**In re: 11-346-EL-SSO, 11-348-EL-SSO
11-349-EL-AAM, 11-350-EL-AAM**

Dear Sir/Madam:

Please find attached the DIRECT TESTIMONY AND EXHIBITS OF STEPHEN J. BARON and LANE KOLLEN on behalf of the OHIO ENERGY GROUP for filing in the above-referenced matters.

Copies have been served on all parties on the attached certificate of service. Please place this document of file.

Respectfully yours,

David F. Boehm, Esq.
Michael L. Kurtz, Esq.
Kurt J. Boehm, Esq.

TABLE OF CONTENTS

I. QUALIFICATIONS AND SUMMARY	1
II. PROPOSED RIDER IRP-D	4

I. QUALIFICATIONS AND SUMMARY

Q. Please state your name and business address.

A. My name is Stephen J. Baron. My business address is J. Kennedy and Associates, Inc. ("Kennedy and Associates"), 570 Colonial Park Drive, Suite 305, Roswell, Georgia 30075.

Q. What is your occupation and by who are you employed?

A. I am the President and a Principal of Kennedy and Associates, a firm of utility rate, planning, and economic consultants in Atlanta, Georgia.

Q. Please describe briefly the nature of the consulting services provided by Kennedy and Associates.

A. Kennedy and Associates provides consulting services in the electric and gas utility industries. Our clients include state agencies and industrial electricity consumers. The firm provides expertise in system planning, load forecasting, financial analysis, cost-of-service, and rate design. Current clients include the Georgia and Louisiana Public Service Commissions, and industrial and commercial customer consumers throughout the United States. My educational background and professional experience are summarized on Baron Exhibit __ (SJB-1).

Q. On whose behalf are you testifying in this proceeding?

A. I am testifying on behalf of The Ohio Energy Group ("OEG"), a group of large industrial customers of Ohio Power Company ("AEP Ohio" or "the Company").

1 The members of OEG who take service from the Company are: AK Steel
2 Corporation, Aleris International, Inc., Amsted Rail Company, Inc.,
3 ArcelorMittal, USA, BP-Husky Refining, LLC, E.I. DuPont de Nemours &
4 Company, Ford Motor Company, GE Aviation, Linde, Inc., O-I aka Owens-
5 Brockway Glass Container, Inc., Praxair Inc., Procter & Gamble Co., RG-Steel,
6 The Timken Company and Worthington Industries.

7
8 **Q. Have you previously presented testimony in any of the Company's cases in**
9 **Ohio?**

10 A. Yes. I have previously testified in Case Nos. 85-726-EL-AIR, 07-63-EL-UNC, 08-
11 917-EL-SSO and 08-918-EL-SSO (the Company's 2008 initial ESP cases) and in
12 11-0346-EL-SSO, the Company's 2011 ESP case. I have also testified in numerous
13 AEP cases in Kentucky, West Virginia, Virginia, Louisiana, Indiana and before the
14 FERC.

15
16 **Q. Have you previously presented testimony in Standard Service Offer cases in**
17 **Ohio?**

18 A. Yes. I have testified in a number of Electric Security Plan and Market Rate Offer
19 cases involving the FirstEnergy Companies and Duke Energy Ohio, in addition to
20 the AEP cases cited above. This includes Case Nos. 08-935-EL-SSO, 08-936-EL-
21 SSO, 09-906-EL-SSO and 10-2586-EL-SSO.

22
23 **Q. What is the purpose of your testimony?**

1 A. I provide a recommendation regarding whether AEP Ohio's proposed Rider IRP-D
2 is reasonable. In addition, I propose a more appropriate mechanism by which AEP
3 Ohio can recover the incremental costs associated with the interruptible rate
4 program.

5
6 **Q. Would you please summarize your testimony?**

7 A. Yes. I recommend that the Commission approve AEP Ohio's proposed Rider IRP-
8 D with an interruptible credit of \$8.21/kW-month. Rider IRP-D is reasonable,
9 provides a valuable resource for meeting the peak demand reduction requirements of
10 S.B. 221, was uncontested and approved in the earlier portion of this case, facilitates
11 economic development in the state, and provides an additional resource by which
12 the Company can meet its capacity obligations as a member of PJM Interconnection,
13 L.L.C. ("PJM"). Further, the interruptible credit proposed by AEP Ohio is
14 considerably lower than interruptible credits approved for other Ohio utilities.

