For exchange residence service installed prior to January 1, 1998, the Telephone Company will use existing service records to determine which line is primary. Current billing records contain Universal Service Order Codes (USOCs) and Field Identifiers (FIDs) that identify non-primary residence lines. If that data are not available, date of installation will be used. The first line installed at a location will be designated as Primary.

For exchange residence service established after January 1, 1998, if the customer orders more than one line at the same service location, the first line installed will be Primary. Otherwise, if services are ordered at different times, date of installation data for the same location will be used to designate one line as Primary.

- (12) When an end user is provided a local residence exchange service and is a qualifying low income subscriber under paragraph 54.400 (a) (1) of Part 54 of FCC Rules and Regulations, the End User Common Line Residence Subscriber - Individual line or trunk rate in 4.1.7, following, shall be applied to that line. Lifeline Customers will receive a credit equal to 100 percent of this charge.
