Ms. Barcy F. McNeal, Secretary Public Utilities Commission of Ohio 180 E. Broad St., 11th Floor Columbus, OH 43215-3793

Re:

Case No. 09-119-EL-AEC

Redacted Exhibits and Transcript Pages

Dear Ms. McNeal:

I am filing redacted versions of the confidential exhibits and transcript pages from the August 27-28 2013 hearing in the above styled proceeding.

The redacted transcript pages include all but the confidential information contained on pages 205 and 215-218 as well as OCC exhibit 3 and 4 in part.

This public version of the transcript pages and the OCC exhibits can be placed in the public for review. A motion for protective order has been filed addressing the redacted information and three copies of the unredacted transcript pages and exhibits have been submitted under seal.

Thank you in advance for your consideration.

Sincerely yours,

Stephen M. Howard

Stephen M. Haward

Attorneys for Ormet Primary Aluminum Corporation

the annual prices.

- A. Okay.
- Q. And would you agree with me that your margin of error from your forecast for annual 2012 prices in April 2011 was 53.47 percent?
 - A. Correct. Correct.
 - Q. Thank you.

And with respect to your forecast for 2013 prices for the annual, you projected a price in April and July of 2011 for the annual price for 2013 of \$ _____; is that correct?

- A. Correct. Yeah.
- Q. And what is your projection of 2013 prices in total now currently?
 - A. Today? It's
- Q. Would you agree with me that in forecasting aluminum prices there are always factors that can't be accurately predicted?
- A. There are factors that you cannot anticipate, yes.
- Q. Would you agree that one factor that you didn't accurately predict for the current market cycle was the psychological effect Europe had on the market?
 - A. Yeah, we didn't anticipate that effect.

- A. This is the Aluminum Intelligence report that we released in July of this year.

 Q. And would you agree that this document provides the basis for the forecast you include in
 - A. Yes.

your testimony?

- Q. Could you turn to page 11 of IEU-Ohio Exhibit No. 5.
 - A. Yes.
- Q. And if you look at HARBOR base case scenario, under the column for 2014 and 2015, do those numbers match up with the forecast in your testimony?
 - A. Yes, they hold on.
 Yes, they match.
- Q. And HARBOR attaches a 50 percent probability that the base case scenario will occur, correct?
 - A. Correct.
- Q. And if you look underneath that, HARBOR attaches a 40 percent probability that the downside scenario will occur, correct?
 - A. Correct.
- Q. The downside scenario for 2014 is \$ correct?

	216
1	A. Correct.
2	Q. And the downside scenario for 2015 is
3	\$ correct?
4	A. Correct.
5	Q. So the difference between the base case
6	and the downside in 2014 is \$ correct?
7	A. Correct.
8	Q. And in 2015 the difference is
9	correct?
10	A. Correct.
11	Q. Could you turn to page 5, please, of that
12	document.
13	A. Yes.
14	Q. Would you agree that the June-July report
15	decreased the probability of the base case scenario
16	occurring in 2013 through 2015 from 60 percent to
17	50 percent?
18	A. Correct.
19	Q. And HARBOR raised the probability of the
20	downside scenario occurring from 2013 to 2015 from
21	30 percent to 40 percent, correct?
22	A. Correct.
23	Q. Would you agree that HARBOR's June-July
24	report also lowered its price forecast for the base

case scenario in 2013 from \$ ____to

A. Correct.

- Q. And would you agree that the June-July report lowered its price forecast for the downside scenario for 2013 from to :
 - A. Correct.
- Q. The June-July report lowered its price forecast for the 2014 downside scenario from \$ 1000 to
 - A. Correct.
 - Q. Please turn back to page 11.
 - A. Okay, I'm here.
- Q. On the second line down where it says "Average Forecast." The average forecast is the average LME forecast from 60 different analysts, correct?
 - A. Correct.
- Q. And the average forecast provided that aluminum prices will average in 2014 and in 2014, correct?
 - A. Correct.
- Q. Sorry, I think I stated that incorrectly. You understood that I meant 2015 in the second part of that question, correct?
 - A. Oh, can you rephrase it, please?
 - Q. Sure. The average of those forecasts

provided that the aluminum prices will average in 2014 and \$ in 2015, correct?

A. Correct.

- Q. Mr. Vazquez, would you agree that disappointing global end-user demand in China, the U.S., India, Brazil, and Europe has increased bearish sentiment in the market toward aluminum given overproduction and overcapacity and unprecedented overhang of aluminum?
 - A. Can you repeat it, please?
- Q. You would agree that disappointing global end-user demand in China, U.S., India, Brazil, and Europe has increased bearish sentiment the market has toward aluminum given the overproduction, overcapacity, and unprecedented overhang of aluminum.
- A. Correct. At that point in time that was the case, yes.
- Q. And you agree that there is currently a record oversupply of aluminum.
- A. We have a record nominal overhang of metal, but in terms of weeks of consumption, we don't. So if we are talking about nominal level aluminum metrics, we do have a record, but in terms of how many weeks of consumption that equals to, we don't. So it depends on what metric we want to use.
