

BEFORE

THE PUBLIC UTILITIES COMMISSION OF OHIO

In the Matter of the Amendment of)
Chapter 4901:1-16, Ohio Administrative) Case No. 12-2040-GA-ORD
Code, Regarding Gas Pipeline Safety, to)
Implement Am. Sub. S.B. 315.)

ENTRY

The Commission finds:

- (1) Chapter 4901:1-16, Ohio Administrative Code (O.A.C.), contains rules for delineating the gas pipeline safety (GPS) requirements in Ohio, as well as the means for administering and enforcing those requirements.
- (2) On June 11, 2012, the Governor of the state of Ohio signed into law Am. Sub. S.B. 315 (S.B. 315), which became effective on September 10, 2012. S.B. 315, *inter alia*, amended provisions contained in Chapter 4905, Revised Code, which govern the rules and regulations promulgated by the Commission contained in Chapter 4901:1-16, O.A.C.
- (3) In addition, on January 10, 2011, the Governor of the state of Ohio issued Executive Order 2011-01K, entitled "Establishing the Common Sense Initiative," which sets forth several factors to be considered in the promulgation of rules and the review of existing rules. Among other things, the Commission must review its rules to determine the impact that a rule has on small businesses; attempt to balance the critical objectives of regulation and the cost of compliance by the regulated parties; and amend or rescind rules that are unnecessary, ineffective, contradictory, redundant, inefficient, or needlessly burdensome, or that have had negative, unintended consequences, or unnecessarily impede business growth.
- (4) Additionally, in accordance with Section 121.82, Revised Code, in the course of developing draft rules, the Commission must evaluate the rules against the business impact analysis (BIA). If there will be an adverse impact on businesses, as defined in Section 107.52, Revised Code, the agency is to incorporate features into the draft rules to eliminate or adequately reduce any adverse impact.

- (5) On August 16, 2012, the Commission held a workshop in this proceeding to engage interested stakeholders on the appropriate revisions to incorporate the applicable provisions contained in S.B. 315 into Chapter 4901:1-16, O.A.C. There were approximately 20 stakeholders who attended the workshop to provide feedback to the Commission.
- (6) The Commission's Staff evaluated the rules contained in Chapter 4901:1-16, O.A.C., as well as all stakeholder feedback provided at the August 16, 2012, workshop, and recommends amendments to several rules, as shown in the attachment to this entry. The proposed revisions are summarized as follows:
 - (a) Staff recommends various changes to the definitions in Rule 4901:1-16-01, O.A.C., resulting from enactment of S.B. 315 including the addition or amendment of the definitions for the terms gas gathering pipeline, gas gathering/processing plant pipeline operator, gas processing plant, gathering line, horizontal well, MAOP, Natural Gas Pipeline Safety Act, operator, processing plant gas stub pipeline, raw natural gas, raw natural gas liquids, and transmission quality gas.
 - (b) Staff recommends changing the definition of Transportation of Gas in Rule 4901:1-16-01, O.A.C., for the purpose of appropriate and clear application of S.B. 315. The change to this definition is not explicitly required by S.B. 315 but would bring the rules into conformance with federal regulations and would allow for greater understanding and consistent enforcement of S.B. 315.
 - (c) Staff recommends changes throughout Rules 4901:1-16-02, 4901:1-16-04, 4901:1-16-05, 4901:1-16-08, 4901:1-16-11, 4901:1-16-12, and 4901:1-16-14, O.A.C., to reflect the distinction of the differences between the obligations of operators and gas gathering/processing plant pipeline operators.

- (d) Staff recommends changing Rules 4901:1-16-05 through 4901:1-16-07, O.A.C., to reflect the appropriate URL for the PUCO website, which is www.puco.ohio.gov.
- (e) Staff recommends the adoption of Rule 4901:1-16-15, O.A.C., for the design, construction, and operation of gas gathering pipelines and processing plant pipelines. This rule is a comprehensive addition to Chapter 4901:1-16, O.A.C., as a result of S.B. 315. The adoption of this rule would regulate and provide oversight to gas gathering/processing plant pipeline operators. It would also set pipeline construction requirements and benchmarks for the purpose of safe construction of the gas pipelines and compliance with S.B. 315.
- (7) Staff's proposed changes to Chapter 4901:1-16, O.A.C. (Attachment A) and the BIA for this chapter (Attachment B), are posted at: www.puco.ohio.gov/puco/rules. To minimize the expense of this proceeding, the Commission will serve a paper copy of only this entry. All interested persons are directed to download the proposed rules and BIA from the above website or to contact the Commission's Docketing Division to request a paper copy.
- (8) The Commission requests comments from interested persons, regarding the proposed changes to this chapter and the BIA, to assist the Commission in its implementation of the requirements established in S.B. 315. Comments should be filed, via electronic filing or in hard copy, by November 30, 2012. Reply Comments should be filed by December 14, 2012.

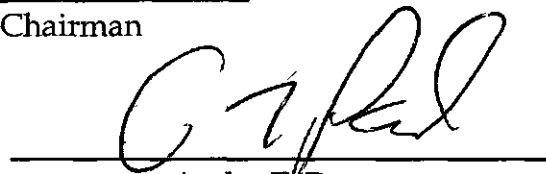

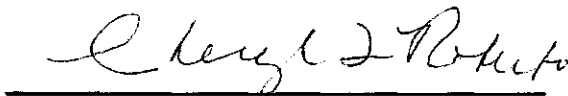

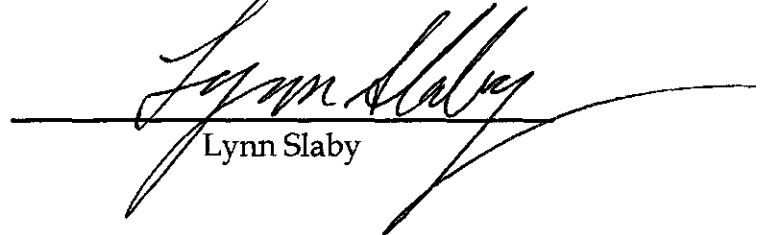

It is, therefore,

ORDERED, That all interested persons or entities wishing to file comments with the Commission regarding the proposed rules and the BIA do so no later than November 30, 2012, and any person wishing to file reply comments do so no later than December 14, 2012. It is, further,

ORDERED, That a copy of this entry with the attached rules and the BIA be submitted to CSI in accordance with Section 121.82, Revised Code. It is, further,

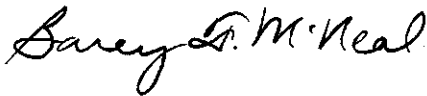

ORDERED, That an electronic notice or paper copy of this entry and BIA be served upon all gas and natural gas companies in the state of Ohio, the Ohio Consumers' Counsel, all competitive retail gas suppliers, the Ohio Gas Association, the Ohio Oil and Gas Association, Ohio Petroleum Council, and all other interested persons of record.

