1	1.	INTRODUCTION
2		
3	<i>Q1</i> .	PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
4	<i>A1</i> .	My name is David J. Effron. My address is 12 Pond Path, North Hampton, New
5		Hampshire, 03862.
6		
7	<i>Q2</i> .	WHAT IS YOUR PRESENT OCCUPATION?
8	<i>A2</i> .	I am a consultant specializing in utility regulation.
9		
10	<i>Q3</i> .	PLEASE SUMMARIZE YOUR PROFESSIONAL EXPERIENCE.
11	<i>A3</i> .	My professional career includes over thirty years as a regulatory consultant, two years
12		as a supervisor of capital investment analysis and controls at Gulf & Western
13		Industries and two years at Touche Ross & Co. as a consultant and staff auditor. I am
14		a Certified Public Accountant and I have served as an instructor in the business
15		program at Western Connecticut State College.
16		
17	<i>Q4</i> .	WHAT EXPERIENCE DO YOU HAVE IN THE AREA OF UTILITY RATE
18		SETTING PROCEEDINGS AND OTHER UTILITY MATTERS?
19	A4.	I have analyzed numerous electric, gas, telephone, and water filings in different
20		jurisdictions. Pursuant to those analyses, I have prepared testimony, assisted
21		attorneys in case preparation, and provided assistance during settlement negotiations
22		with various utility companies.

1		I have testified in over three hundred cases before regulatory commissions in
2		Alabama, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Kansas,
3		Kentucky, Maine, Maryland, Massachusetts, Missouri, Nevada, New Jersey, New
4		York, North Dakota, Ohio, Pennsylvania, Rhode Island, South Carolina, Texas,
5		Vermont, Virginia, and Washington.
6		
7	Q5.	PLEASE DESCRIBE YOUR OTHER WORK EXPERIENCE.
8	A5.	As a supervisor of capital investment analysis at Gulf & Western Industries, I was
9		responsible for reports and analyses concerning capital spending programs, including
10		project analysis, formulation of capital budgets, establishment of accounting
11		procedures, monitoring capital spending, and administration of the leasing program.
12		At Touche Ross & Co., I was an associate consultant in management services for one
13		year, and a staff auditor for one year.
14		
15	<i>Q6</i> .	HAVE YOU EARNED ANY DISTINCTIONS AS A CERTIFIED PUBLIC
16		ACCOUNTANT?
17	<i>A6</i> .	Yes. I received the Gold Charles Waldo Haskins Memorial Award for the highest
18		scores in the May 1974 certified public accounting examination in New York State.
19		
20	<i>Q7</i> .	PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND.
21	<i>A7</i> .	I have a Bachelor's degree in Economics (with distinction) from Dartmouth College
22		and a Masters of Business Administration Degree from Columbia University.
23		

1	<i>Q8</i> .	ON WHOSE BEHALF ARE YOU TESTIFYING?
2	A8.	I am testifying on behalf of the Office of the Ohio Consumers' Counsel ("OCC").
3		
4	<i>Q9</i> .	WHAT IS THE PURPOSE OF YOUR TESTIMONY?
5	A9.	My testimony supports certain objections OCC raised to the Staff Report of
6		Investigation ("Staff Report") by the Staff of the Public Utilities Commission of
7		Ohio ("Commission" or "PUCO") in this proceeding. I address certain revenue
8		requirement issues that affect the revenue deficiency of Duke Energy Ohio, Inc.
9		("Duke" or "the Utility"). In particular, I address issues affecting the determination
10		of rate base and adjusted operating income under present rates, based on the test
11		year consisting of the twelve months ending December 31, 2012.
12		
13	Q10.	WHAT DOCUMENTS DID YOU REVIEW IN PREPARING YOUR
14		TESTIMONY?
15	A10.	I reviewed the Utility's testimony, exhibits, workpapers and the Utility's responses
16		to discovery and data requests propounded by the OCC and by the PUCO Staff. I
17		also reviewed the Staff Report, supporting workpapers, and certain relevant
18		Commission Opinions and Orders in other cases.
19		