15
16 However, I do propose one important modification to AEP Ohio's Rider IRP-D
17 proposal. The Commission should reject AEP Ohio's attempt to make the increased
18 interruptible credit contingent upon approval of the proposed Retail Stability Rider
19 ("RSR") since there are more appropriate mechanisms by which AEP Ohio can
20 recover costs associated with that credit. Rather than recovering the incremental
21 costs associated with the increased interruptible credit through the proposed RSR, as
22 AEP Ohio proposes, the Commission should require the Company to recover those

1 costs through its Energy Efficiency/Peak Demand Reduction Cost Recovery
2 (“EE/PDR”) Rider.

3
4 The EE/PDR Rider is a more appropriate mechanism by which AEP Ohio can
5 recover the type of costs associated with interruptible load. Because interruptible
6 load is a form of energy efficiency/peak demand reduction, it is reasonable for the
7 Commission to require AEP Ohio to recover any incremental costs associated with
8 the increased interruptible credit through the EE/PDR Rider. There is no principled
9 basis for allowing AEP Ohio to recover costs associated with such load through the
10 RSR, which is a controversial concept that may not be approved. Accordingly, the
11 Commission should require AEP Ohio to recover the incremental costs associated
12 with the interruptible rate program through the EE/PDR Rider, rather than through
13 the RSR.

14
15 **II. Proposed Rider IRP-D**

16
17 **Q. Have you reviewed AEP Ohio’s proposed Rider IRP-D?**

18 A. Yes. As described by AEP Ohio witness David Roush, AEP Ohio proposes to
19 restructure its current Interruptible Power–Discretionary rate schedule as Rider
20 IRP-D. The credit under Rider IRP-D would be the current base generation rate
21 demand charge discount under Schedule IRP-D relative to Schedule GS-4
22 adjusted upward to reflect the roll-in of the Environmental Investment Carrying
23 Cost Rider. Upon approval of the RSR, AEP Ohio proposes to increase the IRP-

1 D credit to \$8.21/kW-month. If approved, this increased interruptible credit
2 would reduce base generation revenues. This is the same interruptible credit as
3 was contained in the September 7, 2011 Stipulation and Recommendation in the
4 earlier segment of this case. AEP Ohio proposes to recover the incremental costs
5 associated with this interruptible credit through the RSR. Rider IRP-D is limited
6 to customers who can interrupt their usage to a predetermined firm level in 10
7 minutes. It is also limited to 525 mw of existing customer load. However, loads
8 of new customers locating within the Company's service area or load expansions
9 of existing customers may qualify as part of an economic development or
10 competitive response incentive.

11
12 **Q. Do you recommend that the Commission approve AEP Ohio's proposed Rider**
13 **IRP-D?**

14 **A** Yes. Rider IRP-D is reasonable and should be approved by the Commission. In the
15 earlier portion of this case, AEP Ohio's proposed Rider IRP-D, with an interruptible
16 credit set at the same \$8.21/ kW-month level, was uncontested and was ultimately
17 agreed to by numerous Parties in the September 7, 2011 Stipulation and
18 Recommendation and approved by the Commission on December 13, 2011. That
19 approval was revoked two months later, but the interruptible rate program was not
20 cited by the Commission in any way as a cause of the revocation of the Stipulation.

21
22 Additionally, counsel has advised me that R.C. 4928.02(N) says that the state policy
23 of Ohio is to facilitate the state's effectiveness in the global economy. I believe that

1 Rider IRP-D is consistent with this policy. Rider IRP-D enhances the national and
2 international competitiveness of those energy intensive customers who can utilize
3 power with a lower level of reliability. Providing an opportunity for lower electric
4 rates to such customers is one mechanism by which Ohio can attract and retain those
5 customers, benefitting the state's economic development.

6
7 **Q. Are you aware of any specific economic development opportunities that would**
8 **be enhanced by approval of Rider IRP-D?**

9 A. Yes. RG Steel Wheeling owns the electric arc furnace operations that were formerly
10 known as Wheeling Pittsburgh Steel. That steel production facility is currently shut
11 down and has not operated since April 2009. Electric arc furnace operations are
12 particularly appropriate for interruptible service because they can reduce substantial
13 amounts of electricity consumption very quickly. Rider IRP-D would not ensure the
14 restart of RG Steel Wheeling, which would require an investment of up to \$100
15 million, but it would increase the probability. The restart of this facility could result
16 in creating 518 steel worker jobs and 51 salaried positions at an average annual
17 salary plus benefits of \$100,000 per employee. The restart of this facility would also
18 create a significant number of indirect jobs and increase state, local and school tax
19 revenues. Finally, this facility is located in an economically depressed part of Ohio
20 so its economic impact would be particularly welcome.

