Mr. Starcher,

Thank you for contacting the Ohio Power Siting Board (OPSB) regarding the Greenwich Windpark, OPSB Case No. 13-0990-EL-BGN. Your comments will be docketed in the case record. It is noted that you are opposed to the proposed project.

The OPSB Staff Report of Investigation serves as the Staff's investigative summary of the project and serves as a recommendation to the Board. Staff's discussion of the decommissioning of the facility may be found on page 39 of the Staff Report. Conditions #46 and #47, among others, require the Applicant to perform certain duties for the decommissioning of the facility, including posting and maintaining a surety bond that would cover the costs of decommissioning the project.

Ultimately, the Board will vote whether or not to certificate the Greenwich Windpark. To date, a vote for this project has not been scheduled.

Thank you,

Steve

Dear Sirs:

I am a resident of Greenwich Ohio and I have been researching the Wind Mill project which is proposed to be in our township and I find it is too much of a health hazard for what benefits that would be gained from the power generated by said Wind Mills. The life of these monsters is not worth putting them up as they will not last more than 15 to 20 years. Who will be responsible for tearing them down after the life of them has passed?

My children and grand children will have to listed to them for their lifetime. I maybe will not live long enough for them to be a health hazard for me, but for future residents of the area if anyone will move into the area will be affected.

I strongly urge you not to approve the installation of this project as it will greatly impact our lives for the foreseeable future.
