### I. INTRODUCTION

Cultural Resource Analysts, Inc. (CRA) has conducted a cultural resources records review for the Buckeye II Wind Facility Project (Buckeye II) in Champaign County, Ohio (Figure 1). The records review includes a discussion of potential direct and indirect impacts to the preservation and continued meaningfulness of identified properties, including but not limited to potential direct effects to archaeological sites and potential visual effects to aboveground historic properties.

Champaign Wind LLC (Applicant) plans to submit a Certificate of Application to the Ohio Power Siting Board (OPSB) for the proposed Buckeye II project, Champaign County, Ohio. As specified in the OPSB's regulations at 4906-17-08(D) – Social and Ecological Data, Cultural Impact, applicants are required to identify any registered landmarks of historic, religious, archaeological, scenic, natural, or other cultural significance within five miles of a proposed wind facility. The records review and discussion of impacts presented here is designed to address the requirements of 4906-17-08(D).

Figure 1. Map Champaign County, Ohio showing Buckeye II location.

### **Definitions**

The direct Area of Potential Effects (APE) is defined as the project footprint or area of permanent *and* temporary ground disturbance associated with Buckeye II (Figure 2). The Study Area or indirect visual APE is defined as the area within a 5.0-mi (8.0-km) radius of the direct APE (Figure 2).

### Project Location and Description

The Applicant is proposing to develop, construct, own, and operate a wind-powered electric generation facility, which will consist of up to 56 wind turbine generators and associated ancillary features such as gravel access roads, electric interconnect, and an interconnection substation (the turbines and all ancillary features are referred to as the "Facility"). Each wind turbine generator will have a nameplate capacity rating of up to 3.0 MW (depending on the final turbine model selected), and the total generating capacity of the Facility is not expected to exceed 171 MW. The energy generated at the Facility will connect to the existing Urbana-Mechanicsburg-Darby 138kVTransmission Line owned by PJM Interconnection.

The proposed wind turbine sites for Buckeye II have a ground-disturbing area comprised of a 200-foot radius around a central point, or about 2.9 acres. Turbine height is estimated at 496 ft. Temporary easements for the proposed access roads are 55 feet in width, and the easements for the proposed buried interconnects are 15 feet in width. Overall, the direct APE for Buckeye II encompasses approximately 372.4 acres, based on shapefile information provided by the Applicant on February 14, 2012.

The Study Area for the Buckeye II development encompasses approximately 155, 267.5 acres in the eastern portion of Champaign County, including the city of Urbana, and small portions of northern Clark County, and western Union and Madison counties (Figure 2).

### Regulatory and Project Review Authority

This records review is designed to satisfy the requirements of Ohio Administrative Code Chapter 4906-17-08 (D) for the OPSB.

### State Authority

Ohio Administrative Code 4906-17-08(D) requires the OPSB to take cultural resources into consideration as part of the application filing requirements for wind-powered electric generation facilities. Buckeye II will be regulated by the OPSB under Chapter 4906 of the Ohio Revised Code and Chapters 4906-1 to 4906-17 of the Ohio Administrative Code. Chapter 4906-17-08(D) Cultural Impact of the OAC directs the identification of historic landmarks located within five miles of the proposed facility.

## II. RECORDS REVIEW AND IMPACT ASSESSMENT

The following resources were examined for the purposes of this records review: Ohio Historic Preservation Office (OHPO) online-GIS records for National Register of Historic Places (NRHP)-listed properties, NRHP Determination of Eligibility (DOE) properties, boundaries, Ohio NRHP the Historic Inventory (OHI), the Ohio Archaeological Inventory (OAI), Ohio Genealogical Society (OGS) cemeteries, and previous Phase I, II, and III cultural resources surveys conducted within the Study Area. Mills' (1914) Archaeological Atlas of Ohio was examined for recorded archaeological sites and Indian trails, and historic county atlases and historic USGS 15-minute and 7.5-minute topographic quadrangles were reviewed.

