount. While PUCO investigate her concerns.

Please investigate

Dear Chairman Snitchler:

As a customer of AEP, I urge you to reject its proposal to limit my ability to save money on my electric bill by switching to another electric supplier.

By imposing excessive capacity fees on other suppliers, AEP's proposed Electric Security Plan would harm competition so it can protect its profits on the backs of customers like me. While nearly 2 million Ohioans are shopping every month with competitive retail suppliers, AEP is the only utility in Ohio that wants to place artificially inflated capacity charges on suppliers, reducing savings for customers.

We all know competition works. That's why we always shop for lower prices. We should let competition work for electricity too.

Please reject or modify AEP's revised Electric Security Plan and preserve my right to shop to save money on my electric bill.