1	II.	REVENUE REQUIREMENT ISSUES
2		
3		A. Deferred Tax Debit Balances
4		
5	Q11.	HAVE YOU ANALYZED THE BALANCE OF ACCUMULATED DEFERRED
6		INCOME TAXES ("ADIT") REFLECTED BY THE STAFF IN ITS
7		DETERMINATION OF THE UTILITY'S DATE CERTAIN RATE BASE?
8	<i>A11</i> .	Yes. The details of the balance of ADIT are shown on Schedule B-6 of the Staff
9		Report. The ADIT balances consist of both credit balances that reduce the rate base
10		and debit balances that increase rate base. These ADIT balances are components of
11		the "Other Rate Base Items" included by both the Utility and the Staff in the
12		determination of rate base.
13		
14	Q12.	ARE YOU PROPOSING ANY ADJUSTMENTS TO THE ADIT BALANCES
15		THAT THE STAFF INCLUDES IN THE BALANCE OF "OTHER RATE
16		BASE ITEMS"?
17	A12.	Yes. Account 190 includes certain deferred tax debit balances that are related to
18		accrued liabilities or reserves. One of those items is the "Tax Interest Accrual" of
19		\$2,051,000. The accrued liability for tax interest is not deducted from rate base,
20		and to be consistent, the deferred tax debit balance related to that accrued liability
21		should not be included in rate base.
22		

1	<i>Q13</i> .	WHAT IS THE EFFECT OF ELIMINATING THIS DEFERRED TAX
2		BALANCE FROM THE UTILITY'S RATE BASE?
3	A13.	As noted above, the deferred tax debit balance on the Tax Interest Accrual is
4		\$2,051,000. This is partially offset by a credit balance related to the Tax Interest
5		Accrual of \$727,000 in Account 283. Thus, the net effect of removing the deferred
6		income taxes related to the Tax Interest Accrual is to reduce the Utility's rate base
7		by \$1,324,000. (Schedule DJE-B-6a and OCC Schedule B-6 attached to OCC
8		Witness Ibrahim Soliman's testimony.)
9		
10		B. Sales and Revenue
11		
12	Q14.	HAS THE STAFF ADJUSTED THE UTILITY'S TEST YEAR SALES AND
13		REVENUES?
14	A14.	Yes. The Staff's adjustments to test year sales are summarized on Schedule C-3.1
15		of the Staff Report. The adjustments are supported by Staff Workpapers WPC-3.1a
16		and Staff Schedule E-4, page 2, which shows the Staff's adjusted test year sales and
17		base rate revenues under present rates by rate class. As explained on Page 10 of the
18		Staff Report, "Staff adjusted test year revenue according to an average
19		consumption per customer methodology" for those rate classes "where revenue
20		was driven by KWh usage." By far, the largest component of the Staff's
21		adjustment relates to sales to Rate RS – Residential Service customers.

1	<i>Q15</i> .	BASED ON YOUR REVIEW AND ANALYSIS, ARE YOU PROPOSING ANY
2		FURTHER ADJUSTMENTS TO TEST YEAR SALES AND REVENUES
3		UNDER PRESENT RATES?
4	A15.	Yes. Test year sales to Rate Class DS – Secondary Distribution Service should be
5		adjusted. The Utility reflects test year sales of 6,366,398 MWh to Rate DS
6		customers and the Staff did not adjust sales or revenues for that rate class. Based
7		on Staff workpapers, sales to DS customers ranged from 6,506,879 MWh to
8		6,656,712 MWh in the three years 2009 – 2011. ¹
9		
10		The test year DS sales are well below the sales levels in the most recent three
11		years. Based on Staff workpapers, the actual DS kWh sales in the months after
12		March in 2012 (the basis for the Staff adjustments to other rate classes) was also
13		well in excess of the Utility's forecasts for those months. ² Evidently, the only
14		reason that the Staff did not adjust test year sales to DS customers is that
15		customers in that rate class are billed on kW demand rather than on kWh energy
16		consumption. However, this does not mean that revenue is not "driven by kWh
17		usage." To the extent that kWh sales increase, it is reasonable to expect that kW
18		demand and revenue would also increase, unless there was some significant
19		change in the customers' load factor.
20