*****DRAFT - NOT FOR FILING*****

4901:1-16-01 Definitions.

As used in this chapter:

- (A) "Chief" means the chief of the gas pipeline safety section of the commission or his/her designee.
- (B) "Commission" means the public utilities commission of Ohio.
- (C) "Contiguous property" includes, but is not limited to, a manufactured home park as defined in section 3733.01 of the Revised Code; a public or publicly subsidized housing project; an apartment complex; a condominium complex; a college or university; an office complex; a shopping center; a hotel; an industrial park; and a race track.
- (D) "Gas" means natural gas, flammable gas, or gas which is toxic or corrosive.
- (E) "Gas gathering pipeline" means a gathering line that is not regulated under the Natural Gas Pipeline Safety Act, but includes a pipeline used to collect and transport raw natural gas or transmission quality gas to the inlet of a gas processing plant, the inlet of a distribution system, or to a transmission line.
- (F) "Gas gathering/processing plant pipeline operator" means any person that owns, operates, manages, controls, or leases, a gas gathering pipeline or a processing plant gas stub pipeline. A gas gathering/processing plant pipeline operator is not an operator as defined in paragraph (P) of this rule, but a person may be both an operator and a gas gathering/processing plant pipeline operator.
- (G) "Gas pipeline safety (GPS) proceeding" means a commission-ordered investigation of any incident, violation, or possible noncompliance with the pipeline safety code.
- (H) "Gas processing plant" means a plant that processes raw natural gas into merchantable products, including transmission quality gas or natural gas liquids, and also may include a plant that treats raw natural gas to remove impurities such as carbon dioxide, helium, nitrogen, or water.
- (I) "Gathering line" and "gathering of gas" have the same meaning as in the Natural Gas Pipeline Safety Act. is determined in the same manner as in 49 C.F.R. 192.8 as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the

*****DRAFT - NOT FOR FILING*****

~~Administrative Code.~~

- (I) "Horizontal well" means a well that is drilled for the production of oil or gas in which the wellbore reaches a horizontal or near horizontal position in the Point Pleasant, Utica, or Marcellus formation and the well is stimulated.
- (F) ~~"Gas pipeline safety (GPS) proceeding" means a commission ordered investigation of any incident, violation, or possible noncompliance with the pipeline safety code.~~
- (K) "Incident" means an event that involves a release of gas from an intrastate gas pipeline facility and results in any of the following:
 - (1) A death.
 - (2) Personal injury requiring inpatient hospitalization.
 - (3) Unintentional estimated gas loss of three million cubic feet or more.
 - (4) Estimated property damage of fifty thousand dollars or more, excluding the cost of gas lost, which is the sum of:
 - (a) The estimated cost of repairing and/or replacing the physical damage to the pipeline facility.
 - (b) The cost of material, labor, and equipment to repair the leak, including meter turn-off, meter turn-on, and light up.
 - (c) The estimated cost of repairing and/or replacing other damaged property of the operator or others, or both.
- (L) "Intrastate gas pipeline facility" includes any new and existing pipelines, rights-of-way, and any equipment, facility, or building used in the transportation of gas either wholly or partly within this state or from an interstate gas pipeline in Ohio to a direct sales customer in Ohio buying gas for its own consumption.
- (M) "MAOP" means the maximum pressure at which a pipeline or segment of a pipeline may be operated under the Natural Gas Pipeline Safety Act or under sections 4905.90 to 4905.96 of the Revised Code.
- (N) "Master meter system" means a pipeline system that distributes gas within a contiguous property for which the system operator purchases gas for resale to

*****DRAFT - NOT FOR FILING*****

consumers, including tenants. Such pipeline system supplies consumers who purchase the gas directly through a meter, or by paying rent, or by other means. The term includes a master meter system as defined in 49 C.F.R. 191.3, as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code. The term excludes a pipeline within a manufactured home, mobile home, or a building.

(O) "Natural Gas Pipeline Safety Act" means the Natural Gas Pipeline Safety Act of 1968, 82 Stat. 720, 49 U.S.C.A. App. 1671 et seq., as amended, and the rules adopted by the United States department of transportation pursuant to the Natural Gas Pipeline Safety Act of 1968, including 49 C.F.R. 40, 191, 192, and 199 as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code.

(P) "Operator" means:

- (1) A gas company as defined by division (A)(~~5~~)(4) of section 4905.03 of the Revised Code.
- (2) A natural gas company, including a producer of gas which does business as a natural gas company pursuant to division (A)(~~6~~)(5) of section 4905.03 of the Revised Code.
- (3) A pipeline company, when engaged in the business of transporting gas by pipeline as defined by division (A)(~~7~~)(6) of section 4905.03 of the Revised Code.
- (4) A public utility that is excepted from the definition of "public utility" under division (B) or (C) of section 4905.02 of the Revised Code, when engaged in supplying or transporting gas by pipeline within this state.
- (5) Any person who owns, operates, manages, controls, leases, or maintains an intrastate gas pipeline facility or who engages in the transportation of gas. This includes, but is not limited to, a person who owns, operates, manages, controls, leases, or maintains a master meter system within this state.

"Operator" does not include an ultimate consumer who owns a service line on the real property of that ultimate consumer and does not include a gas gathering/processing plant pipeline operator as defined in paragraph (F) of this rule.

*****DRAFT - NOT FOR FILING*****

- (Q) "Person" means any individual, corporation, business trust, estate, trust, partnership, association, firm, joint venture, or municipal corporation and includes any trustee, receiver, assignee, or personal representative thereof.
- (R) "Pipeline" means all parts of those physical facilities through which gas moves in transportation, including pipe, valves, and other appurtenance attached to pipe, compressor units, metering stations, regulator stations, delivery stations, holders, and fabricated assemblies.
- (S) "Pipeline safety code" means 49 C.F.R 40, 191, 192, and 199 as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code; sections 4905.90 to 4905.96 of the Revised Code; this chapter; and commission orders issued thereunder.
- (T) "Processing plant gas stub pipeline" means a gas pipeline that transports transmission quality gas from the tailgate of a gas processing plant to the inlet of an interstate or intrastate transmission line and that is considered an extension of the gas processing plant, is not for public use, and is not regulated under the Natural Gas Pipeline Safety Act.
- (U) "Raw natural gas" means hydrocarbons that are produced in a gaseous state from gas wells and that generally include methane, ethane, propane, butanes, pentanes, hexanes, heptanes, octanes, nonanes, and decanes, as well as other naturally occurring impurities like water, carbon dioxide, hydrogen sulfide, nitrogen, oxygen, and helium.
- (V) "Raw natural gas liquids" means naturally occurring hydrocarbons contained in raw natural gas that are extracted in a gas processing plant and liquefied and generally include mixtures of ethane, propane, butanes, and natural gasoline.
- (W) "Safety audit" is defined as set forth in section 4905.90 of the Revised Code.
- (X) "Safety inspection" includes the following inspections, surveys, and testing of a master meter system which are authorized by the pipeline safety code, and includes mapping, if accurate maps are not available from the operator, and pipe locating, if the operator could not locate pipelines in its system.
 - (1) Testing of cathodic protection of metallic pipelines.
 - (2) Sampling of combustible gas to determine the proper concentration of odorant in distribution pipelines, unless records of the natural gas company

*****DRAFT - NOT FOR FILING*****

performing the safety inspection show that the concentration of odorant in the gas transported to or near the master meter system conforms with the pipeline safety code.

