Re: Kammer – West Bellaire 345kV Circuit Re-conductor Project  
Case Number 14-0024-EL-BNR

Dear Chairman Snitchler:

In accordance with Rules 4906-5-02(B) and 4906-11-02, Ohio Administrative Code (“O.A.C.”), AEP Ohio Transmission Company submits the enclosed Construction Notice. The requested start date of construction is March 2014 and is scheduled to run through December 2014.

As required by Rule 4906-11-02(C), O.A.C., AEP Ohio Transmission Company has submitted a copy of the Construction Notice to the appropriate officials in the area in which the project is to be located. Copies of these letters are also enclosed.

Please feel free to contact me if there are any questions.

Respectfully Submitted,

/s/ Yazen Alami

**AEP Ohio Transmission Company  
(AEP Ohio Transco)**

**January 2014**

## **CONSTRUCTION NOTICE**

### **Kammer – West Bellaire 345kv Circuit Reconductor Project**

In accordance with Ohio Administrative Code Section 4906-11-02 Construction Notice Requirements, American Electric Power Ohio Transmission Company (AEP OH Transco) submits the following information:

#### **4906-11-02(B)**

##### **(1) Name of the Project**

The name of the project is the Kammer – West Bellaire 345kV Circuit Reconductor Project.

##### **(2) Description of this Project**

AEP Ohio Transco will be reconductoring the existing Kammer-West Bellaire 345kV circuit on the right side (east side) of the Muskingum River – Tidd 345kV Transmission Line and on the Kammer 345kV Extension No. 2 Transmission Line. Two existing lattice steel structures, structure 240 and 254 will be replaced with self-supporting steel mono-poles. The project extends for approximately 13.5 miles.

##### **(3) Need for this Project**

PJM has identified multiple overloads on various AEP circuits due to generation retirements. One of these circuits is the Kammer – West Bellaire 345kV circuit, which is a section of the Muskingum River – Tidd 345kV Transmission Line. Re-conductoring this circuit of existing 1414 ACSR/PE 69/19 conductor with the proposed 1851-T13 ACCR conductor will alleviate this concern. Replacement of the two lattice steel towers with steel poles Structure #240 and Structure #254 is required to address clearance violations.

##### **Construction Schedule**

Construction of the project is scheduled to begin March of 2014 with the improvements to the existing construction access roads.. Construction is scheduled to run through the end of December 2014.

#### **(4) Estimated Cost**

The estimated costs for the project are as follows:

<b>FERC Accounts</b>	<b>Estimated Capital Cost</b>
<b>355 poles and fixtures</b>	<b>\$482,750</b>
<b>356 Overhead Conductors and Devices</b>	<b>\$11,584,500</b>
<b>Total Cost</b>	<b>\$12,067,250</b>

#### **(5) Technical Features**

The new structures will be self-supporting galvanized steel single pole structures with davit arms designed to double circuit standards on concrete footings. The existing 1,414,000 cm ACSR/PE (Aluminum Conductor Steel Reinforced/Paper Expanded) conductor will be replaced with 1851-T3 ACCR (Aluminum Conductor Composite Reinforced) conductor. This conductor is a high ampacity, low sag conductor that is a proprietary product of 3M and Southwire.