9

10

11

15

17

18

19

20

21

In fact, the Staff also obtained data on the billed kW in recent periods. The data show that the test year kW of 19,984,780 for rate DS were well below the actual kW in any of the years 2009 - 2011, which ranged from 20,700,710 to 20,805,891. Just as with the kWh sales to DS customers, the actual DS kW demand in the months after March in 2012 (for those months for which such data were available) was also well in excess of the Utility's forecasts for those months. 7 Regardless of whether the test year billings to DS customers are based on kWh or kW, the billing determinants reflected by the Utility and adopted by the Staff are not reflective of the normal level of billing determinants that can reasonably be expected, although they should be. Therefore, the test year DS billing 12 determinants and revenues should be adjusted to reflect a normal level of sales to 13 DS customers. 14 *016*. HOW DO YOU PROPOSE TO ADJUST THE UTILITY'S TEST YEAR DS 16 **BILLING DETERMINANTS?** A16. For the three years 2009 – 2011, the average level of kWh sales to DS customers was 3.05% above the sales reflected by the Utility for the 2012 test year; and the average level of kW demand billed to DS customers was 3.91% above the kW demand reflected by the Utility for the 2012 test year. In other words, the Utility not only reflected a lower than normal level of DS kWh sales in the 2012 test 22 year, but also assumed that the load factor for DS customers would be higher in 23 2012 than it has been in recent years. To be conservative, I am incorporating the

1		higher load factor assumed by the Utility and proposing to increase the test year
2		kW by 3.05% (based on the higher level of kWh sales in the years 2009-2011) to
3		recognize a more normal level of DS revenues in the calculation of adjusted
4		operating income under present rates.
5		
6	Q17.	WHAT IS THE EFFECT OF YOUR PROPOSED MODIFICATION TO THE
7		TEST YEAR KW DEMAND FOR RATE DS CUSTOMERS REFLECTED BY
8		THE STAFF?
9	A17.	My proposed adjustment increases adjusted test year revenues under present rates
10		by \$2,854,000 (Schedule DJE-C-3.1a). This adjustment to Rate DS billing
11		determinants should be included in the calculations of adjusted test year operating
12		income under present rates and in the determination of the rates necessary to
13		produce the Utility's required revenues. The adjustment to revenues is reflected
14		on OCC Schedule C-3.1 attached to OCC Witness Soliman's testimony.
15		
16		C. Medical Costs
17		
18	Q18.	DID DUKE PROPOSE A PRO FORMA ADJUSTMENT TO TEST YEAR
19		MEDICAL EXPENSES FOR ESTIMATED FUTURE INCREASES IN SUCH
20		COSTS?
21	A18.	Yes. The medical costs included in operation and maintenance expenses represent
22		the current health care coverage of active employees. On its Schedule C-3.27, Duke
23		adjusted test year expenses to reflect expected increases in medical costs. This

1 adjustment reflects an expected increase of 8.5% to medical costs. It should be noted 2 that this is in addition to the change in medical costs implicitly recognized in the 3 adjustment to pensions and benefits on Duke's Schedule C-3.17. 4 5 DID THE STAFF ADOPT DUKE'S PROPOSED ADJUSTMENT TO TEST *019*. 6 YEAR MEDICAL EXPENSES? 7 A19. Yes. Schedule C-3.27 of the Staff Report reflects an adjustment to test year 8 medical costs. The Staff's adjustment differs from Duke's because the Staff's 9 adjustment is based on a lower level of annualized electric operation and 10 maintenance labor, but the Staff accepts the basic premise of an 8.5% escalation to 11 medical expenses. 12 13 *O20*. IS THIS ADJUSTMENT APPROPRIATE? 14 A20. No. It is not an adjustment for a known and measurable change. In response to OCC 15 Interrogatory No. 03-41, Duke stated that the basis for this adjustment is that 16 "medical inflation assumptions for the near future assume a rate greater than 8%." In 17 other words, this adjustment is not based on actually known increases to premiums 18 that Duke pays for medical insurance or an actually known increase in the level of 19 medical costs. Rather, it is an estimate of the medical inflation that Duke believes it 20 may experience and is the assumed effect of such estimated inflation on medical 21 expenses subsequent to the test year. Nothing in this adjustment reflects any known change to the 2012 test year medical costs or anything specific to the medical costs 22 23 actually incurred by Duke.

