Ms. Daisy Crockron - Chief
Docketing Department
The Public Utilities Commission of Ohio
180 East Broad Street - 10th Floor
Columbus, OH 43215-3793

Transmittal Letter
Revised Tariff Sheets Filed Pursuant to the
Commission's Order in Case No. 83-464-TP-COI
and
Case No. 90-5023-TP-TRF

Dear Ms. Crockron:

Revised tariff sheets have been filed with the FCC to amend GTOC Tariff FCC No. 1, Facilities for Interstate Access, in which GTE North Incorporated concurs for intrastate applications.

In accordance with your Commission's Order in Case No. 83-464-TP-COI, we are filing four (4) copies of these revised tariff sheets.

Transmittal No. 1244 - Effective March 18, 2000
This filing provides for Special construction of facilities in Florida for NextLink and in Pennsylvania for AT&T, under Section 10, Special construction.

This filing also makes minor textual corrections.

Acknowledgement and date of receipt of this filing is requested.

Sincerely,

John W. Kennedy
Assistant Vice President-Regulatory
and Governmental Affairs

FACILITIES FOR INTERSTATE ACCESS

16. ADVANCED COMMUNICATIONS NETWORKS (Cont'd)16.6 GTE DSL SolutionsGeneral

This section contains the rules and regulations pertaining to the provision of GTE Digital Subscriber Line Services (DSL) Solutions. GTE DSL Solutions provide high-speed connections services over existing copper facilities, which are also used to provision customers' local exchange service. The regulations and rates specified herein are in addition to the applicable regulations and rates specified in other sections of this tariff.

ADSL Service(A) Service Description (USOC - ADUXX)

Asymmetrical Digital Subscriber Line (ADSL) Service is an access data technology service offered in speed levels of 256 Kbps Down/64 Kbps Up, 384 Kbps Down/384 Kbps Up, 768 Kbps Down/128 Kbps up, 768 Kbps Down/768 Kbps Up, 1.5 Mbps Down/768 Kbps Up and for multi-user applications, 1.5 Mbps Down/768 Kbps Up. The "up" speeds represent "transmission speeds in kilobits", from the customer designated location (CDL) to the Telephone Company's ADSL connection point, while the "down" speeds represent "transmission speeds in kilobits and megabits", from the Telephone Company's ADSL connection point to the CDL. The Telephone Company will set the transmission speeds to the speed levels for the service package selected by the customer. The loop distance from the CDL to the serving wire center can affect the transmission speeds. Depending on this distance, actual speeds may be less than the transmission speeds set by the Telephone Company. The connection point is the aggregation point designated by the Telephone Company for connecting multiple Telephone Company serving wire centers of ADSL terminations to other Telephone Company provided network interface services. Other Telephone Company provided network interface services may include, but are not limited to, Frame Relay, ATM, DS1 and/or DS3 Special Access and High Capacity Broadband Access Cloud (HiBAC) (N) service facilities. Telephone Company provided DS1 and DS3 network interface (N) services are not yet available for connection with ADSL Service.

(B) Service Provisioning

ADSL Service is provisioned over existing Telephone Company copper facilities and transported to the Telephone Company's backbone network. ADSL Service provides a connection from the customer's designated location (CDL) to the ADSL connection point.

Access from the Telephone Company's ADSL connection point will be provided via Frame Relay Service or ATM Network Service, where facilities permit. The Frame Relay Service must be of sufficient bandwidth to support the maximum speed of the ADSL Service being provided. Frame Relay Service and ATM Network Service are available in Section 16.3 and Section 16.7. HiBAC Service is available in Section 16.8. A (N) customer may use their existing interstate Frame Relay Service, ATM Network Service (T) or HiBAC Service, or may submit an order to establish new facilities. If a customer (N) utilizes Frame Relay Service from Section 16.3, ATM Network Service from Section (T) 16.7 or HiBAC Service from Section 16.8, the associated regulations, rates and (N) charges for such facilities shall apply in addition to the rates and charges associated with the ADSL Service rate element.

The Telephone Company will qualify the ADSL Service between the CDL and the serving wire center. The purpose of qualification is to determine the availability and suitability of existing Telephone Company copper facilities to provide the service. The Telephone Company will not provision this service on facilities which are not suitable for ADSL.

FACILITIES FOR INTERSTATE ACCESS

16. ADVANCED COMMUNICATIONS NETWORKS (Cont'd)16.7 Asynchronous Transfer Mode Network Service (Cont'd)(F) Rate Regulations (Cont'd)(2) Rate Elements (Cont'd)(d) ATM Access Link

A nonrecurring charge and a monthly charge apply for each point-to-point connection between the Telephone Company's ATM switch and the customer's ATM terminal equipment. The ATM OC3c and the OC12c Access Links are not available for meet point service arrangements. In this situation, the appropriate Optical Networking, OC3c and OC12c rate elements from the Optical Networking Access Services under Section 20 may be used, as applicable, in addition to the rate and charges associated with the ATM rate elements.

No diverse routing of fiber circuits or self-activating service restoral capabilities are provided with the ATM OC3c and OC12c Access Links, however, if such services are desired, the appropriate Optical Networking rate elements from Section 20 may be used, as applicable, in addition to the rates and charges associated with the ATM rate elements. When one of the CDLs is provided by another telephone company the appropriate Optical Networking rates as shown in Section 20 are applicable.

(e) ATM Office Link

The ATM Office Link is an optical cross connect arrangement within the Telephone Company's wire center, between the port on the Telephone Company's ATM switch and a customer's ATM transmission equipment where the customer is provided Expanded Interconnection Services (EIS) as defined in Section 17.

The ATM Office Link is a monthly rate available in OC3c and OC12c bandwidths.

(3) Rate Application

A customer may order a connection to ATM Network Service via an ATM OC3c or OC12c Access Link, a DS1 or DS3 high capacity Special Access Line (SAL) offered under Section 5 or an OC3c or OC12c Optical Networking facilities offered under Section 20. The associated regulations, rates and charges for such facilities from Sections 5 and/or 20 shall apply in addition to the rates and charges associated with the ATM rate elements.

ATM Network Service for each port must be subscribed according to the customer's chosen Level of Service as described following:

- Level 1: Up to 100% of port bandwidth may be utilized for Constant Bit Rate (CBR) and/or Variable Bit Rate-real time (VBR-rt) Quality of Service (QOS) priority processing and network transmission. Any remaining bandwidth may be utilized for VBR-nrt, ABR or UBR services.
- Level 2: Up to 75% of port bandwidth may be utilized for Constant Bit Rate (CBR) and/or Variable Bit Rate-real time (VBR-rt) Quality of Service (QOS) priority processing and network transmission. Remaining bandwidth may be utilized for VBR-nrt, ABR or UBR services.
- Level 3: Up to 50% of port bandwidth may be utilized for Constant Bit Rate (CBR) and/or Variable Bit Rate-real time (VBR-rt) Quality of Service (QOS) priority processing and network transmission. Remaining bandwidth may be utilized for VBR-nrt, ABR or UBR services.

The regulations, rates and charges for associated DS1 and DS3 facilities are found in Section 5. Associated Optical Networking OC3c and OC12c facilities are found in Section 20.

(Z) Reinstate verbiage inadvertently omitted under Transmittal No. 1242.