- (3) Gas leak surveys.
- (4) Inspection and servicing of pressure regulating devices.
- (5) Testing or calculation of required capacity of pressure relief devices.
- (6) Inspection and servicing of critical valves.
- (7) Inspection of underground vaults housing pressure regulating/limiting equipment and ventilating equipment.
- (Y) "Staff" means the commission employees to whom responsibility has been delegated for enforcing and administering the gas pipeline safety requirements contained in this chapter and the Revised Code.
- (Z) "Synthetic Natural Gas" means gas formed from feedstocks other than natural gas, including coal, oil, or naptha.
- (AA) "Transportation of gas" means the gathering, transmission, or distribution of gas by pipeline, or the storage of gas within this state.:
 - ~~(1) The gathering, transmission, or distribution of gas by pipeline, or the storage of gas within this state.~~
 - ~~(2) The movement of gas through regulated gathering lines, but does not include the gathering of gas in those rural locations that are located outside the limits of any incorporated or unincorporated city, town, or village, or any other designated residential or commercial area (including a subdivision, business, shopping center, or community development) or any similar populated area.~~

4901:1-16-02 Purpose and scope.

- (A) The rules contained in this chapter prescribe:
 - (1) Gas pipeline safety and drug and alcohol testing requirements to protect the public safety.

*****DRAFT - NOT FOR FILING*****

- (2) Procedures for the staff to administer and enforce the pipeline safety code.
- (B) This chapter also governs gas pipeline safety proceedings to:
- (1) Investigate and determine an operator's or a gas gathering/processing plant pipeline operator's compliance with applicable sections of the pipeline safety code.
 - (2) Investigate and determine whether ~~an operator's~~ intrastate gas pipeline ~~facility is~~ facilities are hazardous to human life or property, as provided in 49 U.S.C. 60112, as effective on the date referenced in paragraph (D) of this rule.
 - (3) Review settlement agreements and stipulations by the staff and ~~the operator~~ operators or by staff and gas gathering/processing plant pipeline operators.
 - (4) Issue and enforce compliance orders.
 - (5) Issue emergency orders without notice or prior hearing when immediate action is needed to protect the public safety.
 - (6) Assess forfeitures.
 - (7) Direct the attorney general to seek enforcement of commission orders, including orders assessing forfeitures, and to seek appropriate remedies in court to protect the public safety.
- (C) All operators and gas gathering/processing plant pipeline operators shall comply with the applicable rules of this chapter.
- (D) Each citation contained with this chapter that is made to a section of the United States code or a regulation in the code of federal regulations is intended, and shall serve, to incorporate by reference the particular version of the cited matter that was effective on August 15, 2011.
- (E) The commission may, upon an application or a motion filed by a party, waive any requirement of this chapter, other than a requirement mandated by statute, for good cause shown.

*****DRAFT - NOT FOR FILING*****

4901:1-16-03 Adoption of United States department of transportation gas pipeline safety regulations.

- (A) The commission hereby adopts the gas pipeline safety regulations of the United States department of transportation contained in 49 C.F.R. 40, 191, 192 and 199 as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code.
- (B) Telephone notice and report requirements applicable to gathering lines, pursuant to division (C) of section 4905.91 of the Revised Code are set forth in rule 4901:1-16-05 of the Administrative Code.

4901:1-16-04 Records, maps, inspections, and leak classifications.

Each operator shall:

- (A) ~~Establish~~ Each operator and gas gathering/processing plant pipeline operator shall establish and maintain all plans, records, reports, information, and maps necessary to ensure compliance with applicable sections of the pipeline safety code, and keep such plans, records, reports, information, and maps in Ohio at the operator's headquarters or appropriate company office(s) readily available for inspection, examination, and copying by the commission, its staff, or its authorized representative(s).
- (B) ~~Provide~~ Each operator and gas gathering/processing plant pipeline operator shall provide and make available its plans, records, reports, information, and maps, as the commission, its staff, or its authorized representative(s) may require to administer and enforce the pipeline safety code.
- (C) ~~Permit~~ Each operator and gas gathering/processing plant pipeline operator shall permit the commission, its staff, and authorized representative(s) to: enter and inspect its premises, operations, and intrastate gas pipeline facilities; and inspect, examine, and copy its plans, records, reports, information, and maps, which the commission, its staff, or its authorized representative(s) may require to administer and enforce the pipeline safety code.
- (D) ~~Make~~ Each operator and gas gathering/processing plant pipeline operator shall make its premises, operations, and intrastate gas pipeline facilities readily

*****DRAFT - NOT FOR FILING*****

accessible to the commission, its staff, and its authorized representative(s).

- (E) Except for an operator of a master meter system, each operator shall establish and maintain maps of the operator's service area which identify the operator's intrastate gas pipeline facilities, excluding service lines as defined in 49 C.F.R. 192.3 as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code.
- (F) Unless otherwise provided by this chapter, each operator and gas gathering/processing plant pipeline operator shall establish and retain records for three years to show compliance with the requirements of 49 C.F.R. 192 as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code.
- (G) ~~Retain~~ Each operator shall retain records of each leak survey, as required by 49 C.F.R. 192.723 as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code, for five years.
- (H) ~~Classify~~ Each operator shall classify all hazardous leaks immediately and classify all other leaks within two business days of discovery, utilizing the following:
 - (1) A grade-one classification represents an indication of leakage presenting an existing or probable hazard to persons or property, and requires immediate repair or continuous action until the conditions are no longer hazardous.
 - (2) A grade-two classification represents an indication of leakage recognized as being nonhazardous at the time of detection, but requires scheduled repair based upon the severity and/or location of the leak.
 - (3) A grade-three classification represents an indication of leakage recognized as being nonhazardous at the time of detection and can be reasonably expected to remain nonhazardous.
- (I) Upon discovery of the corresponding leak(s) from above, ~~each opertor shall~~ take the following actions:
 - (1) Take immediate and continuous action on leaks classified as grade one to protect life and property until the condition is no longer hazardous. Continuous action is defined as having personnel at the scene of the leak

*****DRAFT - NOT FOR FILING*****

with leak detection equipment attempting to locate the source of the leak and taking action to prevent migration into structures, sewers, etc. If the hazardous condition associated with the leaks classified as grade one is eliminated, such as by venting, temporary repair, etc., but the possibility of the hazardous condition returning exists, the condition must be monitored as frequently as necessary, but at least once every eight hours, to protect life and property until the possibility of the hazardous condition returning no longer exists.

