OPSB: Please docket response.

Mrs. Malicki,

Thank you for your direct question of how many homes are 1.25 miles from the proposed turbines. There are 668 homes 1.25 miles from the proposed turbines. For reference, the Acoustical Study (Exhibit O: <http://dis.puc.state.oh.us/CaseRecord.aspx?CaseNo=13-0990>) included 906 non-participating residences, which encompassed a greater area than the 1.25 mile distance around each turbine location.

Best,

Monica Jensen

Dear OPSB and Monica,

Referencing case #13-0990-EL-BGN

Research shows the predicted response from a community with an ambient 51 dBA noise level will be "vigorous community action" and "strong appeals to stop noise."

Hard questions.

The easy question Monica is this: HOW MANY HOMES are 1.25 miles from the proposed turbines?

You promised to answer questions, and we are still awaiting your prompt response.

Sincerely,

Valerie C. Malicki, MA, LPCC

Dear OPSB and Monica,

Since one of the criterion of this project is that meets the "public need interest and convenience " our community looks forward to a prompt accurate response.

Thank you,

Valerie C. Malicki, MA, LPCC
