Ms. Daisy Crockron, Chief
Docketing Division
The Public Utilities Commission of Ohio
180 East Broad Street
Columbus, Ohio 43266-0573

Re: Case No. 83-464-TP-COI
Case No. 90-5032-TP-TRF

Dear Ms. Crockron:

Attached are three sets of revised tariff pages to be filed in your copy of the
Ameritech Operating Companies Access Service Tariff, F.C.C. No. 2.

Please be advised that with this filing, Ameritech proposes to add clarifying language
to Shared Use provisions when Switched Access Transport services are provided over
a Common Special Access SONET interface.

Should you have any questions or require additional information, please contact
Yvette Drain (847) 248-1415.

Very truly yours,

Vitas R. Cyvas / JEM.

Transmittal No. 1120

Secretary
Federal Communications Commission
1919 M Street, N.W.
Washington, DC 20554

Attention: Common Carrier Bureau

The accompanying tariff material, issued on behalf of Ameritech and bearing Tariff F.C.C. No. 2, Access Service, is sent to you for filing in compliance with the requirements of the Communications Act of 1934, as amended. This material, scheduled to become effective September 6, 1997, consists of new and revised tariff pages as indicated on the following revised check sheets.

Tariff F.C.C. No.

Check Sheet Nos.

1020th Revised Page 1
195th Revised Page 1.2
261st Revised Page 1.3
166th Revised Page 1.5

With this filing Ameritech proposes to add clarifying language to Shared Use provisions when Switched Access Transport services are provided over a Common Special Access SONET interface.

Support material pursuant to Section 61.49 of the Federal Communications Commission's Rules and Regulations is submitted herewith.

- 2 -

The required filing fee, check number 374 for \$600.00, the original copy of this letter and F.C.C. Form No. 159 were sent to the Mellon Bank in Pittsburgh, PA via USPS Express Mail on August 20, 1997. All correspondence and inquiries concerning this filing should be addressed to me at the above address.

Very truly yours,

Fristill Skulman
(K4)

6.1 General (Cont'd)

6.1.3 Rate Categories (Cont'd)

(A) Switched Transport (Cont'd)

(2) Interface Groups (Cont'd)

(f) Interface Group 12 (USOC TPPDX)

Interface Group 12 provides a SONET optical interface at the point of termination at the customer's premises capable of transmitting synchronous optical signals at:

155.520 Mbps (OC-3)	+/- 20 ppm*
622.080 Mbps (OC-12)	+/- 20 ppm*
2488.32 Mbps (OC-48)	+/- 20 ppm*

The interface is provided with either individual transmission path bit-stream supervisory signaling or Common Channel Signaling.

Before the first point of switching, when analog switching using analog terminations is provided and LT-1 transport is utilized, the Telephone Company will provide multiplex and channel bank equipment to derive 24 transmission paths of approximately 300 to 3000 Hz per equivalent DS1 channel.

Before the first point of switching, when analog switching using analog terminations is provided and LT-3 transport is utilized, the customer must order an LT-3 to LT-1 multiplexer. The Telephone Company will provide multiplex and channel bank equipment to derive up to 672 transmission paths of a frequency bandwidth of approximately 300 to 3000 Hz per equivalent DS3 channel.

Before the first point of switching when digital switching, or analog switching with digital carrier terminations is provided and LT-3 transport is utilized, the customer must order an LT-3 to LT-1 multiplexer to derive up to 28 DS1 transmission paths in D3/D4 format per equivalent DS3 channel.

* Note: +/- 20 ppm applies to free running mode. Normal operating mode is synchronized with timing traceable to a Stratum 1 clock.

(1) Non-Standard Interface Groups

Additional non-standard Interface Groups may be provided when a customer has ordered a Specialized Service or Arrangement, set forth in Section 12 following, which provides digital high capacity facilities to a Telephone Company hub. Both Switched Access Service and Special Access Service are provided over the digital high capacity facility under the Shared Use concept as described in Section 6.7.13 following. Operating characteristics and features available for any such non-standard Interface Group will be defined individually for each such service.

(2) Interface Groups (Cont'd)

(1) NonStandard Interface Groups (Cont'd)

Each voice frequency channel activated for Switched Access Service under the Shared Use concept is identified by the USOC from the following table. The USOC corresponds to the overall transmission speed of the digital high capacity facility from which the voice frequency channel is derived.

Transmission Speed	Interface Group USOC
405 Mbps	TPPZX
565 Mbps	TPPZY

(2) Nonchargeable Optional Features

Where transmission facilities permit, the Telephone Company will, at the option of the customer, provide the following nonchargeable optional features in association with Local Transport. The optional features are provided as set forth in 6.8.1(C) following.