Leaks classified as grade one may be reclassified by performing a physical action to the pipeline (clamp, replacement, tape wrap, etc.) or pipeline facility. Reclassification must be in accordance with the criteria in paragraph (H) of this rule and by an individual who is qualified to classify leaks under the company's operator qualification plan. Venting, holes, aerators, or soil purging of a leak are not considered physical actions to the pipeline. If a leak is reclassified after performing a physical action, the timeframe for any required repair(s) and/or reevaluation(s) at the resulting classification will be calculated from the date the leak was reclassified.

- (2) Repair or clear leaks classified as grade two no later than fifteen months from the date the leak is discovered, unless the pipeline containing the leak is replaced within twenty-four months from the date the leak is discovered. If a replacement project that will clear a leak classified as grade two is cancelled after the fifteenth month after classification of the leak(s), the associated leak(s) must be cleared within forty-five days of the cancellation of the project, not to exceed twenty-four months from the date of the leak classification. Leaks classified as grade two shall be reevaluated at least once every six months until cleared.
- (3) Reevaluate leaks classified as grade three during the next scheduled survey or within fifteen months from the date of the last inspection, whichever is sooner, and continue to reevaluate such leaks on that same frequency until there is no longer any indication of leakage, the leak is reclassified, or the pipeline is replaced.

*****DRAFT - NOT FOR FILING*****

4901:1-16-05 Notice and reports of service failures and incidents; twenty-four hour contacts; one-call participation; post-incident testing; and cast iron pipeline program.

(A) Telephone notice of incidents and service failures.

- (1) Operators shall provide telephone notice to the chief on all incidents, as defined in rule 4901:1-16-01 of the Administrative Code, within two hours of discovery. This includes any telephone notice which is required to be made to the United States department of transportation pursuant to 49 C.F.R. 40, 191, 192, and 199 as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code. Telephone notice requires personal contact with the chief or good faith efforts to make personal contact for all incidents. Operators unable to make personal contact with the chief shall leave a message on the commission's incident line, which is 1-614-466-7542.
- (2) Operators shall provide telephone notice to the chief on all service failures, which involve an interruption of service to one hundred or more customers for a period of two hours or more, within two hours after discovery. Telephone notice requires personal contact with the chief or good faith efforts to make personal contact for all qualifying service failures. Operators unable to make personal contact with the chief shall leave a message on the commission's incident line, which is 1-614-466-7542.

(B) Written reports regarding incidents and service failures.

- (1) All written reports required to be made to the United States department of transportation pursuant to the regulations in 49 C.F.R. 40, 191, 192, and 199 as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code, shall be submitted concurrently to the chief.
- (2) Within thirty days after the service failure is discovered, each operator shall submit a written report to the chief on the service failure report form provided by the commission.
- (3) For each incident report and each service failure report required by the pipeline safety code, each operator shall also submit a final written report of the cause(s) of the incident or service failure, where ascertainable, and actions taken to minimize the possibility of a recurrence of such an incident or service failure, where appropriate. The final report shall be submitted to

*****DRAFT - NOT FOR FILING*****

the chief within sixty days after discovery of the incident or service failure, unless the operator:

- (a) For good cause, shows more time is needed.
 - (b) Submits interim reports at intervals of not more than sixty days until a final report is submitted.
- (4) Except for an operator of a master meter system, each operator shall submit an annual written report of incidents and service failures for the preceding calendar year or state that no incidents or service failures occurred during the preceding calendar year on the annual report form provided by the commission. This annual report shall be submitted to the chief not later than March fifteenth of each year.
- (C) Each natural gas company and pipeline company shall register the location of all of its underground utility facilities with a protection service that serves the area where the facilities are located, as provided in division (A) of section 3781.26 of the Revised Code. "Underground utility facilities" and "protection service" shall have the same meaning as in section 3781.25 of the Revised Code.
- (D) Twenty-four hour contact report.
- (1) Each operator and gas gathering/processing plant pipeline operator shall submit a twenty-four hour contact report to the chief not later than March fifteenth of each year. This written report shall contain:
 - (a) The name(s), business address(es), business telephone and fax number(s), and e-mail addresses of its emergency contact personnel.
 - (b) Any available emergency hotline number.
 - (2) Each operator and gas gathering/processing plant pipeline operator shall, within a reasonable time, notify the chief in writing of any change in emergency contact personnel name(s), business address, business telephone, fax number, emergency hotline number, and/or e-mail address of its emergency contact personnel.
- (E) To the extent necessary to carry out its responsibilities under the pipeline safety code, the commission or its staff may require testing of any intrastate gas pipeline facility which is involved in an incident. After making a good faith

*****DRAFT - NOT FOR FILING*****

effort to negotiate a mutually acceptable plan with the owner of the pipeline facility, the commission or its staff may require the operator or choose an independent laboratory to test such pipeline facility.

- (F) Each operator shall establish a program to identify, repair and replace, as necessary, its cast iron distribution pipeline system which is detrimental to the public safety. This program shall include, but not be limited to, disturbing cast iron pipe, maintenance history, leak history, major street or highway reconstruction or repaving, construction activity, depth of cover, soil type, traffic loading, operating conditions, year of manufacture, type of pipe, amount of graphitization, vibrations, impact forces, earth movement, backfilling after undermining, and water leaks or sewer failures in the area.
- (G) The forms required by this rule shall be available at the commission's docketing division and electronically on the commission's website at <http://www.puco.ohio.gov> ~~www.puc.ohio.gov~~.

4901:1-16-06 Construction reports.

- (A) Each operator shall submit reports for each important addition of its intrastate gas pipeline facilities. As used in this rule, an "important addition" means construction or alteration of an operator's intrastate gas pipeline facility in a single project which involves an expenditure of either:
 - (1) More than two hundred thousand dollars.
 - (2) An amount which is more than ten per cent of the value of the operator's intrastate gas pipeline facility, provided such amount exceeds thirty thousand dollars.

As used in this rule, a "single project" means the installation, construction, or alteration of a contiguous section of gas pipeline facility within a defined time-frame.

- (B) Each operator shall submit three reports for each important addition on the form provided by the commission. Each report shall be submitted to the chief as follows:
 - (1) The first report not later than twenty-one days before construction work will start.

*****DRAFT - NOT FOR FILING*****

- (2) The second report not later than seven days after construction work has started.
- (3) The third report not later than seven days after construction work has been completed.
- (C) Except for an operator of a master meter system, each operator shall submit a list of important additions completed during the preceding calendar year or state it did not complete important additions during the preceding calendar year on the annual report form provided by the commission. This annual report shall be submitted to the chief not later than March fifteenth of each year.
- (D) The forms required by this rule shall be available at the commission's docketing division and electronically on the commission's website at <http://www.puco.ohio.gov>. ~~www.puc.ohio.gov.~~

4901:1-16-07 Master meter systems and safety inspections.

