Chairman Todd Snitchler
OH

Dear Chairman Snitchler,

Ohio's dependence on coal and oil has gone on too long. In the 21st century we shouldn't be getting 82 percent of our electricity by burning coal. Its time Ohio moved forward to embrace proven pollution-free technologies like solar power. Turning Point Solar is clean, ready-to-go and a genuine step in the right direction. Please move Ohio's clean energy future forward by approving Turning Point Solar.

Not only will Turning Point provide much needed investment to our state, helping to create more than 300 green jobs, it will help displace coal-fired generation that would emit over 70,000 tons of global warming pollution each year. If Ohio is going to get serious about clean energy we need to double down on solar power and projects like Turning Point.

Sincerely

Mary Hickey

OH

Dear Chairman Snitchler,

Ohio's dependence on coal and oil has gone on too long. In the 21st century we shouldn't be getting 82 percent of our electricity by burning coal. Its time Ohio moved forward to embrace proven pollution-free technologies like solar power. Turning Point Solar is clean, ready-to-go and a genuine step in the right direction. Please move Ohio's clean energy future forward by approving Turning Point Solar.

Not only will Turning Point provide much needed investment to our state, helping to create more than 300 green jobs, it will help displace coal-fired generation that would emit over 70,000 tons of global warming pollution each year. If Ohio is going to get serious about clean energy we need to double down on solar power and projects like Turning Point.

Sincerely

Grace Freundlich
490 Cedarwood Dr

Please move Ohio's clean energy future forward by approving Turning Point Solar.

I teach an upper level course on anthropogenic climate change at John Carroll University. Having followed this issue for thirty years, I have become increasingly alarmed by the rate of warming and by the lack of political will to do anything to reduce our carbon emissions. I encourage you or your staff to examine the recent report by the World Bank on climate change. It reflects the scientific consensus on anthropogenic climate change and gives a much clearer analysis on the economics of climate change in the coming 80 years than the IPCC reports. Politicians of both parties need to move forward in addressing this challenge that will only become more intractable with the passage of time.

Jan 9, 2013

Chairman Todd Snitchler
OH

Dear Chairman Snitchler,

Ohio's dependence on coal and oil has gone on too long. In the 21st century we shouldn't be getting 82 percent of our electricity by burning coal. It's time Ohio moved forward to embrace proven pollution-free technologies like solar power. Turning Point Solar is clean, ready-to-go and a genuine step in the right direction. Please move Ohio's clean energy future forward by approving Turning Point Solar.

Not only will Turning Point provide much needed investment to our state, helping to create more than 300 green jobs, it will help displace coal-fired generation that would emit over 70,000 tons of global warming pollution each year. If Ohio is going to get serious about clean energy we need to double down on solar power and projects like Turning Point.

Sincerely

Votir Gentner

It's time Ohio moved forward to embrace proven pollution-free technologies like solar power. Turning Point Solar is clean, ready-to-go and a genuine step in the right direction. Please move Ohio's clean energy future forward by approving Turning Point Solar.

Ohio should be a leader in the wind/solar power industry. As I drive through New York, I see that they are already well ahead of Ohio.

Let's make our state a model for others to follow. This creates jobs, PR opportunities, positive news attention, and a cleaner future for our children.

Sincerely
