Dear OPSB and Monica,

Again, waiting to hear ILFN (Infrasound Low-Frequency Noise) predictions, as in my previous email.

Next direct questions ("2nd grade" level questions):

1. **Where does Windlab currently own and operate commercial wind turbines?** Please give names of residents and contact info. Please give exact locations where currently owned and fully operating projects are located. Please give the decibal levels of these projects, and IFLN emission levels.
2. How are complaints handled at any project Windlab has ever built? Please give specific examples, names, and contact info.

Thank you kindly for addressing specific information as to how this tentative project will meet "public need, interest, and convenience."

Sincerely,

Valerie C. Malicki, MA, LPCC