- (A) Each operator of a master meter system shall establish and maintain maps which identify its distribution pipeline system.
- (B) Each operator of a master meter system shall file an annual report on its system on the form provided by the commission. This annual report shall be submitted to the chief not later than March fifteenth of each year. The form required by this rule shall be available at the commission's docketing division and electronically on the commission's website at <http://www.puco.ohio.gov>. ~~www.puc.ohio.gov.~~
- (C) Safety inspections.
 - (1) Unless otherwise provided in this paragraph, each operator of a master meter system shall conduct safety inspections as required by the pipeline safety code.
 - (2) The commission may direct or order a natural gas company which distributes gas to a master meter system to perform a safety inspection on that system when the public interest so requires, or when an operator of a master meter system:
 - (a) Has violated paragraph (B) or (C)(1) of this rule; or
 - (b) Requests an inspection.

*****DRAFT - NOT FOR FILING*****

The staff shall notify such natural gas company by letter and mail a copy of the notice to the operator of the master meter system. The letter shall specify the inspections, surveys, and testing required for the safety inspection of the master meter system.

- (3) Each operator of a master meter system shall permit employees and agents of the natural gas company performing the safety inspection to review the operator's maps and records.
- (4) Each natural gas company shall submit a report of its findings of the safety inspection to the chief within thirty days after the inspection.
- (D) A natural gas company may terminate service to a master meter system or a gas pipeline facility within a master meter system, in compliance with divisions (G) and (H)(1) of section 4905.94 of the Revised Code, for the following unsafe conditions, gas leaks, and other safety hazards on that system or gas pipeline facility within that system:
 - (1) Grade one leaks according to rule 4901:1-16-04 of the Administrative Code.
 - (2) A fire or explosion near or at a gas pipeline facility.
 - (3) A gas pipeline facility damaged by a natural disaster, such as flooding, or by excavation activities near or at the gas pipeline facility.
- (E) The natural gas company may recover all reasonable, actual expenses incurred for performing a safety inspection by direct billing the operator of the master meter system.
- (F) Tariffs.
 - (1) Each natural gas company may file an application with the commission for approval of a schedule of rates and charges for its customers to recover the reasonable and actual expenses of:
 - (a) Performing safety inspections.
 - (b) Disconnecting and reconnecting service to a master meter system under this rule.
 - (2) A natural gas company may recover expenses under its tariff if:

*****DRAFT - NOT FOR FILING*****

- (a) The company direct billed the operator of the master meter system.
 - (b) The company made a good faith effort and followed regular procedures in collecting the debt.
 - (c) The operator failed to pay the bill within ninety days.
- (G) Nothing in this rule relieves an operator of a master meter system from complying with this chapter.

4901:1-16-08 Service of notices and investigative reports.

- (A) This rule governs service of:
- (1) Notices of probable noncompliance, proposed compliance orders, proposed forfeitures and amendments thereto under rule 4901:1-16-09 of the Administrative Code.;
 - (2) Notices of hazardous facility and amendments thereto under rule 4901:1-16-10 of the Administrative Code.
 - (3) Gas pipeline safety investigative reports under rule 4901:1-16-12 of the Administrative Code.
- (B) The staff shall make service upon an operator or gas gathering/processing plant pipeline operator by certified United States mail, courier service, or personal service. Service is effective upon receipt by any employee, agent of, or person designated by the operator. Unless otherwise provided in this paragraph, service upon an operator or gas gathering/processing plant pipeline operator shall be made at the address designated as the service address in the operator's most recent annual report to the chief.
- (1) If the service address is not disclosed on the most recent annual report or has changed since the most recent annual report was submitted to the chief, service shall be made at any business address disclosed in documents or papers submitted by the operator to the or gas gathering/processing plant pipeline operator commission.
 - (2) If the operator or gas gathering/processing plant pipeline operator has not disclosed its service address or business address to the commission, service shall be made at any business address of the operator or gas

*****DRAFT - NOT FOR FILING*****

gathering/processing plant pipeline operator.

- (C) If service under paragraph (B) of this rule is returned with an endorsement showing failure of delivery, or is not returned within twenty-one days, then service may be made by ordinary United States mail and is effective on the date of mailing.

4901:1-16-09 Notice of probable noncompliance; proposed compliance order; and/or proposed forfeiture.

- (A) After an inspection or investigation, the staff may issue a notice of probable noncompliance.
- (B) The staff may issue with the notice of probable noncompliance or separately thereafter:
 - (1) A proposed compliance order.
 - (2) A proposed forfeiture.
- (C) The staff may issue an amended notice of probable noncompliance, proposed compliance order, or proposed forfeiture at any time prior to the commencement of a gas pipeline safety proceeding brought pursuant to rule 4901:1-16-12 of the Administrative Code, in order to modify or include additional probable noncompliances or violations, facts, proposed forfeitures and proposed compliance orders. This rule should not be construed to prevent the staff, during the course of a gas pipeline safety proceeding, from seeking a finding of violations not listed in the notice or amended notice of probable noncompliance, from rescinding or refraining from seeking a finding of violations, or from seeking a compliance order or proposed forfeiture that varies from previous notices issued under this rule, provided that the staff's proposed findings and/or violations relate to the same incident, investigation, or safety audit(s).
- (D) Any notice of probable noncompliance, proposed compliance order, proposed forfeiture, or amendments thereto shall be served pursuant to rule 4901:1-16-08 of the Administrative Code.
- (E) The staff findings contained in the notice of probable noncompliance, proposed compliance order, or proposed forfeiture represent the results of the staff investigation. Such findings are not intended to represent the views of the

*****DRAFT - NOT FOR FILING*****

commission or otherwise bind the commission.

4901:1-16-10 Hazardous pipeline facilities: inspection and notice.

- (A) After an inspection or investigation, the staff may issue a notice of hazardous facility. The notice may include a proposed compliance order.
- (B) The staff may issue an amended notice or proposed compliance order at any time prior to the commencement of a gas pipeline safety proceeding brought pursuant to rule 4901:1-16-12 of the Administrative Code in order to modify or include additional hazards, facts, and proposed compliance orders. This rule should not be construed to prevent the staff, during the course of a gas pipeline safety proceeding, from seeking a finding of hazardous facility not listed in the notice or amended notice, from rescinding or refraining from seeking a finding of hazardous facilities, or from seeking a compliance order that varies from previous notices issued under this rule, provided that the staff's proposed findings and/or violations relate to the same incident, investigation, or safety audit(s).
- (C) Any notice of hazardous facility, proposed compliance order, or amendments thereto shall be served pursuant to rule 4901:1-16-08 of the Administrative Code.
- (D) The staff findings contained in the notice and proposed compliance order represent the results of the staff investigation. Such findings are not intended to represent the views of the commission or otherwise bind the commission.

4901:1-16-11 Settlement agreements and stipulations.

