12-1230-EL-SSO

Gentlemen:

It appears we can expect a 31% increase in our electric bills over the next three years. Since retiring in 1997, when gasoline was \$1.70 per gallon, I have seen everything go up except my cash flow. I am now Burning up my new worth. There is no way I can stay in my all electric home with an increase of 31%. Further, I doubt I will be able to sell it with this albatross of an increase hovering overhead.

Richard C. Smith