### Previous Cultural Resource Surveys

Eight previous Phase I cultural resource surveys have been completed within 5.0-mi (8.0 km) of the direct APE, all in Champaign County. Two of these were Phase I cultural resource surveys completed for the Ohio Department of Transportation regarding development of US 68 (Baker 1996; Mustain and Young 1997). Watkins' (2004) survey was also completed for the Ohio Department of Transportation regarding improvements to SR 56. The Weller von Molsdorff (1997) survey was for a cell tower, Addington and Clarke (1984) for Urbana City Park, Riordan and Smolek (1977) for two interceptor routes for an Urbana facility plan, and Riordan (1987) for a bikeway.

The most recent cultural resource survey was conducted by CRA in 2010-2011 in association with the Buckeye Wind Project OPSB Docket 08-666-EL-BGN (hereafter Buckeye I) in Champaign County for Buckeye Wind LLC (Heavrin et al. 2011; Nelson and Meece 2011).

Figure 2. Study Area and Direct APE for Buckeye II.

### Requirements of the Ohio Administrative Code Chapter 4906-17-08 (D) Cultural Impact

(1) The applicant shall indicate, on the 1:24,000 map referenced in paragraph (C)(1)(a) of this rule, any registered landmarks of historic, religious, archaeological, scenic, natural, or other cultural significance within five miles of the proposed facility

### National Register of Historic Places

The records review of the OHPO online GIS mapping revealed that 32 NRHP-listed properties and two National Register DOE sites have been recorded within 5.0 mi (8.0 km) of the direct APE (Table 1 and Figure 3). In addition, NRHP boundaries are provided for four NRHP properties, including three historic districts and one large farm. The Scioto Street Historic District and Monument Square Historic District in Urbana and the Mechanicsburg Commercial Historic District in Mechanicsburg contain particularly rich concentrations of historic resources. None of these previously identified properties is within the direct APE.

### Ohio Historic Inventory Resources

The review indicated that 791 OHI resources have been previously recorded within 5.0 mi (8.0 km) of the direct APE, including four OHI resources surveyed during the Buckeye I project (Table 2 and Figure 3). Slightly more than three-quarters of these resources consist of single dwellings and other residential complexes, while another 10 percent are various commercial properties. The remaining resources consist of low frequencies of barns, mills, schools, libraries, colleges, cemetery structures, a theatre, industrial, transportation, rail, other, and unknown.

All but two of these OHI properties are located in Champaign County, and most are found in the towns of Urbana and Mechanicsburg and along the US 68 corridor. None of the OHI properties are located within the direct APE. Prior to CRA's 2010-2011 study for the Buckeye I project, the rural areas of Champaign County were not subject to a systematic architectural survey. While the 2010-2011 survey identified hundreds of architectural resources throughout the eastern half of Champaign County, the vast majority of these resources were not recorded in the OHI, per agreement with OHPO, so they are not included in the records review results. However, it should be noted the previous survey identified 1,475 individual properties located in the rural areas and crossroads communities of the Study Area for Buckeye I, of which 1,167 are located in the Study Area for the Buckeye II. Based on the survey results, it was determined that historic farmsteads and farmhouses, one-room schoolhouses. churches. cemeteries. crossroads communities are character-defining property types that contribute to one's appreciation of the area as a traditional farming community (Heavrin et al. 2011).

### Ohio Archaeological Inventory Resources

The review identified 260 previously recorded archaeological sites within 5.0 mi (8.0 km) of the direct APE (Table 3 and Figure 4), including 10 archaeological sites inventoried during the Buckeye Wind Farm Phase I project. Seven of the 260 sites are located in Clark County and the rest are located in Champaign County; none are located in Union or Madison counties. The sites consist of 45 historic-era sites (type and function unknown), 203 prehistoric sites, 11 sites with both historic and prehistoric components, and one site of unknown period. For the prehistoric sites, 228 temporal components were identified: 171 unknown prehistoric, 2 Paleoindian, 3 unknown Archaic, 6 Early Archaic, 2 Middle Archaic, 24 Late Archaic, 11 unknown Woodland, 1 Early Woodland, 1 Middle Woodland, and 2

Late Woodland to Late Prehistoric. Except for 1 burial, 7 mounds, 2 camps, and 1 habitation, the rest of the archaeological sites are of unknown function (Table 3).

