Re: Oregon Clean Energy, LLC
Case No. 12-2959-EL-BGN

Dear Ms. McCauly:

I am enclosing for filing in the above-referenced matter, the proof of publication attesting to the publication of the Notice for the Informational Meeting for Proposed Major Utility Facility in *The Press* which arrived in our office today. This notice was published on November 19, 2012.

We have previously filed the Affidavit of Publication from *The Toledo Blade* on November 26, 2012.

Sincerely,

Sally W. Bloomfield

THE CITY OF NORTHWOOD WISHES TO REMIND MOTORISTS OF THE REGULATION PROHIBITING PARKING DURING PERIODS OF SNOWFALL

This regulation prohibits all on ALL City streets whenever two inches of snow has fallen and there is a prospect of further snowfall. All vehicles parked on City streets prior to the time weather conditions prohibited parking must be removed by the owner or operators thereof. Any vehicles parked in violation of this prohibition may be removed at the order of the Chief of Police or his or her designee, and may subject the owner or operator to fines as well as any applicable towing charges.

The Police Department shall use all available means of disseminating information as to the existence of weather conditions requiring removal of parked motor vehicles from City Streets. Such notice shall be disseminated through the radio, newspaper and all available media to the extent feasible. However, the dissemination of this information shall not relieve owners or operators of motor vehicles from the responsibility of ascertaining the existence of weather conditions requiring the removal of parked motor vehicles from City streets.

Notice of Public Informational Meeting for Proposed Major Utility Facility

Oregon Clean Energy, LLC Schedules November 29, 2012 Public Meeting to Outline Plans for a 800 Megawatt Gas Fired Generation Plant To Be Built in Oregon, Ohio

Oregon Clean Energy, LLC invites residents of Oregon, Ohio and other interested members of the public, to attend a public informational meeting regarding company plans to build an 800 megawatt (MW) gas fired, combined cycle power station.

The electric generating facility will be located on approximately 30 acres in a commercial/industrial zoned area located on North Lallendorf Road near the intersection of York Road in the City of Oregon, Lucas County, Ohio.

The project will consist of two gas fired, high efficiency combustion turbines with two heat recovery steam generators and a single steam turbine. It will have a cooling tower and state of the art pollution controls. The plant will be served by natural gas from one or multiple pipelines. The generating station will be interconnected at two points to allow for both north-south and east-west access to electric transmission facilities. Water and wastewater services will be supplied by the City of Oregon. Construction of the project is estimated to begin in fall 2013, with projected commercial operation to begin in mid-2016.

This facility will fill a need caused by the retirement in the next several years of several coal fired generating stations in northeastern Ohio that will reduce the regional electricity capacity by 1,611 MW.

The public meeting will take place from 6:00 p.m. to 7:30 p.m., on Thursday, November 29, 2012 at the City Council Meeting Room, 5330 Seaman Road, Oregon Ohio, 43616. Company representatives will present stations throughout the room with each having information about the various aspects of the project, and they will be available to respond to inquiries from those attending.
