Subject: Tell Duke: Clean & Green for New Richmond!

May 30, 2012

Public Utilities Commission

Duke ratepayers want clean energy!

Americans everywhere want clean energy! Now that your company is replacing the old filthy Beckjord coal plant, Ohioians want you to take the opportunity to do the right thing for the future and your bottom line.

Duke Energy should move forward with energy efficiency and renewables like wind and solar. Clean renewable energy sources like wind and solar offer ample opportunities for Duke Energy to improve public relations and their own long term profitability by choosing to create good jobs in clean energy technologies.

Ohio ratepayers would like to see the economic development fund for New Richmond to feature clean energy technologies to create jobs in the community, starting by replacing the old dirty Beckjord coal plant with a profitable clean energy plant instead of your current choice of natural gas.

We have a responsibility to provide green jobs to workers in communities affected by coal plant retirement. Duke can make this transition easier for the New Richmond community by focusing their economic development fund on clean energy.

Sincerely

Miss Christina Baum
