PUCO Chair Snitchler

Dear Snitchler,

I was shocked to see that the Public Utilities Commission of Ohio recently rejected AEP Ohio's proposal to develop the Turning Point solar project. This decision is a step in the wrong direction for Ohio's economy and environment.

The Turning Point project was set to be built on 700 acres of reclaimed strip mine land in Noble County.

As you know, Southeast Ohio's economy has struggled to climb out of the recession. The unemployment rate in Noble county stands at 9.3%, among the highest in the state. Many of the surrounding counties are even worse off. Turning Point would be a step towards reversing that by creating over 100 local jobs during each of the three phases of the project.

Additionally, the project attracted more than \$100 million of additional investment when the Spanish solar manufacturer Isofoton announced it was locating its North American manufacturing facility in Napoleon, largely because of the Turning Point project. All told, more than 600 jobs are in jeopardy because of this controversial decision.

The economic impact of this ruling is just the tip of the iceberg.

Unlike the scarred remnants of Ohio's coal dependency that litter Southeast Ohio, Turning Point would have no negative environmental impact. In fact, the project would reduce climate change-related pollution by 70,000 tons a year.

When you took office two years ago, you promised to make Ohio a more business friendly state.

You've gone out of your way to ensure businesses and the jobs they represent, stay in Ohio. I urge you to show the same passion and commitment to job creation when it comes to this project.

Ultimately, the success or failure of Turning Point will be a symbol of your vision of Ohio.

Sincerely,

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business

May 8, 2013

Chairman Todd Snitchler
OH

Dear Chairman Snitchler,

Ohio's dependence on coal and oil has gone on too long. In the 21st century we shouldn't be getting 82 percent of our electricity by burning coal. It's time Ohio moved forward to embrace proven pollution-free technologies like solar power. Turning Point Solar is clean, ready-to-go and a genuine step in the right direction. Please move Ohio's clean energy future forward by approving Turning Point Solar.

Not only will Turning Point provide much needed investment to our state, helping to create more than 300 green jobs, it will help displace coal-fired generation that would emit over 70,000 tons of global warming pollution each year. If Ohio is going to get serious about clean energy we need to double down on solar power and projects like Turning Point.

Sincerely

Crystal Wilson