One site, originally identified during the Buckeye I archaeological survey (Nelson and Meece 2011), has been recommended as potentially eligible for the NRHP. Site 33CH415 is a historic-period site that includes a possible root cellar or refuse pit containing a wide variety of artifact types, including domestic, architectural, and faunal. This site is not within the direct APE of the Buckeye II project.

Five previously identified sites (33CH412, 33CH414, 33CH417, 33CH418, and 33CH419) appear to be within the direct APE for Buckeye II (Figure 4). All five sites were identified during the Phase I archaeological survey associated with the Buckeye I project (Nelson and Meece 2011), and all have been previously recommended as not eligible for the NRHP, with no further work required.

### Ohio Genealogical Society Cemeteries

Fifty-five cemeteries have been identified by the Ohio Genealogical Society within 5.0 mi (8.0 km) of the direct APE: 6 in Clark County, 48 in Champaign County, and 1 in Madison County (Table 4 and Figure 3). None of these previously identified cemeteries is located within the direct APE.

### Mills' (1914) Archaeological Atlas of Ohio

A review of Mills' 1914 Archaeological Atlas indicates that three prehistoric mounds, three earthworks, three burials, one prehistoric cemetery, two circular enclosures, and one earthen enclosure were recorded within 5.0 mi (8.0 km) of the direct APE in Champaign County. The mounds are all located in Urbana Township; Union Township contains one of the burials in the extreme northwest portion of the township and the prehistoric cemetery and earthen enclosure southwest of Catawba Station. The two circular enclosures were

located east and southeast of Mechanicsburg, and one burial was reported east of Middletown. No archaeological sites were recorded within 5.0 mi (8.0 km) of the direct APE in Union, Madison, or Clark counties.

Mills (1914:vii) indicates that a trail (#3), which connected the forks of the Muskingum River to the Scioto, then west and north to the Miami River and north to the Maumee River, traversed a portion of the area within 5.0 mi (8.0 km) of the direct APE.

None of the archaeological remains noted in Mills' atlas are located within the direct APE for Buckeye II (Figure 5).

## Historic Atlases and Historic USGS 15-minute Topographic Quadrangles

Historic atlases for Clark County (Pleasant and Moorefield Townships), Champaign County (Urbana and Mad River Townships), Union County (Union Township), Madison County (Somerford and Pike Townships) were examined to determine whether historic structures had been recorded within 5.0 mi (8.0 km) of the direct APE. The following resources were reviewed: Starr et al. (1874) and Everts (1875) for Champaign and Clark Counties; Kizer (1859), Rerick Brothers (1894), and Lake (1870) for Clark County; Caldwell (1875) for Madison County; and Mowry (1877) and Marysville Map Co. (1908) for Union County. USGS 15-minute topographic quadrangles which were reviewed included South Charleston, OH 1907, London, OH 1907, Mechanicsburg, OH 1916 and 1944, St. Paris, OH 1916 and 1944, and Springfield, OH 1906.

According to these historical atlases, structures were present within 5.0 mi (8.0 km) of the direct APE as early as 1859 and continuing through 1944. The scale of mapping makes it difficult to determine whether something is actually within 5.0 mi (8.0 km) of the direct APE along its boundaries.

Figure 5. Direct APE for Buckeye II on the Mills Atlas (2006 [1914]).

Within the direct APE, structures are indicated on the 1916 Mechanicsburg OH USGS 15-minute quadrangle map within the proposed path of an access road associated with Turbine 124 and within a proposed buried interconnect south of Turbine 100. Structures are also indicated on the 1916 map adjacent to four buried interconnects and four access roads (Figure 6).

### (2) The applicant shall estimate the impact of the proposed facility on the preservation and continued meaningfulness of these landmarks and describe plans to mitigate any adverse impact.

