Re: Case No. 83-464-TP-COI (Docket No. 90-5041-TP-TRF)

Dear Ms. Crockron:

Enclosed are one original and four copies of tariff sheets that are being filed in compliance with the May 21, 1984 Opinion and Order in the above case. That filing requires a Notice of Adoption when modifications are made to the Sprint Local Telephone companies Tariff F.C.C. No. 1 that are to be mirrored in the United Telephone Company Access Tariff, P.U.C.O. No. 1. Tariff F.C.C. No. 1 pages are attached as reflected on the following check sheets:

Check Sheets Effective December 26, 1998

Original Page 1.14

Sprint Local Telephone Companies' FCC Transmittal No. 69 became effective December 26, 1998. The filing 1) added rates and regulations for an OC12 Entrance Ring Connection for Gateway SONET Ring Service in Nevada, 2) added Individual Case Basis filings for Florida and North Carolina, and 3) reflected minor tariff changes to clarify the provision of access services in conjunction with Gateway SONET Service. **These revisions are not applicable in Ohio's Intrastate jurisdiction.**

Please return a date stamped copy of this transmittal letter in the enclosed self-addressed stamped envelope for our files. A duplicate is enclosed for that purpose.

If you have questions or need additional information regarding this filing, please contact Rebecca Donahue at (614)220-8624.

Best regards,

Rudolph R. Povirk, Jr.

Transmittal No. 69

Secretary
Federal Communications Commission
Washington, DC 20554

Attention: Common Carrier Bureau

The accompanying tariff material, issued on behalf of the Sprint local telephone companies ("Sprint LTC") and bearing Tariff F.C.C. No. 1, is sent to you for filing in compliance with the requirements of the Communications Act of 1934, as amended.

These revisions, scheduled to become effective December 26, 1998, consist of tariff pages as indicated on the following check sheets:

Tariff F.C.C. No.

I

Check Sheet No.

3rd Revised Page 1.12
2nd Revised Page 1.13
Original Page 1.14

This filing is being made on 15 days' notice under the Federal Communications Commission's streamlined filing procedures, and includes the following revisions:

- (1) Addition of rates and regulations in Section 7 offering an OC12 Entrance Ring Connection option for Gateway SONET Ring Service in the state of Nevada;

- (2) Addition of an Individual Case Basis filing in Section 7.6 for the provision of three dedicated point-to-point OC3c facilities designed to meet the specific requirements of Williams Communication Group in the state of Florida;
- (3) Addition of an Individual Case Basis filing in Section 7.6 for the provision of three protected 3-node OC3 SONET rings designed to meet the specific requirements of AT&T in the state of North Carolina; and
- (4) Minor tariff changes designed to clarify the provision of interstate access services.

Cost support material in accordance with Sections 61.38 and 61.41 through 61.49 of the Commission's Rules is provided, where required, for these revisions. Certain portions of this material is being filed under separate cover with a request that it be treated as confidential under the Freedom of Information Act, 5 U.S.C. Section 552(b)(4).

The original transmittal letter, along with FCC Form 159 and filing fees in the amount of \$630, is concurrently being delivered via Federal Express to the Wholesale Lockbox Shift Supervisor - Mellon Bank, pursuant to Section 61.32(b) of the Commission's Rules. Acknowledgment and date of receipt of this filing by the Mellon Bank are requested. A duplicate copy of the letter of transmittal is provided for this purpose.

All correspondence and inquiries in connection with this filing should be addressed to Mr. Pete Sywenki, Director - Federal Regulatory Relations, for Sprint's Local Telecommunications Division, 1850 M Street N.W., Suite 1110, Washington, D.C. 20036, (202) 828-7452.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types

There are nine types of channels used to provide Special Access Services. Each type has its own characteristics. All are subdivided by one or more of the following:

(C)

- Transmission specifications,
- Bandwidth,
- Speed (i.e., bit rate),
- Spectrum

The Customer can order a basic channel and select from a list of available transmission parameters, interface combinations, and optional features to design a channel which meets the Customer's specific communications needs.

For purposes of ordering channels, each has been identified as a type of Special Access Service. However, such identification is not intended to limit a customer's use of the channel nor to imply that the channel is limited to a particular use. For example, if a customer's equipment is capable of transmitting voice over a channel that is identified as a Telegraph Service in this tariff, there is no restriction against doing so.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types (Cont'd)

Following is a brief description of each type of channel:

Telegraph - A channel for the transmission of binary signals at rates of 0 to 75 baud or 0 to 150 baud.

