This tool provides high-level estimates of our wireless coverage. Coverage is not available everywhere and varies based on a number of factors.

Our coverage maps provide high-level estimates of our coverage areas when using your device outdoors under optimal conditions. Coverage is coverage and signal strength is not an exact science.

There are gaps in coverage within our estimated coverage areas that, along with other factors both within and beyond our control (network problems, device, structures, buildings, weather, geography, topography, etc.), will result in dropped and blocked connections, slower data speeds, or other issues.

Services that rely on location information, such as E911 and GPS navigation, depend on your device's ability to acquire satellite signals (typically GPS signals). E911 services also depend on local emergency service provider systems/support. Estimated future coverage subject to change.

[Important information concerning number transfer](#)

Please note:

- **Do not contact your phone company/carrier to disconnect your local telephone service.**
- Your telephone number must be active with your old phone company for us to transfer your number to Vonage.
- You will need to authorize the transfer of your number later in the order process.
- Transferring a number may take up to 10 business days to complete.
- During the transfer period, your current phone line will continue to operate normally. You can install and use your Vonage service as soon as you receive your adapter.
- While you're waiting on the number transfer, you can still take advantage of all the great features Vonage has to offer.

Important Information About the Coverage Map

Map may include areas served by unaffiliated carriers, and may depict their licensed area rather than an approximation of the coverage there. Actual coverage area may differ substantially from map graphics, and coverage may be affected by such things as terrain, weather, foliage, buildings and other construction, signal strength, customer equipment and other factors. AT&T does not guarantee coverage. Charges will be based on the location of the site receiving and transmitting the call, not the location of the subscriber.

This tool provides high-level estimates of our wireless coverage. Coverage is not available everywhere and varies based on a number of factors.

Our coverage maps provide high-level estimates of our coverage areas when using your device outdoors under optimal conditions. Coverage is coverage and signal strength is not an exact science.

There are gaps in coverage within our estimated coverage areas that, along with other factors both within and beyond our control (network problems, device, structures, buildings, weather, geography, topography, etc.), will result in dropped and blocked connections, slower data speeds, or other

Services that rely on location information, such as E911 and GPS navigation, depend on your device's ability to acquire satellite signals (typical coverage). E911 services also depend on local emergency service provider systems/support. Estimated future coverage subject to change.
