Our coverage maps provide high-level estimates of our coverage areas when using your device outdoors under optimal conditions. Coverage is coverage and signal strength is not an exact science.

There are gaps in coverage within our estimated coverage areas that, along with other factors both within and beyond our control (network problems, device, structures, buildings, weather, geography, topography, etc.), will result in dropped and blocked connections, slower data speeds, or other issues.

Services that rely on location information, such as E911 and GPS navigation, depend on your device's ability to acquire satellite signals (typical coverage). E911 services also depend on local emergency service provider systems/support. Estimated future coverage subject to change.
