SUBJECT: Case No. 13-811-EL-RDR
89-6006-EL-TRF

Dear Mrs. McNeal:

In response to and compliance with the Orders of August 25, 2010 and July 18, 2012, in Case Nos. 10-388-EL-SSO and 12-1230-EL-SSO, respectively, please file the attached tariff pages on behalf of Ohio Edison Company. These tariff pages reflect changes to Rider GEN and its associated pages, which are being provided as part of the audit application for Rider GEN..

Please file one copy of the tariffs in Case Nos. 13-811-EL-RDR and 89-6006-EL-TRF, and two copies to the Staff. Thank you.

Sincerely,

Eileen M. Mikkelsen

BACKGROUND

Pursuant to the July 18, 2012 Opinion and Order in Case No. 12-1230-EL-SSO¹, Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company (“Companies”) hereby file their application for the review of the Companies’ Generation Service Rider (“Rider GEN”). Pursuant to the schedule agreed to with the Commission Staff (“Staff”), the application for review of Rider GEN is to be filed in May of each year. The Companies submit Rider GEN and the associated work papers for the year beginning June 1, 2013.

1. The Companies are public utilities as defined in Section 4905.02, Revised Code.
2. On March 23, 2010, the Companies filed an application for an SSO in accordance with Sections 4928.141 and 4928.143, Revised Code, in Case No. 10-388-EL-SSO. A stipulation was included with the application, containing for the period beginning June 1, 2011 and ending May 31, 2014 a provision that retail generation rates will be determined pursuant to the results of a descending-clock format competitive bid process, including any costs associated with administering the procurement process, adjustments for losses and seasonality, and costs associated with any necessary contingency process.²
3. The stipulation provided that the pricing resulting from the outcome of the competitive bidding process shall be recovered through Rider GEN.³
4. Additionally, the stipulation specified that the capacity costs that result from the PJM capacity auctions will be used to develop capacity costs for Rider GEN. The PJM

³ Stipulation and Recommendation, Case No. 10-388-EL-SSO, page 7, Section A.1.

capacity costs from the auctions for each year will be allocated to the Companies and to each tariff schedule for each Company based on the average of the coincident peaks, including distribution losses, for the months of June through September of the prior year. The allocated capacity costs will be used to develop a kWh charge for each tariff schedule under the capacity charge section of Rider GEN. The PJM capacity costs auction results at the wholesale level, converted to an energy basis, will be subtracted from the auctions results under part 2 described above to develop the non-capacity related energy charge for Rider GEN.⁴

5. Furthermore, the stipulation states that the time differentiated pricing concepts as proposed by the Companies and approved by the Commission in Case No. 09-541-EL-ATA shall continue in effect through the term of the ESP.⁵ Included in these time differentiated pricing concepts approved by the Commission is the Time-of-Day option under Rider GEN.

DOCUMENTATION

In accordance with the Commission's Order in Case No. 12-1230-EL-SSO, the Companies submit the following Exhibits:

- Exhibit A: Rider GEN – Rate Design (Tariff Effective June 1, 2013)
- Exhibit B: Rider GEN (TOD) – Rate Design Time-of-Day Option (Tariff Effective June 1, 2013)
- Exhibit C: Rider GEN – 2013 Effective Tariff Sheets

⁴ Stipulation and Recommendation, Case No. 10-388-EL-SSO, pages 10-11, Section A.5.iv.

⁵ Stipulation and Recommendation, Case No. 10-388-EL-SSO, page 31, Section H.3.

CONCLUSION

WHEREFORE, having complied with the Commission's Order in Case No. 12-1230-EL-SSO, the Companies await further direction from the Staff on how it wishes to proceed with the annual review of Rider GEN.

Respectfully submitted,

/s/ James W. Burk

RIDER GEN
Generation Service Rider**APPLICABILITY:**

For customers taking the Standard Service Offer electric generation service (“SSO Generation Service”) from the Company, the following Standard Service Offer Generation Charges (SSOGC) by rate schedule, will apply, effective for service rendered beginning June 1, 2013, for all kWhs per kWh, unless otherwise noted:

Capacity costs resulting from annual PJM auctions (including the PJM-administered Fixed Resource Requirement auctions conducted in March 2010) will be calculated by Company and by tariff schedule based on the average of coincident peaks, including distribution losses, for the months of June through September of the year prior to the year in which the auction occurred. The calculated wholesale capacity costs are used to develop capacity charges.

These calculated wholesale capacity costs will be converted to an energy basis and will then be subtracted from the SSO CBP results to develop the non-capacity related energy charges.