- (A) If the staff and operator or gas gathering/processing plant pipeline operator reach agreement regarding any of the following: the occurrence of a noncompliance; the occurrence of a hazardous condition of a facility; the violation of a commission order; a compliance order or remedy; or the amount of a forfeiture, compromise forfeiture, or other payment, the agreement may be reduced to writing in a settlement agreement and/or stipulation. Such agreement shall be signed by the operator or gas gathering/processing plant pipeline operator, or its attorney, and an authorized representative of the staff. Except as otherwise provided in paragraphs (B) and (E) of this rule, the settlement agreement and/or stipulation shall not be effective until it is filed with the commission and approved by the commission.

*****DRAFT - NOT FOR FILING*****

- (B) If the settlement agreement and/or stipulation provides for the payment of a forfeiture, compromise forfeiture, or other payment by the operator or gas gathering/processing plant pipeline operator of one thousand dollars or less, the agreement shall be fully binding upon the commission and the operator or gas gathering/processing plant pipeline operator upon its execution.
- (C) Unless contained in or otherwise provided in a settlement agreement and/or stipulation, no statement or conduct during settlement negotiations is admissible in any other commission proceeding regarding the noncompliance, hazardous facility, or violation.
- (D) Where the operator or gas gathering/processing plant pipeline operator has demonstrated to the staff that the violation(s) listed in the notice, or amended notice, of probable noncompliance or gas pipeline safety investigative report has been corrected and where the operator or gas gathering/processing plant pipeline operator submits full payment of the proposed forfeiture prior to the execution of a written settlement agreement and/or stipulation, or final commission order, the violation(s) listed in such notice of probable noncompliance shall be considered by the commission as part of the operator's or gas gathering/processing plant pipeline operator's history of violations in determining the appropriate forfeiture for any future violation.
- (E) If the operator or gas gathering/processing plant pipeline operator pays a proposed forfeiture or more than one thousand dollars without executing a written settlement agreement and/or stipulation, the payment shall be fully binding upon the commission and the operator or gas gathering/processing plant pipeline operator when approved by the commission.

4901:1-16-12 Commission proceedings.

- (A) The commission may initiate a gas pipeline safety proceeding after:
 - (1) An incident has occurred.
 - (2) A notice of probable noncompliance is served.
 - (3) A notice of hazardous facility is served.
- (B) The commission shall conduct gas pipeline safety proceedings in accordance

*****DRAFT - NOT FOR FILING*****

with Chapter 4901-1 of the Administrative Code.

- (C) Unless otherwise ordered by the commission or an attorney examiner assigned to the gas pipeline safety proceeding, the staff shall file with the commission and serve upon the operator or gas gathering/processing plant pipeline operator a written report of investigation in each gas pipeline safety proceeding within ninety days after service of the entry which initiates the gas pipeline safety proceeding. The gas pipeline safety investigative report shall include: staff findings on any alleged incident, noncompliances, hazardous conditions, or violation of a commission order, whether included in any initial notice or amended notice; staff's findings on operator or gas gathering/processing plant pipeline operator policies and practices; and the staff's recommendations.
- (D) The commission shall hold an evidentiary hearing to consider the alleged incident(s), noncompliances, hazardous conditions and violations of a commission order. The hearing may include evidence on the issues of corrective action and compliance orders, forfeitures, enforcement of a commission order, and other remedies.
- (E) The staff shall prove the occurrence of an incident, noncompliance, hazardous condition of a facility, or violation of a commission order by a preponderance of the evidence.
- (F) If, after a hearing, the commission finds an operator or gas gathering/processing plant pipeline operator has violated or is violating the pipeline safety code, the commission may consider all factors set forth in section 4905.95 of the Revised Code, including when determining the amount of any proposed civil forfeiture. In addition, the commission may order an operator to terminate service to an operator of a master meter system who has violated the pipeline safety code.
- (G) This rule shall not apply to emergency orders approved by the commission under paragraph (C) of rule 4901:1-16-13 of the Administrative Code.

4901:1-16-13 Emergency proceedings.

- (A) The commission may initiate an emergency gas pipeline safety proceeding consistent with section 4905.95 of the Revised Code.

*****DRAFT - NOT FOR FILING*****

- (B) The commission shall conduct such proceedings in accordance with Chapter 4901-1 of the Administrative Code, except where inconsistent with this rule.
- (C) Prior to a hearing under this rule, the commission may, without notice, find an emergency exists, may order the attorney general to seek remedies as provided in section 4905.96 of the Revised Code, and shall provide for an expedited hearing to begin no later than thirty days thereafter.

The order shall remain in effect no longer than forty days after the date it was approved.

4901:1-16-14 Payment of forfeitures and payments made pursuant to stipulation.

- (A) All forfeitures ordered by the commission or any payments made pursuant to stipulation shall be paid by certified check or money order made payable to "Public Utilities Commission of Ohio," and shall be mailed or delivered to:

"Public Utilities Commission of Ohio

180 East Broad Street

Columbus, Ohio 43215-3793"
- (B) The commission shall deposit such payments in the state treasury to the credit of the general revenue fund.
- (C) No operator or gas gathering/processing plant pipeline operator may recover any forfeiture or other payment made pursuant to stipulation in any pending or subsequent proceeding before the commission.

4901:1-16-15 Gas gathering pipelines and processing plant stub pipelines.

- (A) All gas gathering/processing plant pipeline operators shall comply with the applicable pipe design requirements of 49 C.F.R. 192(C), as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code, for all gas gathering pipelines and processing plant gas stub pipelines that are completely constructed on or after the effective date of Section 4905.911, Revised Code, and that transport gas produced by a horizontal well.
- (B) A gas gathering/processing plant pipeline operator shall do all of the following:

*****DRAFT - NOT FOR FILING*****

- (1) Design, install, construct, initially inspect, and initially test the pipeline in accordance with the requirements of 49 C.F.R. 192, as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code, if the pipeline is new, replaced, relocated, or otherwise changed;
 - (2) Control corrosion according to requirements of 49 C.F.R. 192(I), as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code, if the pipeline is metallic;
 - (3) Establish and carry out a damage prevention program under 49 C.F.R. 192.614, as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code;
 - (4) Establish and carry out a public education program under 49 C.F.R. 192.616, as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code;
 - (5) Establish the MAOP of the pipeline under 49 C.F.R. 192.619, as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code;
 - (6) Install and maintain pipeline markers according to the requirements for transmission lines under 49 C.F.R. 192.707, as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code;
 - (7) Perform leakage surveys according to requirements in 49 C.F.R. 192.706, as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code;
 - (8) Retain a record of each required leakage survey conducted under paragraph (B)(7) of this rule and 49 C.F.R. 192.706, as effective on the date referenced in paragraph (D) of rule 4901:1-16-02 of the Administrative Code, for five years or until the next leakage survey is completed, whichever time period is longer.
- (C) Not later than twenty-one days prior to commencement of the pipeline, any person who plans to construct a pipeline subject to paragraphs (A) and (B) of this rule after the effective date of section 4905.911, Revised Code, shall submit to the pipeline safety division of the public utilities commission a form approved by the division that includes all of the following information:

*****DRAFT - NOT FOR FILING*****

- (1) The route of the proposed pipeline;
 - (2) The MAOP of the pipeline;
 - (3) The outside diameter of the pipeline;
 - (4) The wall thickness of the pipeline;
 - (5) The material that the pipeline will be made of;
 - (6) The yield strength of the pipeline.
- (D) Not later than sixty days after the completion of construction of a pipeline subject to paragraph (C) of this rule, the gas gathering/processing plant pipeline operator shall submit to the public utilities commission division of pipeline safety an explanation of the constructed pipeline's route and operating information.

| <input checked="" type="checkbox"/> Amended | <input type="checkbox"/> Rescinded |

The Common Sense Initiative was established by Executive Order 2011-01K and placed within the Office of the Lieutenant Governor. Under the CSI Initiative, agencies should balance the critical objectives of all regulations with the costs of compliance by the regulated parties. Agencies should promote transparency, consistency, predictability, and flexibility in regulatory activities. Agencies should prioritize compliance over punishment, and to that end, should utilize plain language in the development of regulations.

Regulatory Intent

- 1. Please briefly describe the draft regulation in plain language. Please include the key provisions of the regulation as well as any proposed amendments.**

The proposed revisions to the rules in Chapter 4901:1-16, Ohio Administrative Code (O.A.C.), are in response to Am. Sub. S.B. 315, which amended Sections 4905.03 to 4905.04, and 4905.90 to 4905.96, Revised Code. The proposed revisions to Chapter 4901:1-16, O.A.C., would add or amend definitions for the terms gas gathering pipeline, gas gathering/processing plant pipeline operator, gas processing plant, gathering line, horizontal well, MAOP, Natural Gas Pipeline Safety Act, operator, processing plant gas stub pipeline, raw natural gas, raw natural gas liquids, and transmission quality gas. These terms are being defined in accordance with Am. Sub. S.B. 315, which amends Section 4905.90, Revised Code. In addition, the definition of transportation of gas has been amended to include the gathering, transmission, or distribution of gas by pipeline, or the storage of gas within this state. The adoption of the proposed revisions to the definitions would provide for an appropriate and clear understanding of the rules in Chapter 4901:1-16, O.A.C. An additional rule is being proposed for Chapter 4901:1-16, Administrative Code, which would be Rule 4901:1-16-15, O.A.C., for the effective regulation of gas gathering pipelines and processing plant stub pipelines. This additional rule would improve gas pipeline safety through regulation for appropriate design, construction, and operation of these pipelines.

- 2. Please list the Ohio statute authorizing the Agency to adopt this regulation.**

The amendments to the rules in Chapter 4901:1-16, O.A.C., are in response to Am. Sub. S.B. 315, which amended Sections 4905.03 to 4905.04, and 4905.90 to 4905.96, Revised Code. The specific statutory authority for the changes in each rule is listed in the chart below.

Rule	Statutory Authority – Ohio Revised Code
4901:1-16-01 4901:1-16-02 4901:1-16-04 4901:1-16-05 4901:1-16-08 4901:1-16-11 4901:1-16-12 4901:1-16-15	4905.91 4905.911
4901:1-16-06 4901:1-16-07	4901.13

- 3. Does the regulation implement a federal requirement? Is the proposed regulation being adopted or amended to enable the state to obtain or maintain approval to administer and enforce a federal law or to participate in a federal program? If yes, please briefly explain the source and substance of the federal requirement.**

The revisions in Chapter 4901:1-16, O.A.C., are being proposed in accordance with the state directive found in Am. Sub. S.B. 315 and are not intended to further enable enforcement of federal requirements. Chapter 4901:1-16, O.A.C., enables appropriate regulation of natural gas, including federal requirements found in the Natural Gas Pipeline Safety Act of 1968, 82 Stat. 720, 49 U.S.C.A. App. 1671 et seq., as amended, as well as rules adopted by the United States department of transportation pursuant to the Natural Gas Pipeline Safety Act of 1968. The one change being made that complies with a federal requirement is the change to the definition of Transportation of Gas. This change will bring the definition into conformity with the Natural Gas Pipeline Safety Act of 1968 and bring clarity in applying Am. Sub. S.B. 315.

- 4. If the regulation includes provisions not specifically required by the federal government, please explain the rationale for exceeding the federal requirement.**

The regulation includes provisions not specifically required by the federal government, but specifically required by the state of Ohio as found in Am. Sub. S.B. 315. While the change to the definition of Transportation of Gas brings the definition into conformity with the Natural Gas Pipeline Safety Act of 1968, it was done for the purpose of allowing stakeholders to appropriately apply Am. Sub. S.B. 315.

- 5. What is the public purpose for this regulation (i.e., why does the Agency feel that there needs to be any regulation in this area at all)?**

The rules contained in this chapter prescribe gas pipeline safety and drug and alcohol testing requirements to protect the public safety, as well as procedures for the Commission to administer and enforce the gas pipeline safety code and the Natural Gas Pipeline Safety Act of 1968.

- 6. How will the Agency measure the success of this regulation in terms of outputs and/or outcomes?**

The rules contained in this chapter govern gas pipeline safety proceedings to investigate and determine an operator's compliance with the pipeline safety code, as well as to investigate and determine whether an operator's intrastate gas pipeline facility is hazardous to human life or property. This means the Commission will measure the success of this regulation in terms of positive results from investigations of pipeline facilities to ensure compliance with the gas pipeline safety code.

Development of the Regulation

- 7. Please list the stakeholders included by the Agency in the development or initial review of the draft regulation. *If applicable, please include the date and medium by which the stakeholders were initially contacted.***

The Commission conducted a workshop on August 16, 2012, at the offices of the Commission to receive feedback from interested stakeholders and the general public. The case number for the commission's review of Chapter 4901:1-16, Administrative Code, is 12-2040-GA-ORD. The entry providing notice of the workshop was served upon all gas and natural gas companies in the state of Ohio, all competitive retail gas suppliers, the Ohio Gas Association, the Ohio Oil and Gas Association, and other interested persons, including members of the general public, who have subscribed to the Commission's gas pipeline industry electronic mail list. The Commission's gas-pipeline industry electronic mail list includes over 160 subscribers. Twenty individuals attended the workshop, including representatives from: Duke Energy, Dominion East Ohio, Vectren, Enervest, Chesapeake Energy/Midstream, XTO Energy, M3 Midstream, Ohio Petroleum Council, Markwest Energy, Columbia Gas, UTI, Ohio Gas Association, and Gatherco, Inc.

