COMMENT DESCRIPTION:

Case# 12-1230-EL-SSO The increases propose for all electric homes is nor affordable for most people and catastrophic for those of us on a fixed income. We are looking at an initial increase of anywhere from 16 to 30 percent in the next 3 years and 3 more years of increases after that. We are in an area where electric is the only power available to us so switching to gas is not an alternative and would mean replacing one's furnace, a costly investment. These increases are just too high for people to afford during a time when a down economy is hurting so many families throughout Ohio.
