Re: Case No. 13-2451-TP-BLS - Application for BLES Pricing Flexibility

Dear Ms. McNeal:

On January 9, 2014, Columbus Grove Telephone Company d/b/a FairPoint Communications ("FairPoint") filed an amendment to its application for Basic Local Exchange Service ("BLES") pricing flexibility in Docket No. 90-5014-TP-TRF. FairPoint respectfully requests the alternative provider maps included in that filing be replaced with the ones attached herein. The attached maps provide a more definitive level of detail for assistance in reviewing this application and were requested by the Ohio Public Utilities Commission's Utility Specialist.

Please contact Sandra Wennerstrand at 802-863-0679 if you have any questions. Thank you for your attention in this matter.

Yours truly,

M. Beth Fastiggi

cc: Sandra Wennerstrand, FairPoint Communications

These Coverage Locator depictions apply to the following calling plans:**Share Everything, Nationwide Calling Plans, Mobile Broadband and Prepaid.**

Voice roaming charges will apply in the Canada and Mexico coverage areas unless you subscribe to the Share Everything or Nationwide Plus Canada/Mexico Plan.

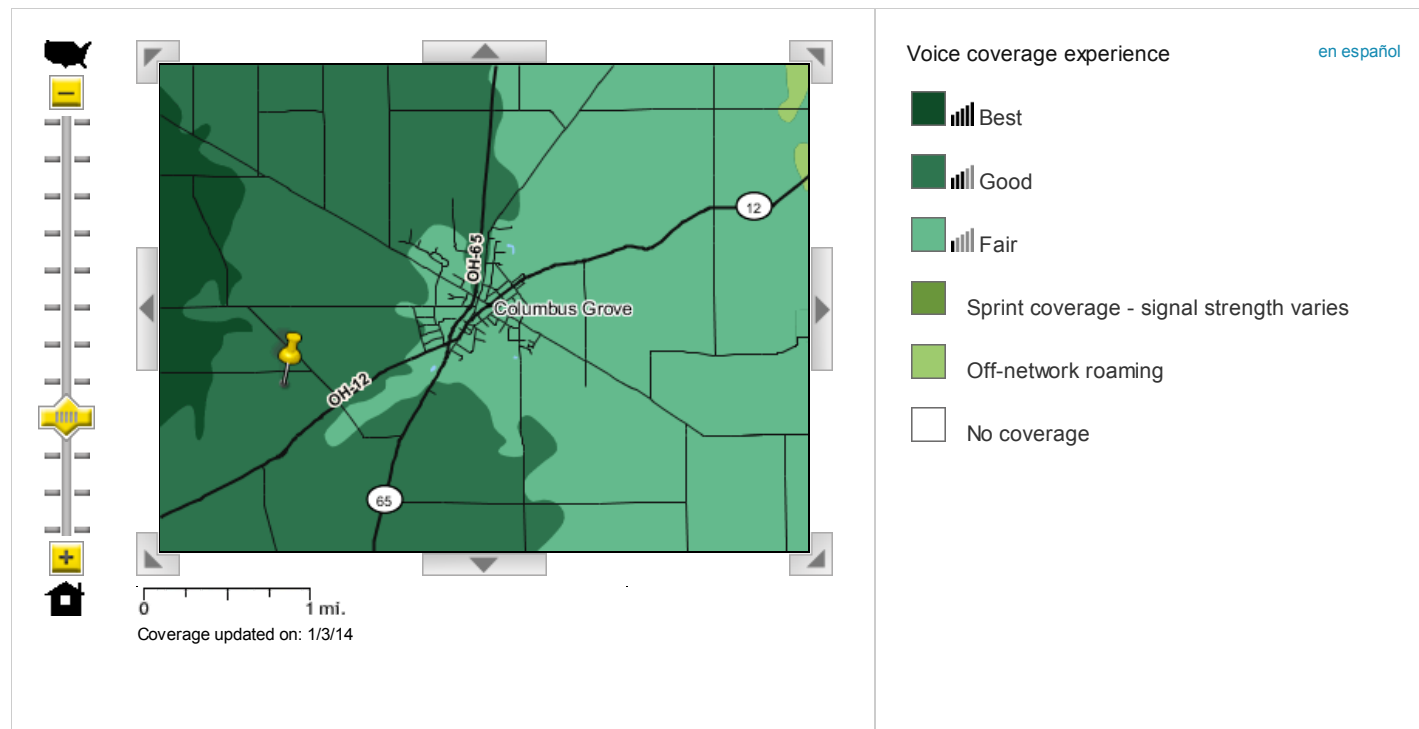

These Coverage Locator maps depict predicted and approximate wireless coverage. The coverage areas shown do not guarantee service availability, and may include locations with limited or no coverage. Even within a coverage area, there are many factors, including customer's equipment, terrain, proximity to buildings, foliage, and weather that may impact service. Some of the Coverage Areas include networks run by other carriers, the coverage depicted is based on their information and public sources, and we cannot ensure its accuracy.

This tool provides high-level estimates of our wireless coverage. Coverage is not available everywhere and varies based on a number of factors.

[>> Learn more](#)

Our coverage maps provide high-level estimates of our coverage areas when using your device outdoors under optimal conditions. Coverage isn't available everywhere. Estimating wireless coverage and signal strength is not an exact science.

There are gaps in coverage within our estimated coverage areas that, along with other factors both within and beyond our control (network problems, software, signal strength, your wireless device, structures, buildings, weather, geography, topography, etc.), will result in dropped and blocked connections, slower data speeds, or otherwise impact the quality of services.

Services that rely on location information, such as E911 and GPS navigation, depend on your device's ability to acquire satellite signals (typically not available indoors) and network coverage. E911 services also depend on local emergency service provider systems/support. Estimated future coverage subject to change.
