QUESTION DESCRIPTION:

Comment: My Dec 11 2012 billing rate (\$0.0943/KWH) was 30% higher than my Dec 11 2011 billing rate (\$0.0726). 20% of that 30% rate increase was attributed to riders approved by PUCO.

Question: Is there available a reasonably understandable comparison of the rate increases over the last 12 months for residential, industrial, and commercial electric power available? It would be my purpose to understand whether residential customers are shouldering a larger share of the increase than industrial and commercial consumers.