1	<i>Q21</i> .	WHAT DO YOU RECOMMEND?
2	<i>A21</i> .	I recommend that the 8.5% increase to test year medical costs be eliminated from
3		the determination of pro forma test year operation and maintenance expenses. It is
4		not a known and measurable change to the level of test year expenses; rather it is an
5		estimate of increases to medical costs that the Utility expects may take place after
6		the test year.
7		
8	Q22.	WHAT IS THE EFFECT OF YOUR RECOMMENDATION TO ELIMINATE
9		THE 8.5% ESCALATION TO MEDICAL COSTS?
10	A22.	The effect is to reduce the medical costs included in pro forma operation and
11		maintenance expenses by \$708,000 (Schedule DJE-3.27a and Schedule OCC 3.27
12		accompanying the testimony of OCC Witness Soliman).
13		
14		D. Uncollectible Accounts Expense
15		
16	Q23.	HAVE YOU ANALYZED DUKE'S DETERMINATION OF ADJUSTED TEST
17		YEAR UNCOLLECTIBLE ACCOUNTS EXPENSE?
18	A23.	Yes. The Utility calculated the adjusted test year uncollectible accounts expense by
19		applying an uncollectible expense factor of 0.5425% to test year revenues (as
20		adjusted to eliminate revenues not subject to being uncollectible). The 0.5425%
21		factor represents the collection costs and time value of money used to develop the
22		discount rate Duke applied to its sale of receivables. Thus, the "uncollectible"
23		expense included in test year expenses is actually the cost incurred by Duke in the

1		process of selling its accounts receivable. The Staff accepted Duke's 0.5425%
2		uncollectible expense factor for the purpose of calculating adjusted test year
3		uncollectible accounts expense.
4		
5	Q24.	ARE YOU PROPOSING TO ADJUST THE TEST YEAR UNCOLLECTIBLE
6		EXPENSE FACTOR?
7	A24.	Yes. As seen on Duke workpaper WPA-2a, the 0.5425% factor is based on the
8		average collection cost and time value of money rates for the twelve months ended
9		March 31, 2012. The time value of money component was approximately 0.53% in
10		the last nine months of 2011 and approximately 0.36% in the first three months of
11		2012. In response to OCC Interrogatory No. 03-36, Duke explained that the
12		discount rate in January 2012 was adjusted to reflect the decline in interest rates
13		over the last few years. As seen in the response to OCC Interrogatory No. 03-37
14		(Attachment DJE-1), the lower time value discount rate continued at least through
15		August 2012. The discount rate used in the calculation of the pro forma
16		uncollectible accounts expense should be adjusted to reflect the actual average rate
17		in 2012, which is the latest known rate at the time of the preparation of this
18		testimony.
19		
20	Q25.	WHAT IS THE EFFECT OF UPDATING THE TIME VALUE FACTOR TO
21		REFLECT THE LATEST KNOWN DISCOUNT RATE?
22	A25.	Through the first eight months of 2012, the actual average time value percentage
23		was 0.3603% (Schedule DJE-C-3.16a). This compares to an average time value

1		percentage of 0.4925% for the twelve months ended March 31, 2012.
2		Substituting the average time value percentage of 0.3603% into the calculation of
3		the total uncollectible expense factor, the result is a factor of 0.4103%. Applying
4		this factor to revenues of \$497,742,000, the adjusted test year uncollectible
5		accounts expense is \$2,042,000. This is \$643,000 less than the annualized
6		uncollectible accounts expense of \$2,685,000 calculated by the Staff on Workpaper
7		WPC-3.16a. I recommend that test year uncollectible accounts expense be adjusted
8		accordingly. (See OCC Schedule 3.16 attached to the testimony of Witness
9		Soliman.)
10		
11		The uncollectible accounts expense factor also goes into the calculation of the
12		gross revenue conversion factor. The gross revenue conversion factor should be
13		modified to incorporate a revised uncollectible accounts expense factor of
14		0.4103%, which is reflected on OCC Schedule A-2 attached to the testimony of
15		Witness Soliman.
16		
17		E. Depreciation Expense
18		
19	Q26.	HAVE YOU REVIEWED THE PRO FORMA DEPRECIATION EXPENSE
20		THE STAFF INCLUDED IN THE UTILITY'S REVENUE REQUIREMENT?
21	A26.	Yes. The details of the annual test year depreciation expense by plant account are
22		shown on Schedule B-3.2 of the Staff Report.