Aboveground Resources. In estimating the impact of the proposed Buckeye II facility on the preservation and continued meaningfulness of known historic landmarks, direct, indirect, and reasonably foreseeable future impacts to aboveground historic resources considered. Given the nature of the proposed project, indirect visual effects are most likely. as the introduction of dozens of large wind turbines to the area may alter people's perceptions of the traditional rural character of the landscape and alter the settings of characterdefining historic resources. Due to established setback requirements for turbine locations, direct effects to aboveground resources will not occur.

The Study Area for Buckeye II is very similar to the Study Area for Buckeye I, thus the evaluation of effects to historic resources for Buckeye I provides a basis for estimating the impacts of Buckeye II. The architectural survey report for Buckeye I has established that the proposed wind farm will alter the cultural landscape of the Study Area, thus a mitigation plan has been proposed to promote the continued preservation and meaningfulness of the Study Area's rural history (Heavrin et al. 2011). The proposed plan includes a Multiple Property Listing to the NRHP for Champaign County's one-room schoolhouses, an important property type identified by the survey, and a Teaching with Historic Places Lesson Plan about Champaign County's role in the Underground Railroad, an important historical theme identified by the consulting parties. Plans are underway to continue consultation with OPSB, OHPO, Champaign Historical Society County (CCHS), and the Champaign County Preservation Alliance (CCPA) to finalize this mitigation plan and formalize it in an agreement document.

Since the H proposed Buckeye development is located within the same rural area of Champaign County as Buckeye I, and since viewshed mapping indicates that the proposed project will be visible throughout the majority of the Study Area, it is clear that construction of Buckeye II also will impact the historic character of the Study Area. However, based on previous consultation with OHPO, CRA recommends that the assessment of the impacts of Buckeye II should evaluate whether or not this impact is qualitatively different from or greater than the impact of Buckeye I, considering any additional impacts to previously identified historic resources and any new impacts to previously undocumented historic resources. Since the proposed turbine locations for Buckeye II are not located immediately adjacent to known historic landmarks identified by the records review. but rather, as with Buckeye I, within the greater viewshed of these properties, CRA estimates that the impact of Buckeye II will be a general impact to the character of the area's landscape is historic that largely indistinguishable from the impact of Buckeye

Since the entire Buckeye II Study Area has not been previously surveyed, CRA anticipates performing a reconnaissance-level survey of the portions of the Buckeye II Study Area that were not included in the Buckeye I study in order to assess potential impacts of this project to previously unidentified historic resources. CRA will also field-verify our estimation of impact to previously recorded historic resources at that time. If it is determined that the impacts of Buckeye II are not qualitatively different from or greater than the impacts of Buckeye I, no additional work will be recommended, and no additional mitigation other than what is being considered for Buckeye I would be recommended. If,

however, it is determined that Buckeye II will result in adverse impacts to historic resources that are distinct from the impacts of Buckeye I, additional mitigation will be developed through consultation with OPSB, OHPO, CCHS, and CCPA. If additional mitigation is necessary, CRA anticipates that an off-site mitigation strategy to address the impact to the survey area as a whole rather than address impacts to individual buildings will be most appropriate. It is recommended that all mitigation efforts should occur within the Study Area and address the particular values and concerns of the local community. The ultimate goal of the mitigation efforts will be to promote the preservation and continued meaningfulness of character-defining historic resources in the Study Area.

Belowground Resources. No indirect visual impacts are anticipated for belowground archaeological resources within the Study Area. As noted in part (1) above, five previously identified archaeological sites within the Study Area appear to be located within the direct APE. All five of these sites have been previously recommended as not eligible for the NRHP (Nelson and Meece 2011).

Most of the direct APE for Buckeye II has not been previously surveyed for cultural resources. CRA anticipates performing a Phase I archaeological survey within the direct APE shown on Figures 2 and 4 to identify cultural resources within the direct APE, including re-identification of those previously identified resources within the direct APE, and to assess the effects of the proposed project on these cultural resources. Cultural resources identified within the direct APE during the Phase I survey will be documented, and if recommended as potentially eligible for the NRHP, avoided. If avoidance of site(s) potentially eligible for the NRHP is not possible, a Phase II investigation will be recommended to assess the significance of cultural resources within the direct APE. The results of the Phase I archaeological survey will be presented in a complete report of investigations to be provided at a future date following completion of the fieldwork.