21
22 **Q. Does Rider IRP-D provide other benefits?**
23

1 A. Yes. The interruptible program provides an additional demand response resource
2 that AEP Ohio can use to meet its PJM Fixed Resource Requirement (“FRR”)
3 obligations. Further, AEP Ohio can use the additional capacity made available
4 through the interruptible program to bid into auctions once AEP Ohio participates in
5 the PJM Reliability Pricing Model (“RPM”). Finally, Rider IRP-D is a peak demand
6 reduction resource under R.C. Section 4928.66.

7
8 **Q. Is the proposed interruptible credit reasonable compared to the interruptible**
9 **credit of the other Ohio utilities?**

10 A Yes. The level of the interruptible credit proposed by AEP Ohio, \$8.21/kW-month,
11 is considerably lower than similar credits for Toledo Edison, Ohio Edison and
12 Cleveland Electric Illuminating Company (collectively, “FirstEnergy”), which each
13 provide credits of \$10/kW-month to interruptible customers. Thus, even after
14 increasing AEP Ohio’s current interruptible credit, the resulting interruptible credit
15 would still be below a level already approved by the Commission.

16
17 Additionally, the terms and conditions under AEP-Ohio’s interruptible rate program
18 are generally more restrictive than FirstEnergy’s program. During emergency
19 situations, AEP-Ohio’s customers must be able to reduce their usage to a
20 predetermined firm level (in other words interrupt) with only 10 minutes notice.
21 During emergency situations on the FirstEnergy system customers are given two
22 hours notice. Under FirstEnergy’s interruptible program, FirstEnergy can interrupt
23 customers for economic (non-emergency) reasons when the PJM day-ahead LMP

1 reaches a certain level. Under proposed Rider IRP-D, AEP Ohio can interrupt
2 customers on an economic (non-emergency) basis for any reason. Consequently,
3 proposed Rider IRP-D also increases system reliability by providing the Company
4 substantial flexibility to interrupt customers compared to the leeway granted to
5 FirstEnergy.

6
7 **Q. Taking all of these reasons into account, what is your recommendation**
8 **regarding AEP Ohio's proposed Rider IRP-D?**

9 A I recommend that the Commission adopt proposed Rider IRP-D with an interruptible
10 credit of \$8.21/kW-month. However, the Commission should make one important
11 modification.

12
13 **Q. What modification to AEP Ohio's proposal do you recommend?**

14 A I recommend that the Commission alter the method by which AEP Ohio can recover
15 the incremental costs associated with its interruptible rate program.

16
17 **Q. Please describe AEP Ohio's proposal regarding the recovery of incremental**
18 **costs associated with the interruptible credit?**

19 A. The testimony of David Roush indicates that AEP Ohio proposes to recover the
20 incremental costs associated with the interruptible credit under Rider IRP-D through
21 proposed Rider RSR. In fact, AEP Ohio appears to make its proposal to increase
22 the interruptible credit to \$8.21/kW-month expressly contingent upon Commission
23 approval of the RSR.

1
2 **Q. Do you agree with AEP Ohio's proposal for recovering the incremental costs**
3 **associated with the interruptible credit through the RSR?**

4 A. No. The Commission should not allow AEP Ohio to recover those incremental
5 costs through Rider RSR. There is no principled basis for AEP Ohio to recover
6 such costs through the RSR, which is a controversial concept that may not be
7 approved. In fact, under the Stipulation and Recommendation filed in this case on
8 September 7, 2011, AEP Ohio planned to recover the incremental costs associated
9 with the interruptible credit through the Economic Development Rider. AEP
10 Ohio has not shown that recovery of the incremental costs through the RSR is
11 necessary or appropriate in this case.

12
13 Further, the Commission should reject AEP Ohio's attempt to make the increased
14 interruptible credit contingent upon approval of the RSR. There is no reason to
15 link a decision regarding the appropriate level of the interruptible credit to the
16 Commission's ultimate approval of the RSR. The Commission should sever that
17 unnecessary link. It is entirely possible for the Commission to approve the
18 increased interruptible credit, as it should, while simply allowing AEP Ohio to
19 recover the incremental costs associated with that credit through a more
20 appropriate mechanism.

21
22 **Q. Do you believe that it is proper for AEP Ohio to recover the incremental costs**
23 **associated with an increased interruptible credit?**

1 A. Yes. Those incremental costs are legitimate costs that may properly be recovered
2 by AEP Ohio. My recommendation merely concerns the mechanism by which
3 AEP Ohio recovers those legitimate costs.

