Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mrs. Marlene Shaffer

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Ms. Eileen Fitzburgh

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mrs. Midge Gerbich

Public Utilities Commission of Ohio

Subject: PUCO - put the brakes on FirstEnergy's Ohio energy efficiency programs

Dear Public Utilities Commission of Ohio,

FirstEnergy Corp. has repeatedly sacrificed public health and the environment to pad their profit margins, earning them a reputation as Ohio's worst utility. Right now, they're trying to pull a fast one on their customers and fast track their energy efficiency plan through the Public Utilities Commission of Ohio (PUCO). I want the PUCO to slow them down and give the public a chance to weigh in! Put the brakes on FirstEnergy so customers can have a say on Ohio's energy efficiency programs.

In the past, FirstEnergy has failed to put the right foot forward in meeting Ohio's annual standards for energy efficiency and lagged behind both the state's requirements and other Ohio utilities. With their poor track record, we can't afford to let FirstEnergy fast track their plan's approval at the PUCO.

I urge you to give the public a chance to review and comment on FirstEnergy's energy efficiency plan. Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Al Jenkins

Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

It is clear our state and entire nation have serious and immediate economic problems. Our energy policies will be key to resolving these problems. And as we all know, every policy decision involves a tradeoff of one set of interests against another, and we tend to make these decisions based largely on economic considerations. However, sometimes these decisions involve issues of such scope that economic considerations alone cannot be the deciding factors. The long term health and well-being of our state and its people must outweigh immediate economic considerations.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Ms. Kelly Carrillo

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Leonard Bildstein

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Jonathan Gauchat

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Dr. Mike Schaefer
