Mr. Ledet,

I would suggest contacting Monica Jensen at Windlab for that data.

Thanks,

Steve

Subject: Case number 13-0990-EL-BGN

OPSB staff,

In exhibit O, sound survey and noise assessment document, I have a question about table 8 on pg. 42. It contains a list of 39 non-participating properties that will have an estimated A-weighted sound level of 40dba or greater. What are the exact addresses of these properties? They have an Acentech ID# and an undecipherable latitude and longitude. Can you help get information from wind lab on this? Thanks
Kevin Ledet
