Jessica,

Based on the GIS data submitted by the applicant, Windlab, an approximate distance from your residence at 3227 Omega Road would be .57 miles, or 3,026 feet, from proposed turbine #24.

(map)

Please note that this data was developed and provided by Windlab to help the public visualize what has been proposed for Board consideration. This map does not constitute official approved turbine sites or imply OPSB approval.

We're in the process of making the GIS data available on our website for this project.

Thanks,

Steve

Dear Steve,

Thank you for the response. Upon viewing the maps in the documents I see that a wind turbine is very close to my property at 3227 Omega Rd. Could you tell me exactly how close I am to the proposed wind turbine? I was under the impression that these turbines would be much further south, not in my backyard. I am extremely concerned about this new information. Do I have any rights or say about this proposal since my family and I will be directly impacted by it's presence?

Thank you.

Jessica Williams

> I am a landowner in Greenwich Township in Huron County Ohio. I am writing to express my concern over the proposed wind farm in my community. I have recently been made aware of the possibility that wind turbines can have adverse effects on the health and wellbeing of people living near them. Upon first reading

that the wind farm was being considered in our area, I was unaware of the negative impact that they have so I was neutral to the idea. Concerns are now being brought to my attention and I am growing quite apprehensive about the idea. I strongly desire that more research be done on possible adverse effects of wind turbines before they be allowed to be put in my area. I would also like to be informed of any action I can take to postpone this process until further research can be made. Thank you for your time and attention to this serious situation.
