Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Dan Doepker

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers like me deserve a fair amount of time in the process to give their input. FirstEnergy has a checkered record in Ohio, from their near disaster with a hole in the containment vessel at Davis-Besse, to the actual disaster of the 2003 East Coast blackout, caused by their faulty line maintenance. This is not a company that should get the benefit of the doubt, and certainly not fast-track approval of anything by the Public Utilities Commission of Ohio. I want my say.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Christopher Clark

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy *efficiency programs that will save them money and protect them from* these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Paul D. Lewis

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Kathleen Rehus

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

We all need to be good stewards of this planet Earth.

Sincerely,  
Mrs. Pat Ormiston

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Ms. Marilyn Bakanec

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent *on efficiency must result in more than a dollar saved. So when* residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Paul Harrison

*Subject: Energy Efficiency is a Winner in Ohio*

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. John Dierig

Mrs. Rebecca Johnson
