Dear PUCO Commissioners:

I urge you to support AEP Ohio's modified Electric Security Plan (Case Numbers 11-346-EL-SSO, 11-348-EL-SSO, 11-349-EL-AAM, 11-350-EL-AAM). These plans support fair competition that will offer reliable electric service at the lowest reasonable rates while protecting Ohio jobs.

The Public Utilities Commission of Ohio repeatedly has asked AEP Ohio to delay its move to a competitive market. Regulators had a good reason to do so -- it kept electricity prices lower than what they would have been in the competitive market. Now that market rates are below AEP Ohio's rates, the utility has agreed to your request to move to a competitive market.

Other utilities in Ohio were allowed a multi-billion-dollar, multi-year transition plan. I ask you to support AEP Ohio's request for a three-year transition plan. This transition will ensure robust competition between strong competitors while fairly compensating AEP Ohio for assets currently dedicated to customers, but used by competitors for their own profit. Denying AEP Ohio an appropriate transition period is neither fair nor in the spirit of the deregulation legislation enacted by the Ohio General Assembly.

Sincerely,
James Wenckoski

COMMENT DESCRIPTION:

I am not in AEP's distribution area and so I did not participate during the public "comment period", however as an electric customer, I will be affected if First Energy is able to eliminate companies (AEP) competing with them.

Ohio Senate Bill 3 did not create competition among electric suppliers as it was thought would happen. However if the PUCO can help AEP to create a level playing field, customers should see true competition among electric suppliers.

Help all Ohio electric customers to enjoy competition among electric suppliers.

If I understand the situation correctly, the PUCO can help AEP now and true competition will follow.

COMMENT DESCRIPTION:

I am very disappointed with the way in which First Energy is attacking AEP over the transition to a competitive market. AEP should be given a fair rate of return while they transition to a competitive market. First Energy telling the public a bunch of lies and it should not be tolerated.

Denying AEP Ohio an appropriate transition period is neither fair nor in the spirit of the deregulation legislation enacted by the Ohio General Assembly.

As an AEP employee for 30 years, I have seen our company transition through many demands brought onto it by outside entities such as the EPA, state and federal government and local commissions. We have and continue to abide by the rules, regulations and laws that are demanded, which has come at a very high price for our rate payers and investors, and all the while we have continued to be a very reliable provider of electricity at comparatively low rates. After all it was AEP resources that prevented the area-wide blackout caused by others in 2004 from spreading further south and affecting much of the state and region. A deregulated marketplace in Ohio needs AEP's generating assets and transmission infrastructure to realize the expected benefits that come with competition and without further risk of a repeat event from 2004. As our economy in Ohio continues to improve, we ask that the move to a deregulated market also transition at a pace that all "players" including AEP can bring forth the best that they have to offer to make sure the consumers have the right to choose what is best for them, and ALL providers have a opportunity to achieve a fair and reasonable profit for its employees and shareholders. Isn't that what the PUCO is charged to do in our state? Thank you.

Dear PUCO Commissioners:

I urge you to support AEP Ohio's modified Electric Security Plan (Case Numbers 11-346-EL-SSO, 11-348-EL-SSO, 11-349-EL-AAM, 11-350-EL-AAM). These plans support fair competition that will offer reliable electric service at the lowest reasonable rates while protecting Ohio jobs.

The Public Utilities Commission of Ohio repeatedly has asked AEP Ohio to delay its move to a competitive market. Regulators had a good reason to do so -- it kept electricity prices lower than what they would have been in the competitive market. Now that market rates are below AEP Ohio's rates, the utility has agreed to your request to move to a competitive market.

Other utilities in Ohio were allowed a multi-billion-dollar, multi-year transition plan. I ask you to support AEP Ohio's request for a three-year transition plan. This transition will ensure robust competition between strong competitors while fairly compensating AEP Ohio for assets currently dedicated to customers, but used by competitors for their own profit. Denying AEP Ohio an appropriate transition period is neither fair nor in the spirit of the deregulation legislation enacted by the Ohio General Assembly.

Sincerely,
Tracy Elich