- 8. What input was provided by the stakeholders, and how did that input affect the draft regulation being proposed by the Agency?**

Recommendations were provided by stakeholders at the workshop in Case No. 12-2040-GA-ORD. Some of the recommendations are as follows:

- 1) It was recommended that the definitions section of Chapter 4901:1-16, O.A.C., be revised in accordance with Am. Sub. S.B. 315. This recommendation was adopted by incorporating the definitions in Am. Sub. S.B. 315 into Rule 4901:1-16-01, O.A.C.
- 2) It was recommended that any new definitions in Rule 4901:1-16-01, O.A.C., should duplicate the new statutory definitions provided in the Am. Sub. S.B. 315. This stakeholder recommendation was adopted with regards to proposed revisions to the definitions.
- 3) It was recommended at the workshop that the definitions of operator be clarified since there are different responsibilities for different types of operators. Furthermore, the definition of operator for purposes of Section 4905.911, Revised Code, should be different from the definition of operator for the rest of the rule. This recommendation was adopted by clearly defining the terms operator and gas gathering/processing plant pipeline operator in Rule 4901:1-16-01, O.A.C., of the proposed revisions to the O.A.C. A gas gathering/processing plant pipeline operator is defined as an any person that owns, operates, manages, controls, or leases, a gas gathering pipeline or a processing plant gas stub pipeline. A gas gathering/processing plant pipeline operator is not an operator as

defined in paragraph (P) of 4901:1-16-01, but a person may be both an operator and a gas gathering/processing plant pipeline operator.

- 4) It was recommended that the rules ensure that the definition of pipeline, which includes compressor units, meters, etc., is not applied to pipelines that are only subject to Section 4905.911, Revised Code. This was adequately addressed by the revisions to the proposed rules.

9. What scientific data was used to develop the rule or the measurable outcomes of the rule? How does this data support the regulation being proposed?

No scientific data was taken into account. In adopting any changes to Chapter 4901:1-16, O.A.C., the Commission takes into account feedback from stakeholders and the general public to the rules in effect prior to the proposed changes. Stakeholder and public feedback can be made directly to the Commission by filing comments from such entities as the Ohio Consumers' Counsel, any gas or natural gas Company in the state of Ohio, any competitive retail gas supplier, the Ohio Gas Association, the Ohio Oil and Gas Association, any member of the general public, or any other entity. The language of Am. Sub. S.B. 315 was also taken into account.

10. What alternative regulations (or specific provisions within the regulation) did the Agency consider, and why did it determine that these alternatives were not appropriate? If none, why didn't the Agency consider regulatory alternatives?

No alternatives were considered. No regulatory alternatives were considered because the rules were revised strictly to bring them into accordance with Am. Sub. S.B. 315, except for the change to the definition of Transportation of Gas, which was done not to bring the rules into accordance with Am. Sub. S.B. 315 but for the appropriate and clear application of Am. Sub. S.B. 315. The only discretionary changes were minor grammatical corrections to Chapter 4901:1-16, O.A.C., and the correction of the PUCO website to reflect the appropriate URL of www.puco.ohio.gov.

11. Did the Agency specifically consider a performance-based regulation? Please explain.
Performance-based regulations define the required outcome, but don't dictate the process the regulated stakeholders must use to achieve compliance.

No performance-based regulations were considered. These were not considered because the rules were revised specifically to bring them into accordance with Am. Sub. S.B. 315.

12. What measures did the Agency take to ensure that this regulation does not duplicate an existing Ohio regulation?

The Commission has reviewed other Ohio regulations and found no duplicate. Furthermore, these changes are in response to the directives of the General Assembly through the adoption of Am. Sub. S.B. 315.

13. Please describe the Agency's plan for implementation of the regulation, including any measures to ensure that the regulation is applied consistently and predictably for the regulated community.

The Commission's plan for implementation of the proposed changes to Chapter 4901:1-16, O.A.C., is for the Service Monitoring and Enforcement Division of the Commission to implement and adopt measures that will ensure consistent and predictable application of the regulation.

Adverse Impact to Business

14. Provide a summary of the estimated cost of compliance with the rule. Specifically, please do the following:

a. Identify the scope of the impacted business community;

The scope of the business community impacted by the proposed revisions to Chapter 4901:1-16, O.A.C., includes any business engaged in the operation, design, construction, installation, or inspection of gas lines or infrastructure. Any negative financial impact to the business community would be offset by an incrementally greater increase in safety and security of the operation, design, construction, installation, and inspection of the natural gas infrastructure of the state of Ohio.

b. Identify the nature of the adverse impact (e.g., license fees, fines, employer time for compliance); and

The proposed revisions were drafted in an effort to minimize any adverse impact on business, while complying with the directives of the Ohio General Assembly in Am. Sub. S.B. 315. The proposed revisions are intended to improve the safety and operation of the natural gas infrastructure of the state of Ohio. One recognized adverse impact includes a potential short term adverse impact on business as a result of businesses complying with an unfamiliar and new regulation.

c. Quantify the expected adverse impact from the regulation. *The adverse impact can be quantified in terms of dollars, hours to comply, or other factors; and may be*

*estimated for the entire regulated population or for a “representative business.”
Please include the source for your information/estimated impact.*

15. Why did the Agency determine that the regulatory intent justifies the adverse impact to the regulated business community?

The Commission did not make a determination that the regulatory intent justifies the adverse impact to the regulated business community; rather the Commission determined that, under Am. Sub. S.B. 315, it was required to incorporate the provisions amending Sections 4905.03 to 4905.04, and 4905.90 to 4905.96, Revised Code, into Chapter 4901:1-16, O.A.C.

Regulatory Flexibility

16. Does the regulation provide any exemptions or alternative means of compliance for small businesses? Please explain.

No, the rules do not provide any exemptions or alternative means of compliance. The rules address gas pipeline safety to ensure that intrastate gas pipeline facilities are not hazardous or dangerous. An exemption or alternative means of compliance would not be appropriate and could pose hazard or danger to the public.

17. How will the agency apply Ohio Revised Code section 119.14 (waiver of fines and penalties for paperwork violations and first-time offenders) into implementation of the regulation?

The revisions to Chapter 4901:1-16, O.A.C., are specifically to accommodate statutory changes made by Am. Sub. S.B. 315. The focus of the review process was not on seeking penalties for first-time paperwork offenses. Fines and penalties for violating Chapter 4901:1-16, O.A.C., may only be ordered by the Commission after notice and hearing. The Commission will fully comply with Section 119.14, Revised Code, and not seek to recover administrative fines or civil penalties on any small business for a first-time paperwork violation, unless such violation falls within one of the exceptions set forth in paragraph (C) of that section and without providing adequate due process to the small business.

18. What resources are available to assist small businesses with compliance of the regulation?

The Commission works with small businesses to ensure compliance with the rules. In Commission Case No. 12-2040-GA-ORD, stakeholders and the general public, including small businesses, were invited to participate in a workshop to discuss potential revisions to the rules to decrease or eliminate any negative effects on business. Small businesses may contact the Commission at any time and may comment on the proposed revisions during the open comment period once the proposed revisions have been released via Commission Entry.
