

BEFORE

THE PUBLIC UTILITIES COMMISSION OF OHIO

In the Matter of the Authorization of CSX)
Transportation, Inc. to Install Active Grade) Case No. 14-593-RR-FED
Crossing Warning Devices in Hardin)
County.)

FINDING AND ORDER

The Commission finds:

- (1) R.C. 4905.04 provides that the Commission has statutory authority to regulate and promote the welfare and safety of railroad employees and the traveling public.
- (2) R.C. 4907.471 provides that the Commission shall survey all at grade crossings and establish a priority list to determine which grade crossings are in need of additional protective devices.
- (3) R.C. 4907.476 provides that where the Ohio Department of Transportation enters into contracts and agreements for grade crossing protective device projects, the Commission shall work with and through the department.
- (4) On April 15, 2014, Staff filed a memorandum stating that the Ohio Rail Development Commission (ORDC) has authorized funding for CSX Transportation, Inc. (CSX) to install mast-mounted flashing lights and gates in Hardin County, near Mt. Victory, Hale Township, Township Road 217, DOT# 518-381B.

Staff adds that the crossing was surveyed because of its hazard ranking on May 13, 2013, and was found to warrant the upgrade. Staff recommends that because the plans and estimates for the project have been submitted and approved, the Commission establish a deadline of nine months for CSX to complete the project. The project will be paid for with federal funds and is actual cost.

- (5) Upon review, CSX is hereby authorized to acquire project materials and to commence construction as detailed in the letter of construction authorization. CSX shall notify Staff at

least five working days before the date work is scheduled to begin at the project so that arrangements can be made for any inspection. In addition, CSX shall timely notify Staff of any changes in the scope of work, cost overruns, materials, etc., which are not in the approved plans in order to estimate and secure approval before the work is performed.

- (6) Within 30 days of the issuance of this Finding and Order, CSX shall file a notice that it has initiated discussions with Mid Ohio Energy Cooperative, Inc. (Mid Ohio), or any other applicable utility, to ensure that electric service will be available to enable the grade crossing improvements to be constructed and placed in service within the deadline specified by the Commission. Such filing shall identify the steps CSX has taken with Mid Ohio, or any other electric utility, and the local highway authority to have electric service available during the construction and cut-in phases of the project. CSX shall serve a copy of the notice upon Mid Ohio or any other applicable utility. To ensure that the deadline is met, Mid Ohio or any other applicable utility shall timely inform the Commission in writing of any issues regarding the availability of electric service.
- (7) The Commission will issue no further construction authorization. Further, the grade crossing improvement project should be completed by February 6, 2015.
- (8) It is expected that all work necessary for Federal Highway Administration acceptance of the warning devices will be completed by the in-service due date and that the railroad will be responsible for this work. This work includes, but is not limited to, any ancillary work to make the warning devices function as designed and visible to the roadway user, and Manual of Uniform Traffic Control Devices compliance, including minor roadway work if necessary.
- (9) In order to expedite the activation of the warning devices, the Commission no longer requires railroad companies to delay such activation pending final inspection by Staff. However, CSX should notify Staff and ORDC 30 days before the projected date of completion. At the time Staff or ORDC makes its final inspection of the devices and finds that the identified installation is complete and the warning devices

have been put in service, Staff should file a memorandum in this docket indicating that the installation is complete and that the warning devices have been put in service.

- (10) With the intention of promoting increased public safety during the pendency of the project, the Commission urges the appropriate local government agency to make an immediate assessment of interim physical improvements, which would enhance driver awareness at the crossing. The Commission may provide assistance in funding improvements, such as rumble strips, illumination, signs or other safety enhancements for the project. Applications for such funding should be made to the Commission's Transportation Department, Rail Division, which shall review all proposals. In the event the department finds the improvements appropriate, the department director is hereby authorized to execute a contract with the local government agency, and obligate up to \$5,000 from the State Grade Crossing Safety Fund for such improvements at the project location. However, the local government agency should not initiate any improvements until a contract has been executed.

It is, therefore,

ORDERED, That, by June 6, 2014, CSX shall file a notice that it has initiated with Mid Ohio, or any applicable utility, the process to ensure that electric service will be available at the involved grade crossing as set forth in finding (6). It is, further,

ORDERED, That CSX follow the detailed instructions as outlined in the ORDC letter of construction authorization and proceed with and complete the project by February 6, 2015. It is, further,

ORDERED, That CSX notify Staff at least five working days before the date work is scheduled to begin at the project site so that arrangements can be made for any inspection. It is, further,

ORDERED, That CSX timely notify Staff of any changes in the scope of work, cost overruns, materials, etc., which are not in the approved plans and estimates, and shall secure approval before the work is performed. It is, further,

ORDERED, That CSX notify the Commission and ORDC 30 days before the projected date of completion. It is, further,

ORDERED, That, at the time Staff or ORDC makes its final inspection and finds that the installation at the grade crossing is complete and the warning devices have been put in service, Staff will file a memorandum in this docket indicating that the installation is complete and the warning devices have been put in service. It is, further,

ORDERED, That copies of this Finding and Order be served upon CSX, ORDC, Hale Township Trustees, Mid Ohio, and any other interested person of record.
