Staff Interrogatories - Initial Set

Question 1: In Section G.3 of the application, you are required to submit digital photographs that depict an accurate characterization of the renewable generating facility. The image submitted does not cover all the solar panels.
Please indicate the row X column configuration of the panels.

Answer 1: 8 x 4 in each array = 32 x 2 = 64
8 columns by 4 rows x 2 arrays

Question 2: In Section N of the application, you stated the following:

N.a The meter(s) that are measuring output from the facility are:
No Inverter Meter(s)
Yes Utility Grade Meter(s)

N.1 Please provide the following information for each meter used in your system.

N.1.a Manufacturer: Landis & Gyr

N.1.b Serial Number: na

N.1.c Type: ALF Form 2S

N.1.d Date of Last Certification: October 11, 2013

All facilities that are larger than 6 kW must measure the output of the facility with a utility grade meter (Must meet ANSI 12.1, or demonstrate an accuracy level of $\pm 2\%$). Facilities that are larger than 6 kW and that are not measuring output with a utility grade meter will not be certified (OAC 4901:1-40-04 (D)(1)<<http://codes.ohio.gov/oac/4901%3A1-40>> , OAC 4901:1-10-05(B)<<http://codes.ohio.gov/oac/4901:1-10-05>>). Please submit proof that this meter is utility grade.

Answer 2: Please see the following memorandum.