Voice Grade - A channel for the transmission of analog signals within an approximate bandwidth of 300-3000 Hz.

Program Audio - A channel for the transmission of audio signals. The nominal frequency bandwidths are from 300 Hz to 2500 Hz, from 200 to 3500 Hz, from 100 to 5000 Hz, from 50 to 8000 Hz, or from 50 to 15000 Hz.

Video - A channel for the transmission of a standard 525 line/60 field monochrome or National Television Systems Committee color video signal and up to four associated 5 or 15 kHz audio signals. The bandwidth for a video channel is either 30 Hz to 4.5 MHz or 30 Hz to 6.6 Mhz.

Wideband - A channel for the transmission of synchronous serial data at rates of 19.2, 50.0 or 230.4 kbps or asynchronous serial data at rates of up to 19.2, 50.0 or 230.4 kbps.

Digital Data - A channel for the digital transmission of synchronous serial data at rates of 2.4, 4.8, 9.6, 19.2, 56.0 or 64.0 kbps.

High Capacity - A channel for the transmission of isochronous serial digital data at rates of 1.544 or 44.736 mbps.

Shared SONET Ring - A SONET-based shared ring with bandwidth capacities of 1.544 Mbps (DS1) and 44.736 Mbps (DS3).

ACCESS SERVICE

7 Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types (Cont'd)

Gateway SONET Ring - A SONET-based dedicated ring with bandwidth capacities of 622.08 Mbps (OC12) and 2488.32 Mbps (OC48).

(N)
|
(N)

Detailed descriptions of each of the channel types are provided in 7.2 following.

The customer also has the option of ordering digital high capacity facilities (e.g., 1.544 and 44.736 Mbps) to a Telephone Company Hub for multiplexing to individual channels of a lower capacity or bandwidth. Descriptions of the types of multiplexing available at the Hubs, as well as the number of individual channels which may be derived from each type of facility are set forth in 7.2 following. Descriptions of the optional features and functions available are also set forth in 7.2 following.

For example, a customer may order a 1.544 Mbps facility from a customer designated premises to a Telephone Company Hub. The 1.544 Mbps facility may be multiplexed at the same or a different Hub to Voice Grade channels or may be extended to other customer designated premises. Optional features may be added to either the 1.544 Mbps or the Voice Grade Channels.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.8 High Capacity Service (Cont'd)(C) Channel Interfaces

The following channel interfaces (CIs) define the bit rates that are available for a High Capacity channel:

<u>CI</u>	<u>Bit Rate</u>	
DS-15	1.544 Mbps (DS1)	
DS-44	44.736 Mbps (DS3)	
SO--, SM--	155.52 Mbps (OC3)	
SO--, SM--	622.08 Mbps (OC12)	(N)
SO--, SM--, SN--	2488.32 Mbps (OC48)	

Compatible channel interfaces are set forth in 7.3.5(H) following.

(D) Optional Features and Functions(1) Automatic Loop Transfer

The Automatic Loop Transfer provides protection on a 1xN basis against failure of the facilities between a customer designated premises and the wire center serving that premises. 1xN protection provides one spare channel for up to a maximum of six working channels. Protection is furnished through the use of a switching arrangement that automatically switches to a spare channel when a working channel fails. Spare channel priority is given to the lowest numbered slot based upon slot position. Slot position

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.12 Gateway SONET Ring Service (Cont'd)(B) Service Components (Cont'd)(1) Entrance Ring Connection (Cont'd)

equipment at the customer's location. When the customer elects to furnish its own terminal equipment at the customer's premises, the Telephone Company will work cooperatively with the customer to provide a physical interface which satisfies the requirements of both parties, and will identify approved equipment types for use in conjunction with Telephone Company provided equipment. ERCs are offered at an OC12 level with a terminating bit rate of 622.08 Mbps, or at an OC48 level with a terminating bit rate of 2488.32 Mbps. The ERC provides transport capacity from the customer's designated premises to the serving wire center of that premises. The Telephone Company and the customer will work cooperatively to design a technically feasible ERC and to determine mutually agreeable conversion timeframes.

