COMMENTS: Concerning Jan 6 2014 hearing on changes to Everpower's Buckeye Wind project

We understand the purpose of this hearing is to discuss what are considered "substantial changes" to the Buckeye Wind proposal. Those changes include re-location of a sub-station, re-location of a staging area and the addition of access roads. Again, these are defined as "substantial" changes. We would like to provide additional information on the re-location of the staging area.

Everpower has told the OPSB that they have a staging area at the north-west corner of Route 36 and Route 814 and they want to move it to Route 36 and Three Mile Road. We own the parcel of land at RT 36 and RT 814. Several years ago, we were presented with a lease for that staging area. After research and discussion we decided we did NOT want to enter into a contract for the staging area.

EVERPOWER DOES NOT AND HAS NEVER HAD A SIGNED LEASE FOR A STAGING AREA AT RT 36 AND RT 814.

Bottom line: Although Everpower is asking the OPSB to approve the re-location of that staging area, in reality they want approval to establish a NEW staging area. If the re-location of the staging area is defined as "substantial", the establish of a new staging area is surely much more than that.

Thank you.
