Mrs. Ciccozzi,

12-1726-EL-BTX

Thank you for contacting the Ohio Power Siting Board (OPSB) regarding First Energy's proposed Bruce Mansfield-Glenwillow 345 kV Transmission Line Project.

As you know, on June 1, 2012, FirstEnergy filed a pre-application notification letter for this case with the OPSB and subsequently scheduled four public informational meetings in regards to the transmission line and related substation. These preliminary meetings, required by OPSB rules, are held before a developer like FirstEnergy submits a project application to the OPSB. In this case, FirstEnergy met the OPSB's public informational meeting requirement by providing public notice seven to 14 days prior to the meetings.

To date, First Energy has not submitted an application for these projects. Once the applications are submitted and determined to be complete, the OPSB staff will begin its formal investigation. The investigation will address several of your areas of concern including the consideration of any preferred or alternate routes.

Again, thank you for your concerns about this process. I have attached an Ohio Power Siting Board process flowchart for your reference. Additional information about the projects will be available once First Energy submits their applications. The complete record for case number 12-1726-EL-BTX is available online at <http://dis.puc.state.oh.us/CaseRecord.aspx?Caseno=12-1726&link=DI>.

If you have any additional concerns, please do not hesitate to contact me at 866.270.6772.

Thanks,

Steve

COMPLAINT DESCRIPTION:

I wish to object to the Bruce Mansfield Glen Willow project that is being proposed, Docket #12-1726. I understand the north side of Clark Road is being considered for high power (345 kv) power lines and installation of towers. This project would have a major negative impact on our natural habitats for the local wildlife that live in our area. The surrounding wetlands would be damaged as well. I'm seriously concerned about the negative impact this project would have on our already declining property values. I've lived in the this neighborhood all of my life and am raising my family here. The noise and health issues related to these high power lines is very disturbing. My children have more than enough issues to deal with in their lives with the ways of our world. We do not need negative issues in our own yards. Please find an alternative route to save our neighborhood. Find a non-residential area to contaminate!