#### **(6) Maps**

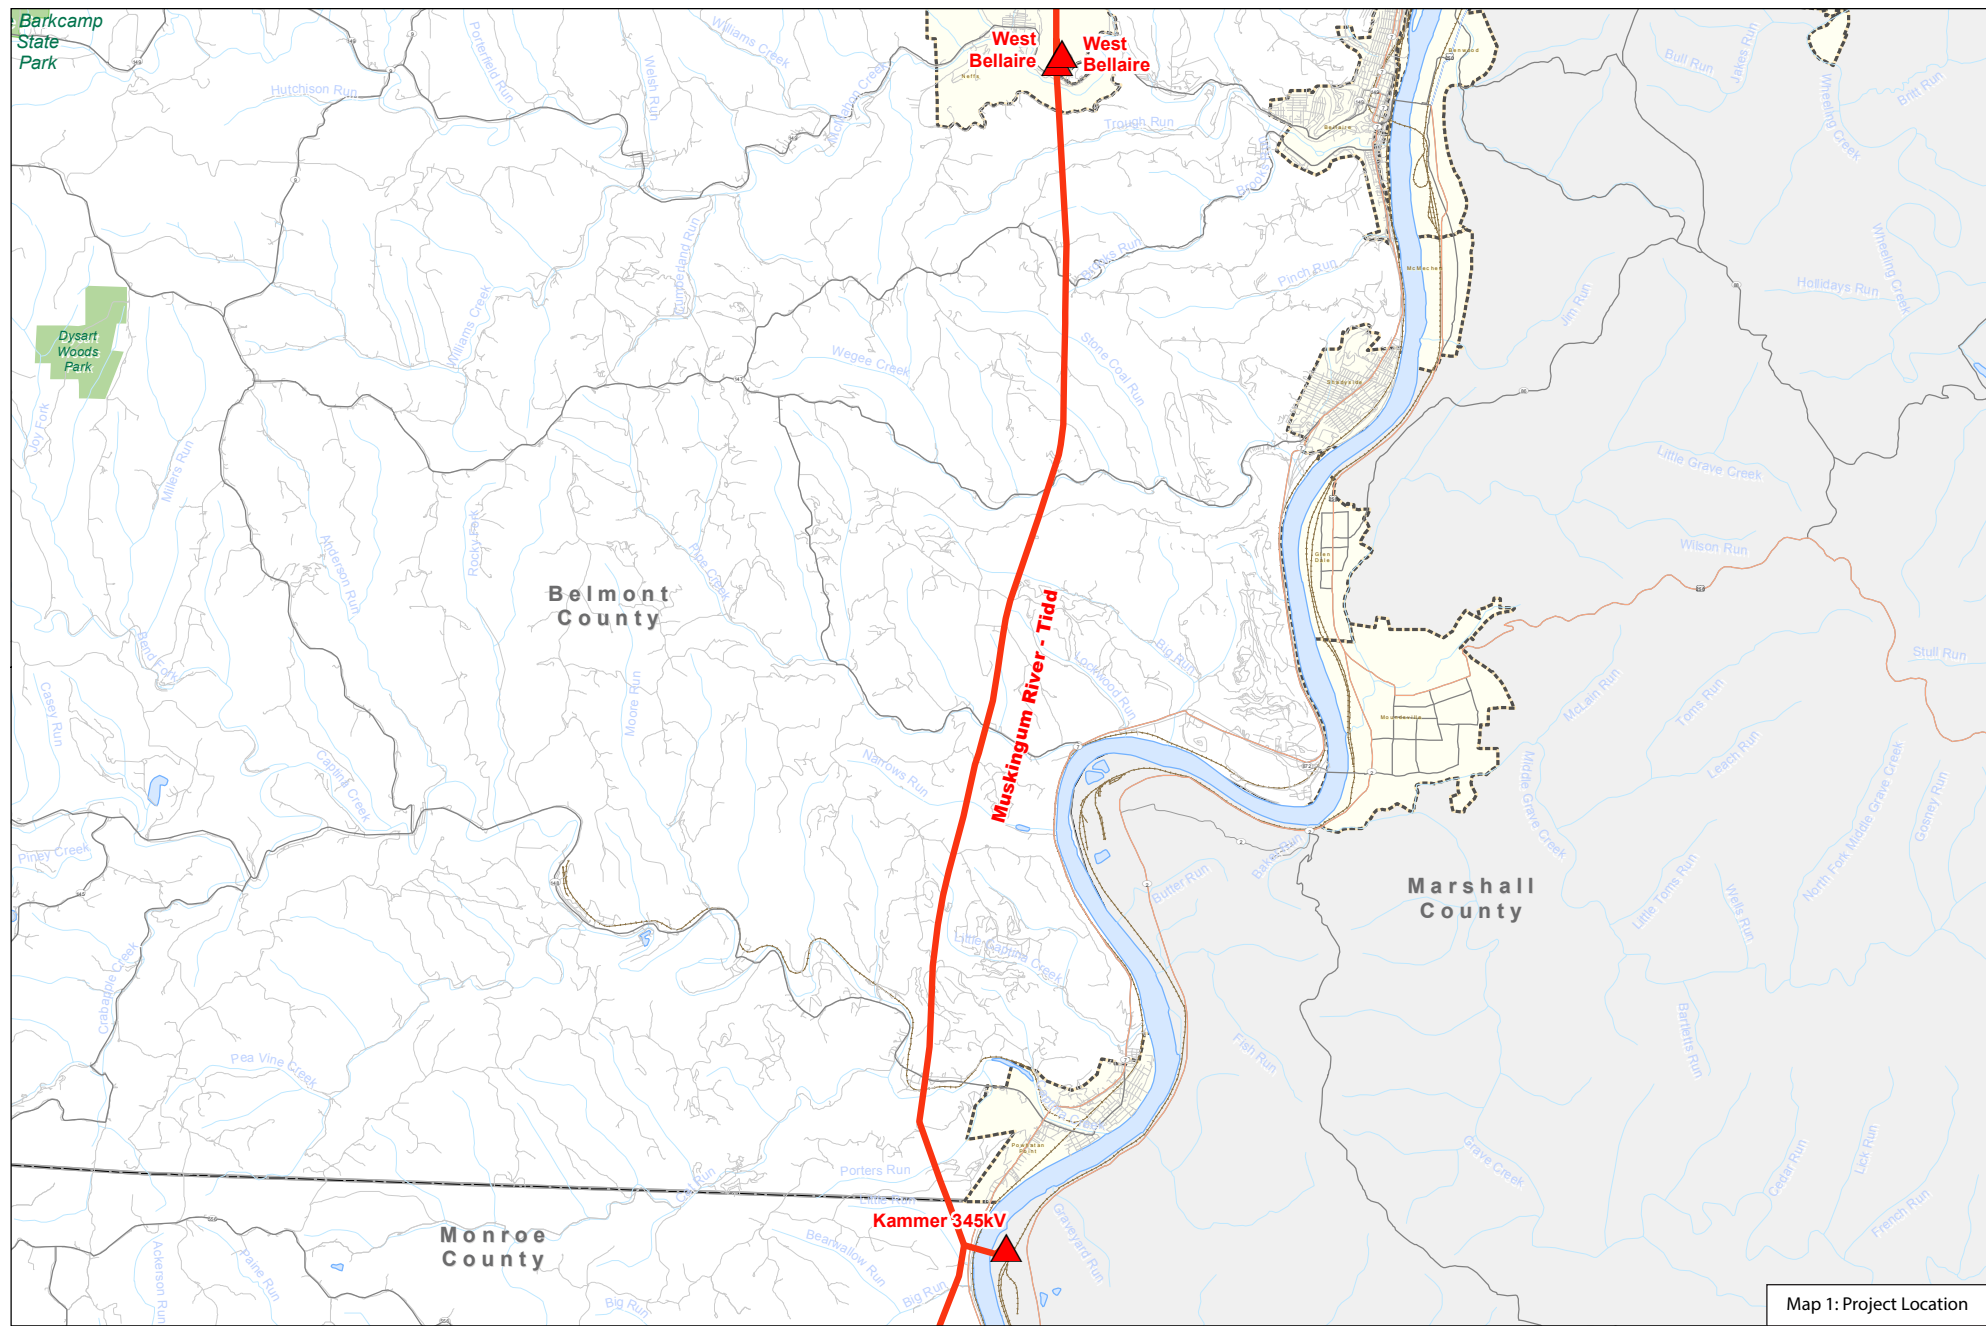

The line is located in Southeastern Ohio, approximately 1 mile west of Powhatan Point at the south end and 3.5 miles west of Bellaire at the north end of the line. The project is located in northern Switzerland Township, Monroe County; eastern York Township, Belmont County; eastern Mead Township, Belmont County; and central Pultney Township, Belmont County, Ohio. Approximately 0.44 miles of the project is in West Virginia on the Kammer 345kV Extension No. 2 Transmission Line. Please reference the attached map for location and line route.

#### **(7) Properties**

The project will be located entirely on existing easements for the Muskingum River – Tidd 345kV Transmission Line and on the Kammer 345kV Extension No. 2 Transmission Line. No new easements will be required for this reconductoring project.

**4906-11-02(C) Notification**

Copies of this Construction Notice have been sent to the Monroe and Belmont County Commissioners, the Township Trustees for Switzerland, York, Mead and Pultney townships.

RE: Construction Notice  
KAMMER – WEST BELLAIRE 345KV CIRCUIT RECONDUCTOR PROJECT

Dear Trustee Hendershot:

In accordance with Rules 4906 of the Ohio Administrative Code (OAC), AEP Ohio Transmission Company (AEP OH Transco) is required to submit a Construction Notice to the State of Ohio Power Siting Board (OPSB) whenever certain changes are made to our transmission facilities.

The proposed Kammer – West Bellaire 345kV Circuit Recondutor Project, OPSB Case Number 14-0024-BNR, consists of reconductoring the existing Kammer – West Bellaire Circuit on the existing Muskingum River – Tidd Transmission Line. Two structures will be replaced in close proximity to the existing structures. The project extends for approximately 13.5 miles. The project is located in Switzerland Township, Monroe County and York, Mead, and Pultney Townships, Belmont County, Ohio.

In compliance with Rule 4906-11-02 of the OPSB Rules and Regulations, we have prepared and filed the attached Construction Notice. This Notice contains details on the line location, project description and construction schedule, and is submitted for your information.

Please feel free to contact me at (614) 552-2004 and I would be happy to answer any questions concerning this project.

Sincerely,

A handwritten signature in black ink, reading 'Edward V. Gilabert', followed by a long horizontal line extending to the right.
