7.6 Identification and Rating of VoIP-PSTN Traffic

(A) Scope

VoIP-PSTN Traffic is defined as traffic exchanged between a Telephone Company end user and the customer in Time Division Multiplexing ("TDM") format that originates and/or terminates in Internet Protocol ("IP") format. This section governs the identification of VoIP-PSTN Traffic that is required to be compensated at interstate access rates, unless the parties have agreed otherwise, by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (November 18, 2011)("FCC Order"). Specifically this section establishes the method of separating VoIP-PSTN Traffic from the customer's traditional intrastate access traffic, so that VoIP-PSTN Traffic can be billed in accordance with the FCC Order.

- (B) VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Telephone Company's applicable tariffed interstate switched access rate as specified in National Exchange Carrier Tariff F.C.C. No. 5, Section 17.

(C) Calculation and Application of Percent-VoIP-Usage Factors

The Telephone Company will determine the number of Toll VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under subsection (B), above, by applying a Percent-VoIP-Usage ("PVU") factor to the intrastate access MOU exchanged between the Telephone Company and the customer. Pursuant to Paragraph (E) of this section, the PVU will be derived and applied as follows

- (2) The customer will calculate and furnish to the Telephone Company a terminating PVU factor representing the whole number percentage of the customer's total terminating intrastate access MOU that the customer exchanges with the Telephone Company in the state that is sent to the Telephone Company and which originated in IP format and that would be billed by the Telephone Company as intrastate access MOU.
- (3) The customer shall not modify their reported PIU factor to account for VoIP-PSTN traffic.
- (4) Both the customer provided originating PVU and the terminating PVU shall be based on information such as the number of the customer's retail VoIP subscriptions in the state (e.g. as reported on FCC Form 477), traffic studies, actual call detail or other relevant and verifiable information which will be provided to Telephone Company upon request.
- (5) The customer shall retain the call detail, work papers and information used to develop the PVU factors for a minimum of one year.

(D) Initial Implementation of PVU Factors

- (1) If the PVU factors cannot be implemented in the Telephone Company's billing systems by December 29, 2011, once the factors can be implemented, the Telephone Company will adjust the customer's bills to reflect the PVU factors prospectively in the next bill period, if the PVU factors are provided by the customer to the Telephone Company prior to April 15, 2012.
- (2) The Telephone Company may choose to provide credits based on the reported PVU factors on a quarterly basis until such time as the billing system modifications can be implemented.

(E) PVU Factor Updates

The customer may update the PVU factors quarterly using the method set forth in (C)(1) and (2) preceding. If the customer chooses to submit such updates, it shall forward to the Telephone Company, no later than 15 days after the first of January, April, July and/or October of each year, revised PVU factors based on data for the prior three months, ending the last day of December, March, June and September, respectively. No prorating or backbilling will be done based on the updated PVU factors.

(F) PVU Factor Verification

- (1) The Telephone Company may ask the customer to verify the PVU factor furnished to the Telephone Company. The customer shall comply, and shall reasonably provide the records and other information used to determine the PVU factors within fifteen (15) days of the Telephone Company's request.

(C) Calculation and Application of Percent-VoIP-Usage Factors

The Telephone Company will determine the number of Toll VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under subsection (B), above, by applying a Percent-VoIP-Usage ("PVU") factor to the intrastate access MOU exchanged between the Telephone Company and the customer. Pursuant to Paragraph (E) of this section, the PVU will be derived and applied as follows.

- (1) Terminating Toll VoIP-PSTN Traffic. The intrastate terminating switched access rates in this tariff are the same as the Company's interstate rates for terminating switched access. Therefore, no percentage or VoIP factor is necessary to rate the terminating intrastate Toll VoIP-PSTN Traffic, nor are modifications to the rates and/or billing necessary as a result of the Toll VoIP-PSTN provisions of the FCC Orders after the effective date of this tariff sheet.
- (2) Originating Toll VoIP-PSTN Traffic. The intrastate originating Toll VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Company's applicable tariffed interstate switched access rate as specified in the National Exchange Carrier Association Tariff F.C.C.