(a) Supervisory Signaling

Where the transmission parameters permit, and where signaling conversion is required by the customer to meet its signaling capability, the customer may order an optional supervisory signaling arrangement for each transmission path provided as follows:

- For Interface Groups 1 and 2

DX Supervisory Signaling, or
E&M Type I Supervisory Signaling, or
E&M Type II Supervisory Signaling, or
E&M Type III Supervisory Signaling

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.14 Shared and Mixed Use

Shared Use occurs when Switched Access Service and Special Access Service are provided over the same analog or digital high capacity facility or SONET based service through a common interface. The regulations governing the provision of Shared Use Facilities are set forth in 7.4.9 following. For Tandem-Switched Transport, rates and charges as set forth in 6.9.1(A) following will apply per minute of use. For Direct Transport using analog or digital high capacity facilities, monthly rates described in 6.9.6(A) apply on a prorated basis (e.g., 1/28th of LT-3 rates or 1/24th of LT-1 rates) for each channel of the high capacity facility that is used to provide Switched Access Service. While Shared Use of SONET facilities (i.e., Ameritech OC-3, OC-12 and OC-48 Service, Ameritech OC-3, OC-12 and OC-48 Dedicated Ring and SONET Xpress Service) for Switched Access Direct Transport is permitted, the SONET Special Access facilities continue to be rated as Special Access. Except for those nonrecurring charges waived under The Switched Optimization Plan as set forth in Section 6.8.1(C)(4), nonrecurring charges associated with Direct Transport will apply. The Residual Charge applies as described in 6.8.1(D)(6).

Mixed Use occurs on Switched Transport facilities when Direct Transport and Tandem-Switched Transport services are provided over the same analog or digital high capacity Direct Transport service through a common interface.

The Switched Transport Mixed Use Facility will be ordered, provided and rated as Direct Transport Service (e.g., LT-3 Direct Transport Channel Mileage Terminations and Channel Mileage and Switched Transport Multiplexing) except when the customer's serving wire center (SWC) is co-located with the end office. In this instance, the Switched Transport Mixed Use Facility will be ordered, provided and rated as Entrance Facility only (i.e. Entrance Facility and Multiplexing). The nonrecurring charge that applies when the Switched Transport Mixed Use Facility is installed will be the nonrecurring charges associated with the installation of the appropriate Direct Transport LT-3 Direct Transport or LT-1 Direct Transport Service or Entrance Facility Service as set forth in Section 6.9.6 following.

Switched Access Service nonrecurring charges will apply to each Switched Access line or trunk activated on the Mixed Use Facility as specified in Section 6.8.1(C). When the customer designates a channel of their Direct Transport Service for Tandem-Switched Transport, the Direct Transport Channel Mileage Termination, Channel Mileage and Switched Transport Multiplexing rates will be reduced accordingly (e.g., 1/24th for an LT-1 Direct Transport service, 1/672nd for an LT-3 Direct Transport service) for each individual line or trunk activated. The customer must place an order for each individual tandem-switched Switched Access Service or Direct Transport Service utilizing the Shared Use Facilities and specify the channel assignment for each such service.

Certain material previously on this page now appears on 3rd Revised Page No. 206.1.

(TR1120)

Issued: August 22, 1997

Effective: September 6, 1997

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.15 Information Surcharge

The Information Surcharge is a charge to recover costs that have been assigned to the interstate Information category through Parts 67 and 69 of the Commission's Rules. These costs are other than those incurred in the provision of interstate Directory Assistance Service as set forth in 9. following

M
|
M

The Information Surcharge is assessed to the customer based on the total number of access minutes. The rates are set forth in 6.9.7 following. The application of these rates with respect to the individual Feature Groups is as set forth in 6.8.1(D) preceding.

6.8.16 TRS Provider Transport (TRS-PT)

There are two types of rates and charges for TRS Provider Transport (TRS-PT). These are monthly recurring rates and nonrecurring charges, described as follows:

(A) Monthly Rates

The recurring rates for TRS-PT are flat rates that apply each month or fraction thereof that TRS-PT is provided. The recurring monthly rates that apply for TRS-PT are TRS Local Distribution Channel, TRS Channel Mileage and TRS Channel Mileage Termination. One TRS Local Distribution Channel rate is applied per TRS-PT entrance facility. One TRS Channel Mileage Termination rate is applied per end of the TRS-PT interoffice facility that terminates in the Telephone Company's serving area. TRS Channel Mileage is applied per mile of the TRS-PT interoffice facility.

Switched Access rates as set forth in Section 6.9 and Carrier Common Line rates as set forth in Section 3.9, will not apply to the Switched Access TRS traffic transported over TRS-PT facilities. Accordingly, the TRS-PT rates will not be ratcheted. Switched Access nonrecurring charges, as set forth in Section 6.9.3(A) following, will apply for each channel activated on a TRS-PT facility.

