of Lordstown, Trumbull County, OH High Pressure)	
Distribution Line.)	

**DOMINION EAST OHIO GAS'
SUPPLEMENT TO CONSTRUCTION NOTICE**

On February 15, 2013, the Ohio Power Siting Board staff issued its Staff Report which contained the nine conditions listed below:

- (1) The Applicant will coordinate all traffic related issues with the appropriate entities to ensure that traffic will be maintained along public roadways and private drives during construction.
- (2) The Applicant shall obtain and comply with all applicable permits and authorizations as required by federal and state laws and regulations for any activities where such permit or authorization is required. Copies of such permits and authorizations, including all supporting documentation shall be provided to Staff. The Applicant shall provide a schedule of construction activities and acquisition of corresponding permits for each activity at the preconstruction conference;
- (3) The Applicant shall conduct a pre-construction conference prior to the start of any project work (including any vegetation clearing), which the Staff shall attend, to discuss how environmental concerns will be satisfactorily addressed;
- (4) The Applicant shall utilize BMPs when working in the vicinity of environmentally sensitive areas. This includes, but is not limited to, the installation of silt fencing (or similarly effective tool) prior to initiating construction near streams and wetlands. The installation shall be done in accordance with generally accepted construction methods and shall be inspected regularly;
- (5) At least thirty (30) days before the pre-construction conference, the Applicant shall submit to the Staff, for review and approval, a project construction access plan. This plan shall include all laydown areas, directional drilling bore pit locations, residential and environmentally sensitive area access points, and any locations where vegetation clearing is required. The plan shall consider the

location of residential fencing, private structures , streams, wetlands, and wooded areas;

- (6) The Applicant shall adhere to seasonal cutting dates of September 30 through April 1 for removal of suitable Indiana bat habitat trees, if avoidance measures cannot be achieved;
- (7) The Applicant shall not conduct any below ground construction activities (i.e., trenching or horizontal directional drilling) in or near wetlands until May 15th to avoid potential impacts to the Eastern massasauga rattlesnake. However, above ground construction activities (i.e., tree clearing) can still occur as proposed by the Applicant.
- (8) That the Applicant shall avoid, where possible, any damage to field drainage systems resulting from construction of the facility in agricultural areas. Damaged systems shall be repaired to at least original conditions at Applicant's expense. Severely compacted soils shall be plowed, if necessary, to restore them to original condition;
- (9) That the Applicant shall remove all temporary gravel and other construction laydown area and access road materials shortly after completing construction activities.

By this submission, Dominion East Ohio Gas ("DEO") incorporates the above conditions as a supplement to its Construction Notice filed January 14, 2013, and requests that this supplement be considered part of DEO's application.

Respectfully submitted on behalf of,
DOMINION EAST OHIO GAS
