**Re: Construction Notice for Brunstetter Connection, Village  
of Lordstown, Trumbull County, Ohio High Pressure  
Distribution Line, OPSB Case No. 13-203-GA-BNR**

Dear Ms. McNeal:

On February 22, 2013, Dominion East Ohio's ("DEO") submitted its Project Construction Access Plan map which showed, among other things, two potential lay down areas for this project. The project still has two lay down areas, but the location has changed for one of the areas. The owner of one of the locations no longer wishes his property to be used and thus the company now plans its lay down area in a location north of the originally proposed site.

Attached is a copy of the revised map which shows the proposed lay down areas for this project. No ecological or social issues will be affected by the move to the new location.

If you have any questions please call at the number listed above.

Sincerely,

Sally W. Bloomfield

**Vegetative clearing is required within the entire Project Area, with exceptions occurring within and near streams and wetlands.**

# A-5.1

This figure shows an aerial view of a construction site. A yellow bounding box highlights a specific area of interest, which appears to be a large, irregularly shaped pile of earth or debris. An orange line is drawn horizontally across the bottom of the yellow box. The surrounding area includes various construction materials, equipment, and structures.

**Vegetative clearing is not required along access roads as these areas are not located in environmentally sensitive areas.**

**Vegetative clearing is required within the entire Project Area, with exceptions occurring within and near streams and wetlands.**