(3) Landmarks to be considered for purposes of paragraphs (D)(1) and (D)(2) of this rule are those districts, sites, buildings, structures, and objects which are recognized by, registered with, or identified as eligible for registration by the national registry of natural landmarks, the Ohio Historical Society, or the Ohio Department of Natural Resources.

Landmarks considered in the cultural resources records check include those districts, sites, buildings, structures, and objects which are recognized by, registered with, or identified as eligible for listing in the OAI, the OHI, recorded cemeteries on file with the Ohio Genealogical Society, and properties listed in or determined eligible for listing in the NRHP.

(6) The applicant shall describe measures that will be taken to minimize any adverse visual impacts created by the facility, including, but not limited to, project area location, lighting, and facility coloration. In no event shall these measures conflict with relevant safety requirements.

As described in Section (2), it appears likely that the proposed Buckeye II development will result in a visual impact to the Study Area that could affect one's understanding of the area's history as a traditional farming community. Based on the information currently available, it appears that this impact will be largely indistinguishable from the visual impact of the Buckeye I project. If this is the case, CRA recommends that the mitigation plans being developed for the Buckeye I project will adequately address the impacts of Buckeye II.

In order to more fully evaluate the potential impacts of the Buckeye II project, the applicant will initiate a Phase I cultural resource survey, including an archaeological survey and architectural reconnaissance, to assess both the direct and indirect effects of the proposed project. A report of investigations for the Phase I survey will be provided at a future date. No specific mitigation measures are proposed at this time.

Figure 6. Direct APE for Buckeye II on the 1916 Mechanicsburg OH USGS 15-minute quadrangle map.

### III. SUMMARY AND CONCLUSIONS

CRA conducted a cultural resource records review for the proposed Buckeye II project in Champaign County, Ohio. The review was conducted on January 13, 2012, and January 16 through January 20, 2012. The records review indicates that 32 National Register sites, two National Register DOE sites, 791 structures, 260 previously recorded archaeological sites, and 51 cemeteries have been identified in OHPO databases within 5.0 mi (8.0 km) of the direct APE.

A total of 791 OHI resources have been previously recorded within 5.0 mi (8.0 km) of the direct APE, including four OHI resources surveyed during the Buckeye I project (Table 2). Slightly more than three-quarters of these resources consist of single dwellings and other residential complexes, while another 10 percent are various commercial properties. The remaining resources consist of low frequencies of barns, mills, schools, libraries, colleges, cemetery structures, a theatre, industrial, transportation, rail, other, and unknown. All but two of these OHI properties are located in Champaign County, and most are found in the towns of Urbana and Mechanicsburg. None of these properties is located within the direct APE.

A total of 51 previously identified cemeteries are located within the Study Area, but none is within the direct APE of the project.

A total of 260 archaeological sites have been previously identified within 5.0 mi (8.0 km) of the direct APE, including 10 OAI resources surveyed during the Buckeye I project (Table 3). The sites consist of 45 historic-era sites, 203 prehistoric sites, 11 sites with both historic and prehistoric components, and one site of unknown period.

It appears likely that the proposed Buckeye II development will result in a visual impact to the Study Area that could affect one's understanding of the area's history as a traditional farming community. However, based on the information currently available, it appears that this impact will be largely indistinguishable from the visual impact of the Buckeye I project. If this is the case, CRA recommends that the mitigation plans being developed for the Buckeye I project will adequately address the impacts of Buckeye II.

With the exception of one archaeological site previously recommended as not eligible for the NRHP (Nelson and Meece 2011), the proposed project is not expected to directly impact known cultural resources within the study area. However, the majority of the direct APE for the Buckeye II project has not been systematically surveyed for cultural resources.

The Applicant will initiate a Phase I archaeological survey to assess the direct effects of the proposed project within the direct APE as shown on Figures 2 and 4, and an architectural reconnaissance to assess the indirect effects of the proposed project on the Study Area shown in Figures 2 and 3. A complete report of investigations will be provided at a future date.