4
5 **Q. What mechanism do you recommend for AEP Ohio's recovery of the**
6 **incremental costs associated with the interruptible credit?**

7 A. The Commission should require AEP Ohio to recover the incremental costs
8 associated with the interruptible credit through Rider EE/PDR. One purpose of the
9 interruptible credit is to promote energy efficiency and reduce the Company's peak
10 demand as required by R.C. Section 4928.66. This purpose aligns with the purpose
11 of Rider EE/PDR. Thus, it is appropriate to require AEP Ohio to recover the
12 incremental costs associated with the interruptible credit through Rider EE/PDR.

13
14 **Q. Please summarize your conclusion.**

15 A. The Commission should approve AEP Ohio's proposed Rider IRP-D with the
16 interruptible credit of \$8.21/kW-month, but should require AEP Ohio to recover
17 the incremental costs associated with its interruptible rate program through Rider
18 EE/PDR, rather than Rider RSR.

19
20 **Q. Does that complete your Direct Testimony?**

21 A. Yes.

AFFIDAVIT

STATE OF GEORGIA)

COUNTY OF FULTON)

STEPHEN J. BARON, being duly sworn, deposes and states: that the attached is his sworn testimony and that the statements contained are true and correct to the best of his knowledge, information and belief.

EXHIBIT__(SJB-1)

OF

STEPHEN J. BARON

ON BEHALF OF

THE OHIO ENERGY GROUP

J. KENNEDY AND ASSOCIATES, INC.
ROSWELL, GEORGIA

Professional Qualifications

Of

Stephen J. Baron

Mr. Baron graduated from the University of Florida in 1972 with a B.A. degree with high honors in Political Science and significant coursework in Mathematics and Computer Science. In 1974, he received a Master of Arts Degree in Economics, also from the University of Florida. His areas of specialization were econometrics, statistics, and public utility economics. His thesis concerned the development of an econometric model to forecast electricity sales in the State of Florida, for which he received a grant from the Public Utility Research Center of the University of Florida. In addition, he has advanced study and coursework in time series analysis and dynamic model building.

Mr. Baron has more than thirty years of experience in the electric utility industry in the areas of cost and rate analysis, forecasting, planning, and economic analysis.

Following the completion of my graduate work in economics, he joined the staff of the Florida Public Service Commission in August of 1974 as a Rate Economist. His responsibilities included the analysis of rate cases for electric, telephone, and gas utilities, as well as the preparation of cross-examination material and the preparation of staff recommendations.

In December 1975, he joined the Utility Rate Consulting Division of Ebasco Services, Inc.

J. KENNEDY AND ASSOCIATES, INC.

as an Associate Consultant. In the seven years he worked for Ebasco, he received successive promotions, ultimately to the position of Vice President of Energy Management Services of Ebasco Business Consulting Company. His responsibilities included the management of a staff of consultants engaged in providing services in the areas of econometric modeling, load and energy forecasting, production cost modeling, planning, cost-of-service analysis, cogeneration, and load management.

He joined the public accounting firm of Coopers & Lybrand in 1982 as a Manager of the Atlanta Office of the Utility Regulatory and Advisory Services Group. In this capacity he was responsible for the operation and management of the Atlanta office. His duties included the technical and administrative supervision of the staff, budgeting, recruiting, and marketing as well as project management on client engagements. At Coopers & Lybrand, he specialized in utility cost analysis, forecasting, load analysis, economic analysis, and planning.

In January 1984, he joined the consulting firm of Kennedy and Associates as a Vice President and Principal. Mr. Baron became President of the firm in January 1991.

During the course of his career, he has provided consulting services to more than thirty utility, industrial, and Public Service Commission clients, including three international utility clients.

He has presented numerous papers and published an article entitled "How to Rate Load Management Programs" in the March 1979 edition of "Electrical World." His article on "Standby Electric Rates" was published in the November 8, 1984 issue of "Public Utilities Fortnightly." In February of 1984, he completed a detailed analysis entitled "Load Data Transfer Techniques" on behalf of the Electric Power Research Institute, which published the study.

Mr. Baron has presented testimony as an expert witness in Arizona, Arkansas, Colorado, Connecticut, Florida, Georgia, Indiana, Kentucky, Louisiana, Maine, Michigan, Minnesota, Maryland, Missouri, New Jersey, New Mexico, New York, North Carolina, Ohio, Pennsylvania, Texas, Utah, Virginia, West Virginia, Wisconsin, Wyoming, the Federal Energy Regulatory Commission and in United States Bankruptcy Court. A list of his specific regulatory appearances follows.