The monthly rates for TRS-PT are set forth in Section 6.9.5(A) following.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.9 Shared Use

Shared use occurs when Special Access Service and Switched Access Service are provided over the same Wideband Analog* or Ameritech DS1 or Ameritech DS3 facilities or SONET based services through a common interface. The facility will be ordered, provided and rated as Special Access Service (e.g., Local Distribution Channel, DS3 Service Packages, DS3 Service Channels, Channel Mileage Terminations and Channel Mileage, as appropriate, and Multiplexing). The nonrecurring charge that applies when the Shared Use Facility is installed will be the nonrecurring charge associated with the installation of the appropriate Special Access Wideband Analog or Ameritech DS1 or Ameritech DS3 facility or SONET based service. Individual service (i.e., Switched or Special Access) nonrecurring charges will not apply to the individual channels of the Shared Use Facility. Rating as Special Access will continue until such time as the customer chooses to use a portion of the available capacity for providing either Switched Access Direct Transport Service or Tandem-Switched Transport Service. When a customer requests Tandem-Switched Transport using Wideband Analog or Ameritech DS1 or Ameritech DS3 facilities, as each individual line or trunk is activated for Switched Access Service, the Special Access Local Distribution Channel, Channel Mileage Termination, Channel Mileage, Service Package, Service Channel and Multiplexing rates will be reduced accordingly (e.g., 1/12th for a Group (i.e., WA1) service, 1/24th for an Ameritech DS1 service, 1/672nd for an Ameritech DS3 service, unless a specific credit amount is stipulated for the service).

When a customer requests Tandem-Switched Transport using SONET based services, as each individual line or trunk is activated for Switched Access Service;

The Special Access Ameritech OC-3, OC-12 and OC-48 Service Channel Mileage and Channel Mileage Termination rate elements will be reduced accordingly on a fractional basis per each individual line or trunk using 1/2,016 on an OC-3, 1/8,064 on an OC-12 or 1/32,256 on an OC-48

The Special Access Ameritech OC-3, OC-12 and OC-48 Dedicated Ring Mileage rate element will be reduced accordingly on a fractional basis per each individual line or trunk using 1/2,016 on an OC-3, 1/8,064 on an OC-12 or 1/32,256 on an OC-48

The SONET Xpress Service Service Area Transport (SAT) rate element will be reduced accordingly on a fractional basis per each individual line or trunk using 1/24 on a DS1 basis or 1/672 on a DS3 basis.

Certain material previously on this page now appears on 6th Revised Page 308.1.

* Wideband Analog Service is limited to circuits in place as of August 11, 1988.

(TR1120)

Issued: August 22, 1997

Effective: September 6, 1997

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.9 Shared Use (Cont'd)

When a customer designates a channel for Direct Transport Service on a Wideband Analog* or Ameritech DS1 or Ameritech DS3 Shared Use Facility, as each individual Direct Transport Service (i.e., LT-1 Direct Transport) is activated the Special Access Local Distribution Channel, Channel Mileage Termination, Channel Mileage, Service Package, Service Channel and Multiplexing rates will be reduced accordingly (i.e., 1/28th for an Ameritech DS3 Service). While Shared Use of SONET facilities (i.e., Ameritech OC-3, OC-12 and OC-48 Service, Ameritech OC-3, OC-12 and OC-48 Dedicated Ring and SONET Xpress Service) for Switched Access Direct Transport is permitted, the SONET Special Access facilities continue to be rated as Special Access. The customer must place an order for each individual tandem-switched Switched Access Service, Direct Transport Service or Special Access Service utilizing the Shared Use Facilities and specify the channel assignment for each such service.

C
T
T
M
M
C
C
M
M

Switched Access Service rates and charges as set forth in 6.8 preceding will apply for each channel of the Shared Use Facility that is used to provide Switched Access Service, except for those nonrecurring charges waived under The Switched Optimization Plan as set forth in Section 6.7.1(C)(4).

Direct Transport rates and charges as set forth in 6.9.6 preceding, will apply for each Direct Transport service activated on the Shared Use Facility.

Where Special Access Service is provided utilizing a channel of the Shared Use Facility to the Hub, Wideband Analog, Ameritech DS1 or Ameritech DS3 rates and charges will apply for the facility to the Hub as set forth preceding and individual service rates and charges will apply from the Hub to the customer designated premises. The rates and charges that will apply to the portion from the Hub to the customer designated premises will be dependent on the specific type of Special Access Service that is provided (e.g., Direct Analog, Telegraph, etc.). The applicable rates and charges will include a Local Distribution Channel and two Channel Mileage Terminations and Channel Mileage, if applicable. Rates and charges for optional features and functions associated with the service, if any, will apply as set forth in 7.5 following.

Certain material on this page previously appeared on 19th Revised Page 308.

* Wideband Analog Service is limited to circuits in place as of August 11, 1988.
