Re: West Milton – Eldean 138 kV Transmission Line, 14-0469-EL-BTX

Ms. McFadden,

Thank you for contacting the Ohio Power Siting Board (OPSB) regarding Dayton Power & Light's proposed West Milton – Eldean 138 kV (kilovolt) transmission line.

Your comments will be filed in the docket for case number 14-0469-EL-BTX. It is noted that you are in opposition to the construction of an electric transmission line on Greenlee Road.

To date, Dayton Power & Light has not filed an application with the OPSB. In an application to the OPSB, the applicant must provide detailed information on the probable temporary and permanent impact of the proposed facility.

Dayton Power & Light will hold a public informational meeting that will give local residents the opportunity to learn more about the project and submit comments about the routing of the project. I encourage you to attend. Notice of this meeting will be placed in the local newspaper, as well as on the OPSB website (opsb.ohio.gov). I have enclosed an FAQ sheet that describes how the public can participate in the OPSB process.

If you have any additional questions or concerns, please contact my office at (866) 270-6772. Again, thank you for your interest in this case.

Very truly yours,

Kim Wissman, Executive Director
Ohio Power Siting Board

To: The Ohio Power Sitting Board

I am writing to you with concern for the projected Dayton Power and Light's West Milton to Eldean 138kV Transmission Line.

My husband and I own and live on a farm on the corner of Fenner and Greenlee Rd. This is a third generation farm that my Grandfather first owned. This farm has some of the most fertile and productive land in the county. We depend on the income of this farm to maintain a quality and productive farm program.

This high voltage power transmission line would not only affect the value of our home but also our crop yields and income. If the proposed line would be run through our fields it would be a huge inconvenience to farm around them and take away farmable acreage.

New construction homes that have been built along Greenlee Rd. would decrease in value and eventually deteriorate into undesirable real estate.

Brukner Nature Center is a 165 acre preserve that is less than ½ mile from proposed line. I do not think this would be a very natural view for visitors to this center which does much for this community with their quality adult and children's educational programs.

Please take these issues in serious consideration.

Susan (Fouts) McFadden
