The two exceptions to this requirement are - Intermediate reporting carriers are not required to complete a forecast form. This exception only applies to carriers that operate solely as intermediate carriers. - Reporting carriers that do not have any assigned numbers are not required to complete a utilization form. Many reporting carriers will file more than one utilization and/or forecast form. For example, reporting carriers that receive numbers from both a Numbering Administrator and another carrier must report as both a Primary and an Intermediate Reporting carrier. The reporting carrier should determine which forms to populate based on the status of the reporting carrier as well as the status of the resources for which the reporting carrier is reporting utilization and forecast information. The determining factors are whether the reporting carrier is: 1) reporting on utilization as a Primary and/or Intermediate Carrier; 2) reporting utilization as a Rural and/or a Non-Rural Carrier; 3) forecasting a need for resources as a Pooling and/or Non-Pooling Carrier; 4) forecasting a need for resources in a Pooling or Non-Pooling Area; 5) forecasting a need for Initial or Growth Resources.
