Subject: greenwich wind lab #13-0990-EL-BGN

Categories: Red Category

While petitioning, distributing signs and lobbying our neighbors I've encountered a couple who are venomously opposing industrial wind turbines. They are both teachers at our local high school, both lifelong residents and have built a lovely new home in the country with the meager savings of school teachers. They have three accomplished children, one of whom is subject to disabling migraines. They will be surrounded by SEVEN turbines! How unfair. It just broke my heart as I talked with them tonight. They are helping us to fight this fight we've been in for months with many letters to legislators. Please help people like this and our community by vetoing these monstrosities in our community. You know they ARE NOT green! Please have the integrity to vote against them. The manager of our local electric co-op has spoken out against them and addresses the issue of higher electric rates because of them. I, now, sit out on my deck mornings and watch the sun rise – beautiful way to start the day. If you pass this I will be looking at these horrible machines. We have raised five children and nine grandchildren on our dairy farm and I would pray that others could have the ability to live the life close to nature that we have enjoyed. Monica Jenson of Wind Lab heartlessly stated in our local paper that because we live with the noise of trains that a little more noise from turbines would make no difference. We lost our beloved grandson when he was killed at a train crossing a year ago. We loved him so much. So, we don't like the trains in this town but it seems that isn't an excuse to bring more disruption here. We love our town! Please help us preserve it. We will be at the meeting Monday to watch you follow your heart. Sincerely, Connie Oney
