Transmittal Letter
Revised Tariff Sheets Filed Pursuant to the
Commission's Order in Case No. 83-464-TP-COI
and
Case No. 90-5023-TP-TRF

Dear Ms. Crockron:

Revised tariff sheets have been filed with the FCC to amend GTOC Tariff FCC No. 1, Facilities for Interstate Access, in which GTE North Incorporated concurs for intrastate applications.

In accordance with your Commission's Order in Case No. 83-464-TP-COI, we are filing four (4) copies of these revised tariff sheets.

Transmittal No. 1199 - April 6, 1999

This filing withdraws material originally filed under Transmittal No. 1198, under authority of Special Permission No. 99-46 of the FCC. This material is being withdrawn as it was inadvertently filed requesting an effective date before the fifteen day streamlined timeframe under Section 204(a)(3) of the Communications Act.

In addition, this filing re-establishes tariff material originally filed under Transmittal No. 1198 to comply with the fifteen day timeframe for streamlined filings. This material will establish GTE DSL Solutions - ADSL Service in the jurisdiction of Idaho and expands the offering to include ATM (Asynchronous Transfer Mode) network interface access capability in the jurisdictions where ADSL Service is currently available and in Idaho.

This is to certify that the images appearing are an
accurate and complete reproduction of a case file
document delivered in the regular course of business.
Technician SW Date Processed 4-2-99

Ms. Daisy Crockron

This filing will establish GTE DSL Solutions – ADSL Service in the jurisdiction of Idaho and expands the offering to include ATM (Asynchronous Transfer Mode) network interface access capability in the jurisdictions where ADSL Service is currently available and in Idaho.

Acknowledgement and date of receipt of this filing is requested.

Sincerely,

A handwritten signature in black ink, appearing to read "J.W. Kennedy". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

John W. Kennedy

FACILITIES FOR INTERSTATE ACCESS

16. ADVANCED COMMUNICATIONS NETWORKS (Cont'd)16.6 GTE DSL SolutionsGeneral

This section contains the rules and regulations pertaining to the provision of GTE Digital Subscriber Line Services (DSL) Solutions. GTE DSL Solutions provide high-speed connections services over existing copper facilities which are also used to provision customers' local exchange service. The regulations and rates specified herein are in addition to the applicable regulations and rates specified in other sections of this tariff.

ADSL Service(A) Service Description (USOC - ADUXX)

Asymmetrical Digital Subscriber Line (ADSL) Service is an access data technology service offered in speed levels of 256 Kbps Down/64 Kbps Up, 384 Kbps Down/384 Kbps Up, 768 Kbps Down/768 Kbps Up, 1.5 Mbps Down/768 Kbps Up and for multi-user applications, 1.5 Mbps Down/768 Kbps Up. The "up" speeds represent "transmission speeds in kilobits", from the customer designated location (CDL) to the Telephone Company's ADSL connection point, while the "down" speeds represent "transmission speeds in kilobits and megabits", from the Telephone Company's ADSL connection point to the CDL. The connection point is the aggregation point designated by the Telephone Company for connecting multiple Telephone Company serving wire centers of ADSL terminations to other Telephone Company provided network interface services. Other Telephone Company provided network interface services may include, but are not limited to, Frame Relay, ATM, DS1 and/or DS3 facilities. Telephone Company provided DS1 and DS3 network interface services are not yet available for connection with ADSL Service. (T)

(B) Service Provisioning

ADSL Service is provisioned over existing Telephone Company copper facilities and transported to the Telephone Company's backbone network. ADSL Service provides a connection from the customer's designated location (CDL) to the ADSL connection point.

Access from the Telephone Company's ADSL connection point will be provided via Frame Relay Service or ATM Network Service, where facilities permit. Frame Relay Service (C) and ATM Network Service are available in Section 16.3 and Section 16.7. A customer (C) may utilize their existing Frame Relay Service or ATM Network Service, or may submit (C) an order to establish new facilities. If a customer utilizes Frame Relay Service from Section 16.3 or ATM Network Service from Section 16.7, the associated (C) regulations, rates and charges for such facilities shall apply in addition to the (T) rates and charges associated with the ADSL Service rate element.

The Telephone Company will qualify the ADSL Service between the CDL and the serving wire center. The purpose of qualification is to determine the availability and suitability of existing Telephone Company copper facilities to provide the service. The Telephone Company will not provision this service on facilities which are not suitable for ADSL.

The Telephone Company does not undertake to originate data, but offers the use of its service components, where available, to customers for the purpose of transporting customer-originated data.

A listing of the host wire centers capable of providing ADSL Service is furnished in (T) 16.6(G) of this tariff. ADSL will be provided subject to the availability and limitations of Telephone Company wire centers and outside plant facilities and is only available where technical capabilities permit. Downstream data rates depend on a number of factors, including, but not limited to (1) the distance from the CDL to the serving wire center, (2) the type of copper facility (wire gauge) and (3) the physical plant.

Issued: March 22, 1999

FACILITIES FOR INTERSTATE ACCESS

16. ADVANCED COMMUNICATIONS NETWORKS (Cont'd)16.6 GTE DSL Solutions (Cont'd)(F) Rate Regulations(1) Rate Elements

A nonrecurring charge and a monthly rate apply for the installation of ADSL Service. The nonrecurring charge is also applicable when changing bandwidth.

ADSL Service is available in five service level packages, and are based on the "downstream and upstream" speeds chosen by the customer. The service levels are Bronze, Silver, Gold, Platinum and Platinum Plus. The Platinum Plus is available for multi-user applications. A customer may have multiple packages, however, the downstream and upstream speeds may not be substituted within a service level, as the packages are defined by the downstream and upstream speeds.

	<u>Downstream</u>	<u>Upstream</u>
ADSL Bronze	256 Kbps	64 Kbps
ADSL Silver	384 Kbps	384 Kbps
ADSL Gold	768 Kbps	768 Kbps
ADSL Platinum	1.5 Mbps	768 Kbps
ADSL Platinum Plus	1.5 Mbps	768 Kbps

Data speeds set forth above are peak speeds. Actual speeds may be affected by loop distance and other factors, therefore, data speeds are not guaranteed.

(2) Rate Application

ADSL Service is based on the following volume levels of ADSL connections: 1 to 499, 500 to 1500 and Over 1500. The regulations applicable to ADSL Service provided under a TVP arrangement are specified under 16.6(F)(3). Various ADSL Service Package levels (i.e., Bronze, Gold, etc.) will be combined to determine the volume level for rate application. Customers with more than one ADSL Service with different term periods will not be aggregated for determining the volume level rate.

The following diagram depicts a typical ADSL configuration:
