Re: Proposed Biers Run-Hopetown- Delano Line

We, the undersigned are very concerned about the proposed 138 kV Transmission Line. While we understand the need for adequate power transmission in our area to support growth and maintenance of our infrastructure, we want the proposed line to be built in the location that best serves the people in this community.

At the May 16, 2013 meeting, it was said that the Blue Route would have the greater effect on people. ***We are those people!*** Primarily, we are concerned about the potential health risks, both long and short term, of constant exposure to the transmission line. Additionally we are concerned about our property values if the Blue Route is selected. Thomas O. Jackson, Ph.D., president of Real Property Analytics, Inc., who serves on the Appraisal Standards and Guidance Committee for the Appraisal Institute concluded that these types of power lines lower property values up to 10% and make homes more difficult to sell; something we can ill afford in today's difficult housing market. This would be true not only for those who live adjacent to the power lines, but all residents and potential buyers as they must enter and exit the Golf View Subdivision under the lines. Lastly, we don't want this blemish on our beautiful view of the hills and countryside.

Thank you for your consideration of our appeal and we urge you to select the Red Route for the Biers Run-Hopetown-Delano Line.

Sincerely,
