IDENTIFICATION AND RATING OF VOIP-PSTN TRAFFIC

Toll VoIP-PSTN Traffic Definition

The term "Toll VoIP-PSTN Traffic" denotes a customer's interexchange voice traffic exchanged with the Ayersville Telephone Company ("Telephone Company") in time division multiplexing format over public switched telephone network ("PSTN") facilities, which originates and/or terminates in Internet Protocol ("IP") format. "Toll VoIP-PSTN Traffic" originates and/or terminates in IP format when it originates from and/or terminates to an end user customer of a service that requires IP-compatible customer premises equipment.

(A) Scope. This section governs the identification of Toll VoIP-PSTN Traffic that is required to be compensated at interstate access rates, unless the parties have agreed otherwise, by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (November 18, 2011) ("FCC Order"). This section of the tariff does not preclude customers from negotiating different rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic. This tariff does not supersede rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic in existing interconnection agreements. Rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic in this tariff applies prospectively.

(M)

(M)

(B) The intrastate terminating switched access rates in this tariff are the same as the interstate rates for terminating switched access. Therefore, no percentage or VoIP factor is necessary to rate the intrastate Toll VoIP-PSTN Traffic, nor are modifications to the rates and/or billing necessary as a result of the Toll VoIP-PSTN provisions of the FCC Order after the effective date of this tariff sheet.