(C)
(C)

ERCs provide for the connection of two, three or four nodes via a dedicated SONET ring as described following:

- (a) Basic Entrance Ring Connection - provides a two node ring by connecting the customer's location to a single Telephone Company central office which is part of the existing interoffice facility ring using diverse routing.
- (b) Enhanced Entrance Ring Connection - provides a three node ring by connecting a single customer location to two Telephone Company central offices which are part of the existing interoffice facility rings.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.12 Gateway SONET Ring Service (Cont'd)(B) Service Components (Cont'd)(1) Entrance Ring Connection (Cont'd)

- (c) Premium Entrance Ring Connection - provides a four node ring with no single point of failure for the channel connection by connecting two customer locations to two Telephone Company central offices which are part of the existing interoffice facility rings.

The OC12 and OC48 ERC rate elements will be based on the following ring mileage: (1) 0-20 miles; (2) 21-40 miles; and (3) 41 - 60 miles. If entrance ring mileage exceeds 60 miles, special construction charges as set forth in Section 14 following may apply. OC12 ERCs will be equipped with OC3 level interfaces; and OC48 ERCs will be equipped with OC12 level interfaces. When the customer requests that an ERC be provisioned utilizing an interface arrangement other than those set forth above, additional charges may be applicable and will be determined on an individual case basis.

(C)

(C)

(C)

(2) End User Connection

The End User Connection (EUC) provides the connection from the end user premises to the interoffice facility ring, and provides transport on the ring to the customer's serving wire center. EUCs are available at DS1 (1.544 Mbps), DS3 (44.736 Mbps) or OC3 (155.52 Mbps) service levels. At the customer's option, DS1 and DS3 EUCs may be equipped with the optional features and functions available for high capacity facilities as set forth in Section 7.2.8(D) preceding and 7.5.8(C) following. The sum total of the transport

capacity associated with the EUC may not exceed the capacity of the ERC. End users will be connected to the interoffice facility ring via an on-net or off-net configuration as described following:

(M)

(a) On-Net Connection - provides end user premises SONET Ring connectivity via a ring or point-to-point to a Telephone Company central office which is part of the interoffice facility ring. This connection can be SONET or asynchronous. On-net central offices are identified in the National Exchange Carrier Association Tariff F.C.C. No. 4.

(M)

(b) Off-Net Connection - provides for the end user to be served by a Telephone Company central office which is not part of the interoffice facility ring. This connection can be SONET or asynchronous with connectivity to the closest on-net Telephone Company central office. Off-net central offices are identified in the National Exchange Carrier Association Tariff F.C.C. No. 4.

The Telephone Company will determine and provide the highest level of connection to an end user premises based on existing facilities.

The two service components described in (1) and (2) preceding must be purchased concurrently. Customers may not order the Entrance Ring Connection or End User Connection independent of one another.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.8 Shared Use of Digital High Capacity Service (Cont'd)

For shared use on Gateway SONET Ring Service, the customer must designate a full DS1 or DS3 for the provision of switched access service. For OC12 service, the entrance ring connection rate will be reduced by 1/336 for each DS1 or 1/12 for each DS3 activated for switched access service. For OC48 service, the entrance ring connection rate will be reduced by 1/1,344 for each DS1 or 1/48 for each DS3 activated for switched access service. The DS1 or DS3 switched access entrance facility rates set forth in Section 6.8 preceding will apply for each DS1 or DS3 of the Gateway SONET Ring Service that is used to provide switched access service.

(C)

(C)

The applicable switched access entrance facility rate is dependent upon whether the special access high capacity DS1, DS3 or SONET based facility is provided with or without Telephone Company terminal equipment at the customer's premises (e.g., when a special access channel termination provisioned with Telephone Company provided terminal equipment at the customer's premises is activated for switched access service, the switched access rate for an entrance facility with Telephone Company provided terminal equipment will apply).

Where special access high capacity DS1, DS3 or SONET based service is provided utilizing a channel of the shared facility to the Hub, special access high capacity DS1, DS3 or SONET based service rates and charges will apply for the facility to the Hub as set forth preceding and individual service rates and charges will apply from the Hub to the customer designated premises. The rates and charges that will apply to the portion from the Hub to the customer designated premises will be dependent on the specific type of special access that is provided (e.g., Voice Grade, Telegraph, etc.). The rates and charges will include channel termination and channel mileage; ring connection and ring transport; or entrance ring connection, as appropriate. Rates and charges for optional features and functions associated with the service, if any, will apply as set forth in 7.5 following.
