(3)

Dear Steve and all Voting members and non voting members of the OPSB,
Thank you for contact info.

Sobering article.

4turbines = 1600 miscarriages at a

Denmark fur farm. veterinarians ruled out food/disease causes. the only change for the mink farm has been the four turning turbines. people are mammals also. Scientists believe the negative deadly side effects are believed to be from the low frequencies that you don't even hear.

Steve this is much different than being inconvenienced by having to see a large tower in Morrow County much different. I am outraged at the health effects not because I don't want a big tower in my backyard I don't really care about that. I'm outraged at the health effects, the documented research by Yale and Harvard professionals and our government website pubmed.org which shows the negative effect the low frequencies have on people's health. especially vulnerable populations like children under five babies fetuses elderly.

please put this , also, in the public record thank you.

A Caring Mother,
Valerie Malicki