1	<i>Q</i> 27.	BASED ON YOUR REVIEW, SHOULD THE TEST YEAR DEPRECIATION
2		EXPENSE CALCULATED BY THE STAFF BE MODIFIED?
3	A27.	Yes. Both General Plant and Common Plant include balances of Miscellaneous
4		Intangible Plant. The Miscellaneous Intangible Plant consists mainly of
5		capitalized software costs being depreciated over various periods of time. The
6		annual depreciation expense on General Miscellaneous Intangible Plant is
7		\$2,030,000, and the annual depreciation expense on Common Miscellaneous
8		Intangible Plant is \$3,133,000. Certain of the vintages of intangible plant became
9		fully depreciated during the test year. In addition, the depreciation on certain
10		other vintages of intangible plant is inconsistent with supporting data provided by
11		the Utility. Therefore, I am proposing to modify the amortization of intangible
12		plant included in pro forma test year operating expenses.
13		
14	Q28.	PLEASE EXPLAIN YOUR PROPOSED MODIFICATIONS TO THE
15		AMORTIZATION OF INTANGIBLE PLANT.
16	A28.	My proposed adjustments to the amortization of intangible plant are summarized
17		on my Schedule DJE-C-3.5a. First, the 2001 and 2007 vintages of general
18		intangible plant became fully amortized in the 2012 test year. Therefore, the
19		amortization of these vintages should be eliminated on a pro forma basis. With
20		regard to the 2010 vintage on general intangible plant, Duke's response to OCC
21		Request for Production of Documents No. 03-19 (Attachment DJE-2) shows a
22		cost basis of \$314,000 and an allocated reserve of \$1,635,000 as of the date
23		certain in this case. Obviously, a plant balance with a cost basis of \$314,000

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

should not have an allocated reserve of \$1,635,000 (or more than five times higher than the value of the plant). In addition, Duke's response to OCC Interrogatory No. 09-130 (Attachment DJE-3) shows annual depreciation of \$1,205,000 on the 2010 vintage. Again, a plant balance with a cost basis of \$314,000 should not have annual depreciation of \$1,205,000 (almost four times higher than the value of the plant). Unless these discrepancies can be clarified, the amortization of the 2010 vintage of general intangible plant should also be eliminated. I am proposing to eliminate total general intangible plant amortization of \$1,345,000. On a jurisdictional basis, this results in a reduction of \$1,241,000 to depreciation and amortization of general plant. With regard to common intangible plant, the 2002 and 2007 vintages of common intangible plant became fully amortized in the 2012 test year. Elimination of the amortization of these vintages reduces the pro forma amortization of common intangible plant by \$1,143,000. On a jurisdictional basis, this adjustment reduces the depreciation and amortization of common plant allocable to electric distribution operations by \$428,000.

1	<i>Q29</i> .	PLEASE SUMMARIZE YOUR PROPOSED ADJUSTMENTS TO PRO
2		FORMA TEST YEAR DEPRECIATION EXPENSE.
3	A29.	I am proposing to reduce pro forma test year depreciation and amortization of
4		general plant by \$1,241,000 and pro forma test year depreciation and amortization
5		of common plant by \$428,000. My total proposed adjustment to test year
6		depreciation and amortization expense is a reduction of \$1,669,000. (Schedule
7		DJE-3.5a.) These adjustments are reflected on OCC Schedule C-3.5
8		accompanying the testimony of Mr. Soliman.
9		
10	<i>Q30</i> .	DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
11	A30.	Yes. However, I reserve the right to incorporate new information that may
12		subsequently become available. I also reserve the right to supplement my
13		testimony in the event that Duke, the PUCO Staff or other parties submit new or
14		corrected information or if additional information is provided through discovery.

CERTIFICATE OF SERVICE

I hereby certify that a true copy of the foregoing *Direct Testimony of David J*.

Effron was served electronically to the persons listed below this 19th day of February 2013.

Duke Energy Ohio Case No. 12-1682-EL-AIR OCC Ninth Set of Interrogatories Date Received: October 24, 2012

OCC-INT-09-130

REQUEST:

Referring to the response to OCC-POD-03-019, what is the annual amortization for each of the vintages?

RESPONSE:

See attachment "OCC-INT-09-130."

PERSON RESPONSIBLE: Dan Reilly
