Dear OPSB and Monica,

Please docket case #13-0990-EL-BGN, including attachments.

Monica, it appears you want to influence my future.

Monica, what are the Infrasound Low Frequency Noise Emissions predicted for my bedroom?

What are the Infrasound Low-Frequency Noise Emissions predicted for my school?

These are direct questions.

Certainly a company that "knows wind," and cares so deeply for our community, and has researched us for over four years would have definitely made predictions about the Infrasound Low Frequency Noise Emissions.

What are those predictions?
Thank you in advance.

Sincerely, An Innocent Sweet Baby,

Violet Malicki,
9th Generation Huron County Ohio Resident
